# WRITING ASSIGNMENT 1: CAUSE-EFFECT PARAGRAPHS

**Instructions**

1) Scan the resource texts on the topic of **loneliness**. From the readings, extract noteworthy information explaining the causes and effects of loneliness.

2) Reflect on what you have read and make notes in your own words. From your notes, find an area within the topic of loneliness to focus on. For example, you could concentrate on loneliness among university students, young urban professionals or the elderly. In addition, you could choose to explore economic, social or psychological factors related to loneliness. Finally, you could identify a specific country or region for your analysis. The point is you must narrow your focus.

3) Write a paragraph of approximately 150 words on the **causes** and another 150-word paragraph on the **effects** of loneliness (approximately 300 words in total). You do not need an introduction or conclusion. [There will be a 10% penalty for texts over the word limit.]

4) When you use ideas from the resource texts, please use APA (7th ed.) referencing format. Your text should contain:
   - In-text citations
   - A list of references at the end

5) For both paragraphs, use proper paragraph structure:
   - Topic sentence
   - Developing/Supporting sentences
   - Concluding sentence
   - Logical development

6) Format your work according to the Assignment Style Sheet. Add your AI declaration at the end of your text, after your references. Submissions without the AI declaration will be considered as plagiarized.

7) Submit your Cause Effect Paragraphs assignment as a Word document to Canvas by **11:59 pm, two days after your tutorial in Week 6**.
   - Name your assignment file with the "tutorial group number_your name_assignment".
   - Example: G2_Teo Wei Jie_c-e paragraphs

**Resource Texts**

1. WHO declares loneliness a global public health concern (The Guardian, 2023)
2. Reducing loneliness on college campuses (Psychology Today, 2025)
3. China's latest tech obsession (Channel News Asia, 2026)
4. Sharing a meal with friends for mental health (National Geographic, 2025)
5. Addressing loneliness amongst university students (Child and Adolescent Mental Health, 2023)
