00:00
I'm not happy for it, but this one.

00:03
And then we'll take a break, and then we'll talk a little bit about open data, right? This concept that if we open.

00:09
When transmissible share, right? It's a very specific ethos. And we look at, if you've seen the readings, some of the complications that come when it comes to communities that are historically Disadvantaged.

00:23
Or have been sort of marginalized? Okay, so that's really what we're going to talk about, and we're going to look a little bit into what it means for assis historians, right? Working in this view. What does it mean for the decisions that we make?
还是被边缘化了？好了，这就是我们要讨论的内容，我们会稍微探讨一下这对历史学家意味着什么，对吧？在这个视图中工作。这对我们所做的决定意味着什么？

00:34
The kind of projects that you work with, and how do you decide it? Okay.
你参与的项目类型，你是如何决定的？好吧。

00:38
So here's a comment. I find myself struggling a little bit with, a little bit, just subject with the process of historical methods.
这里有一个评论。我发现自己在历史方法的过程中有点挣扎。

00:48
A little bit dancing. So the thing with digital history is that we're kind of a problem withizing a lot of the historical methods of traditional methods that we're using.
跳一会儿舞。数字化历史的问题在于我们在使用传统方法的同时也在使用历

史方法。

00:57
Okay. So I understand that, you know, we tend to get a bit philosophical about, sort of, the nature of knowledge and, kind of, the ways that we get at it, that estimology of it. So what I want to say is that if you're having issues with history as a method, or.
好吧。所以我理解，你知道，我们对知识的本质，以及我们获取知识的方式，以及对知识的估计，倾向于有点哲学化。所以我想说的是，如果你对历史作为一种方法有问题，或者。

01:11
Getting an understanding about how do we get truth from material, right? Please come talk to me. We're happy to sort of give everyone a crash course about philosophy of history, right? Digital history does question a lot of that sometimes.
了解我们如何从材料中获得真理，对吧？请过来和我谈谈。我们很乐意给大家上一堂关于历史哲学的速成课，对吧？数字历史有时确实会质疑很多。

01:25
So you need to understand the traditional method, then you can kind of get a sense of what digital history is, kind of complaining about when it comes to historical work.
所以你需要理解传统的方法，然后你就能了解数字历史是什么，当涉及到历史工作时，你会有点抱怨。

01:35
Okay, um.
好的,嗯。

01:40
How do digital historians digitization work survive or even continue academia reward some works over others? If digital historians branch out into.
数字历史学家如何将数字化工作保存下来，甚至继续下去，学术界如何奖励

一些作品而不是其他作品？如果数字历史学家扩展到。

01:52
Museums, archives, or private firms? How does it impact who can have access to these digital works of histories, right? Big question, how are digitization efforts not seen as something that will be impacted towards future research in activities.
博物馆、档案馆还是私人公司？它如何影响那些可以访问这些数字历史作品的人，对吧？一个大问题是，为什么数字化工作不被视为对未来研究活动的影响。

02:07
It's a big question. And again, the answer is kind of an observational answer, and it's really just to say that organizations and industries change. Firstly.
这是个大问题。再一次，答案是一种观察性的答案，它只是说组织和行业在变化。首先。

02:19
Right? There's always a friction, there's always a inertia to all of the trees. And academic is no different, right?
对吧?所有的树都有摩擦，都有惯性。学术上也不例外，对吧?

02:27
The culture in academics type traditional metrics, right? And so when digital history kind of is on a fringe.
学术界的文化是传统的衡量标准，对吧？所以当数字历史处于边缘的时候。

02:34
It challenges, not these methods, and many times it doesn't matter, right? And that's the price of it. But I will note there are some bright spots. There are the regional variations as to.
它挑战的不是这些方法，很多时候这并不重要，对吧？这就是它的代价。但我要指出，也有一些亮点。有地区差异。

02:47
How we measure success or contributions or impact, E.G., in the UK, there's a metric of impact.
我们如何衡量成功、贡献或影响，例如，在英国，有一个衡量影响的指标。

02:56
Right? What's the impact of the research that you're doing or the stuff that you've created? And actually, one third of funding for universities, one third comes from research excellence.
对吧?你正在做的研究或你创造的东西有什么影响？实际上，大学三分之一的资金，三分之一来自卓越的研究。

03:07
Another that comes from teaching accidents, and the laughter comes from what we call impact, right? So what are the ripples of the work that you've done in the wider community?
另一个来自于教学事故，笑声来自于我们所说的撞击，对吧？你所做的工作对更广泛的社区有什么影响?

03:16
Right. So has your research changed practice in administer of education, right? Has it changed the way that museum curators work? Right?
正确的。你的研究改变了教育管理的实践吗？它是否改变了博物馆馆长的工作方式？对吧?

03:26
Has it affected this particular community and how they go about their DV life? Right? Hard to measure, right? It's not easy to measure, but it's something that politically.
它是否影响了这个特定的社区以及他们如何过家庭暴力生活？对吧?很难衡量，对吧？这并不容易衡量，但在政治上。

03:38
Makes a lot sense, right? Because you want your research funding, you want your university funding to ripple out right into wider society, right? So

there is, there are some.
这很有道理，对吧？因为你想要你的研究经费，你想要你的大学经费能够波及到更广泛的社会，对吧？所以有一些。

03:49
So we do variations about how we measure.
所以我们用不同的方法来测量。

03:53
To work at university students, obviously, right? Digital history does decently well in the impact metric, and so people are kind of encouraged to do some of that work.
在大学生中工作，很明显，对吧？数字历史在影响指标上做得很好，所以人们被鼓励去做一些这样的工作。

04:03
And to really think about some of that work as the design research project, yes, successful a digital history project can measure.
把这些工作作为设计研究项目，是的，成功的数字历史项目是可以衡量的。

04:12
Precisely. All right, you can think about it if you want to use this framework, research, teaching, impact.
精确。好了，如果你想用这个框架，研究，教学，影响，你可以考虑一下。

04:19
Right? Like quantitative, qualitative.
对吧?比如定量的，定性的。

04:22
I mean, they're very diverse, right? So digital history can be about research. So how do you find new research conclusions? How do you make new conclusions about the past? Right? So that's research.
我的意思是，他们非常多样化，对吧？所以数字历史可以是关于研究的。那么如何找到新的研究结论呢？你如何对过去做出新的结论？对吧?这就是研

究。

04:33
Digital history can be about the pedagogy, right? About how do you re envision the discipline? How do you teach the discipline in a new way that's responsive to the kind of data that we work as his historians.
数字历史可以是关于教学的，对吧？你对这门学科有什么看法？如何以一种新的方式教授这门学科，以回应我们作为历史学家所研究的数据。

04:44
Or you can also think about it in terms of impact. So the public history work of it, research, communication, history, communication, right? Defunking stereotypes, reshaping the way that we teach history in the wider.
或者你也可以从影响的角度来考虑。所以公共历史的工作，研究，交流，历史，交流，对吧？消除刻板印象，重塑我们在更大范围内教授历史的方式。

04:55
Community outside of the university, right? So that's impact. So how does it change other people and other communities?
大学以外的社区，对吧？这就是影响。那么它是如何改变其他人和其他社区的呢?

05:04
Does that give you a sense of Hollywood? Okay, yes, do you have an example of, like, how they measured it? Because I struggled a bit with But if there's no, like, objective, like standards, if it's not like uniform, how can we then?
这让你有了好莱坞的感觉吗？好的，你能举例说明他们是怎么测量的吗？因为我有点纠结，但是如果没有客观的标准，如果没有统一的标准，我们怎么能呢?

05:19
Measure it. And how can we, like, compare, like history?
测量它。我们怎么能比较历史呢?

05:23
As a work versus historian B work. It's tough because this is always the pressure. There's a tension right between metricization. How do you metricize something? How do you measure something right versus the thing in and of itself.
作为一项工作与历史学家B项工作。这很艰难，因为压力总是存在的。在度量化之间存在矛盾。你是如何度量事物的？你如何衡量一件事的正确性，而不是它本身。

05:36
Right? The bad Internet officer, practically speaking for this, in that context, in the UK context, they generally do case studies. So you write up a case study about the work that you've done or the thing that you've created.
对吧?糟糕的互联网官员，实际上是这样说的，在英国的背景下，他们通常做案例研究。所以你要写一个关于你所做的工作或你所创造的东西的案例研究。

05:49
Right? And then you collect evidence in terms of how people are using it, right? Whether it's qualitative or quantitative. And then you get a sense of across time.
对吧?然后你收集人们如何使用它的证据，对吧？无论是定性的还是定量的。然后你就有了时间上的感觉。

05:58
How wide reaching has its impact? How many people has it reached, and how much has it changed their practice? So you might talk to a curator, right? And ask, one month after, what are you taking from it? You still referring to it? Has it changed anything in the workplace.
它的影响有多广泛？有多少人接触到它，它对他们的实践有多大的改变？所以你可能会找馆长谈谈，对吧？然后问，一个月后，你从中得到了什么？你还在说吗？它改变了工作场所的任何东西吗？

06:12

Right six months later is an exhibition that's based on this method, or that's replicating this method, or that's absorbing some of the outcomes that the researcher has been.
六个月后是一个基于这个方法的展览，或者是复制这个方法，或者是吸收了研究人员的一些成果。

06:22
All right. And so it's quite qualitative in that sense, right? It's a lot of, sort of interviews, recording down, sort of feedback in a way, right? And documenting that impact.
好吧。所以从这个意义上说，这是定性的，对吧？有很多采访，记录下来，某种程度上是一种反馈，对吧？并记录这种影响。

06:34
Or looking at visitor numbers, e.g., if we do a collaboration, like we did a collaboration with the American Museum and Gardens in Buff, right? And what we're doing is we're looking at how people move.
或者看看参观人数，例如，如果我们合作，就像我们与美国博物馆和Buff的花园合作，对吧？我们正在做的是观察人们是如何移动的。

06:44
Moving around the exhibits, who are interviewing people to figure out how their thinking is getting shaped or affected by the content that we put out there.
在展览中走来走去，他们正在采访人们，以弄清楚他们的想法是如何被我们放在那里的内容塑造或影响的。

06:53
Right? And then getting back in touch with them months later to ask them about what they remember from it, right? So it's a lot of documentation work that goes into eventually writing out, like impact history.
对吧?几个月后再联系他们问他们记得什么，对吧？所以最终要写出来的是大量的文档工作，比如撞击历史。

07:05

It's not negligible, but it's kind of work that you need to do to make.
这是不可忽视的，但这是你需要做的工作。

07:14
Your stuff legible to the.
你的东西清晰可辨。

07:18
Under the University.
在大学之下。

07:23
Really.
真的。

07:25
Okay, so we can talk more about this. Because, I mean, it's an ongoing it's not a perfect model. I don't think it's a perfect model.
好吧，我们可以进一步讨论这个问题。因为，我的意思是，这是一个持续的它不是一个完美的模式。我不认为这是一个完美的模式。

07:35
But in many ways, it is a step in the right direction. In Singapore, there is no such thing. Oh shit.
但在很多方面，这是朝着正确方向迈出的一步。在新加坡，没有这样的事情。哦,狗屎。

07:44
None of it is in the major business. None of it's like that Anyways. No, no, not in Anus. Not really at the EMU level.
这些都不是我们的主要业务。反正都不是那样的。不，不，不是《肛门》。不是在欧洲货币联盟层面。

07:53
Or hiat, which is quite fascinating. No, but this doesn't exist.

或者其他，这很吸引人。不，但这根本不存在。

08:00
That's all I should say about it. Okay.
我要说的就这些。好吧。

08:06
And a question here if a document is scanned, right? And given meta data in the steel crime results.
这里有个问题如果文件被扫描了，对吧？鉴于钢铁犯罪结果中的元数据。

08:15
Intriguing question, and the answer usually is one of the research questions, right? Because what defines the primary source is really how you want to use it and how you're planning to use it.
有趣的问题，答案通常是研究问题之一，对吧？因为定义主要来源的是你想要如何使用它以及你计划如何使用它。

08:28
Right? Is your research question dependent on the digital medium itself, right? Does it matter that it's an image rather than the thing itself?
对吧?你的研究问题是否依赖于数字媒体本身？它是一个图像，而不是事物本身，这有关系吗?

08:36
If your research question is about the materiality of the thing you want to know about the paper, then digitizing an image of that paper makes no sense. It's not a promise source between.
如果你的研究问题是关于你想知道的关于论文的事情的重要性，那么数字化论文的图像是没有意义的。这不是一个承诺的来源。

08:47
But if interested in the words on the paper, the content of paper, which is, you know, doesn't really have any changes after you digitize it and sure, then it's a primary source for you.

但如果你对纸上的文字感兴趣，对纸上的内容感兴趣，你知道，在你把它数字化之后，它不会有任何变化，那它就是你的主要来源。

08:57
Right? So there is no catch, on answer to question. That really depends. Answer really depends on what your research question is.
对吧?所以这个问题的答案是没有陷阱的。那得看情况。答案取决于你的研究问题是什么。

09:05
Now, the thing about digital history and digital sentences that they have melody.
现在，关于数字历史和数字句子的事情是它们有旋律。

09:12
It's another data.
这是另一个数据。

09:13
Your chemical, right? You're looking at it.
你的化学药品，对吧？你正看着它。

09:16
You're looking at having, you're looking at collection manager.
你看到的是，你看到的是收款经理。

09:19
Right? We can't do the same thing anyway. In additional history, where we look at archives and terms, right? How they cateegorize, how they arrange, what does the arrangement of documents?
对吧?反正我们也不能做同样的事。在附加的历史中，我们看档案和术语，对吧？他们如何分类，如何安排，文件是如何安排的?

09:30
Order. Tell us about the person who bought the box here, right?

秩序。告诉我们是谁买了这个盒子，好吗?

09:36
Are we familiar with original order?
我们熟悉原始订单吗?

09:39
Okay. So when you go to an archive and you pick up, how many of you have taken out a box in the archive before?
好吧。所以当你去档案室拿起，你们中有多少人以前在档案室里拿过盒子?

09:49
Okay. So a few of you, right? What are some of the rules when you think?
好吧。你们中的一些人，对吧？当你思考时，有哪些规则呢?

09:57
A box, and Arthur always put it together.
一个盒子，亚瑟总是把它放在一起。

10:00
Sorry. Handle with care. Yes, correct. Very important. Typically, they'll ask you, they'll give you a bunch of like plastic cards and reference cards, and then instructions, generally, whatever document you take out, put a white piece of paper, like the heart sheet.
对不起。小心轻放。是的,正确。非常重要的。通常，他们会问你，他们会给你一堆塑料卡和参考卡，然后是说明，一般来说，无论你拿出什么文件，都要放一张白纸，比如心形纸。

10:14
Where you put it. So the idea is that, and you only give you one document at a time. So the idea is that it makes it very difficult for you to intentionally or accidentally be like, whoops, I put document back in the wrong order.
你放哪儿了。这个想法是，你一次只给你一个文档。所以它让你很难有意或无意地说，哎呀，我把文件放错顺序了。

10:23
So you preserved the order in which you came in before and after, you said.
所以你保持了你进来前后的顺序，你说。

10:27
So Gary, did you get it? Yes, but, but I really play our cards. I think I'm pretty less some our times. Do not enforce it so much.
加里，你拿到了吗？是的，但是，但是我真的很会玩牌。我觉得我比我们的时代少多了。不要强制执行这么多。

10:38
The best practice, the best practice is to put everything back in the order in which it came.
最好的做法，最好的做法是把所有东西放回原来的顺序。

10:45
Because the order can be really important sometimes. So imagine you are a prime minister, right? And you have a whole set of documents.
因为顺序有时候真的很重要。想象一下你是一位首相，对吧？你有一整套的文件。

10:55
Right? Letters, correspondents, briefings, whatever, right? And then you decide, at the end of the day, you're going to put them into your box, right? You're going to store them.
对吧?信件，信件，简报等等，对吧？然后你决定，在一天结束的时候，你要把它们放进你的盒子里，对吧？你要把它们储存起来。

11:04
Now, sometimes you might think, I'm going to arrange them because they come differently, or because of the topic, or because of, you know, a very specific idea of scheme in your mind, right? And so what activists want to do is you want to keep.
现在，有时你可能会想，我要把它们排列起来，因为它们来的不同，或者因

为主题的不同，或者因为，你知道，你脑子里有一个非常具体的方案，对吧？所以激进分子想要做的就是保持。

11:19
That order of the documents, pitch one, and then a letter, and then a briefing, and then a correspondent sheet, or whatever. And that's important because that's.
文件的顺序是这样的，第一份建议书，然后是一封信，然后是简报，然后是通讯表，或者别的什么。这很重要，因为。

11:29
Kind of metadata in another cell, right? The arrangement of the things in the box, the way it specially arranged, the way it's ordered, it just can be really, really important.
元数据在另一个单元格，对吧？盒子里东西的排列，特别排列的方式，排列的方式，都是非常非常重要的。

11:38
For the study of this person, example. So we.
比如对这个人的研究。所以我们。

11:42
Don't go in and shuffle the stuff in the box. This concept called Original Order. This is why we don't necessarily rearrange things, move boxes around, right? If you look at finding guys, they'll be very clear, right? This is box one.
不要进去把盒子里的东西弄乱。这个概念叫做原始秩序。这就是为什么我们不需要重新排列东西，移动盒子，对吧？如果你想找男人，他们会很清楚，对吧？这是盒子1。

11:57
Box two, box three, box four. And those boxes arrive in the order in which they will first kind of catalog.
盒子二，盒子三，盒子四。这些盒子是按顺序到达的它们首先会分类。

12:03
So they've kind of taken a snapshot of that, and that was really, really.
所以他们只是拍了个快照，那真的是真的。

12:08
Okay.
好吧。

12:08
So that's metadata in the most traditional sense, right? It's kind of the stuff that sits on a systems level beyond the individual page.
这就是最传统意义上的元数据，对吧？它是一种超越单个页面的系统级别的东西。

12:18
What the digital industry does is that it kind of makes it a lot more obvious to you that these, these over up constructions do exist, and you can analyze them and then offer themselves as a primary source.
数字产业所做的是，它让你更明显地看到这些，这些重叠的结构确实存在，你可以分析它们，然后把它们作为主要来源。

12:30
If you wanted to, right? You could have a research question again, right? What is your research question?
如果你想的话，对吧？你可以再问一个研究问题，对吧？你的研究问题是什么？

12:38
Okay. I know that was kind of a new concept, and it's a bit different for what we talked about. Are we okay and good to go? Can you agree if we're good to go? Give me a raise.
好吧。我知道这是一个新概念，和我们之前讨论的有点不同。我们可以走了吗？你能同意我们可以走了吗？给我加薪吧。

12:47

Two, you have a, okay. Yes, you are not talking. Okay. What do you understand from what you understand?
二，你有一个。是的，你没有说话。好吧。你从你所理解的东西中理解了什么？

13:01
Oh, what is something that?
哦，那是什么？

13:07
I'm sorry. I'm just registering still on the idea of method data, okay, as primary sources, because.
我很抱歉。我还在注册方法数据的概念，作为主要来源，因为。

13:17
My thought process right now is that if you're ever having like, a project and you want to use method data as primary sources.
我现在的想法是，如果你有一个项目，你想使用方法数据作为主要来源。

13:27
It's only, can be a primary sources. It cannot really make it also, like a secondary sources, like.
它只能是一个主要的来源。它不能真的使它也，像一个次要来源，像。

13:33
Because you don't have a lot of sources to actually, you do like some project.
因为你没有很多资源，你确实喜欢一些项目。

13:36
Like the better, more of it to actually to investigate what you want to find out of it.
越多越好，去调查你想要发现的东西。

13:42

Goes back to your question. You might have several associated questions in your research project, one of which might use the meta data as a prime resource, and one of which might Use.
回到你的问题。在你的研究项目中，你可能有几个相关的问题，其中一个可能使用元数据作为主要资源，另一个可能使用。

13:55
As a secondary source.
作为次要来源。

13:57
Like, can the meta data we use can also be a second resource, because, after all, it's a lot like.
比如，我们使用的元数据也可以作为第二资源，因为，毕竟，它很像。

14:06
Should use it as a secondary You will use it as a secondary source. If it gives you information that's important, like E.G., what year was it created?
应该把它用作辅助资料你将把它用作辅助资料来源。如果它给了你重要的信息，比如，它是哪一年创建的?

14:15
That's important. You are not necessarily using it as the object of your investigation, but you're using it to inform your.
这很重要。你不一定要把它作为你调查的对象，但你要用它来告诉你。

14:23
Source analysis, e.g., right? But as a primary source, it would be something like, how many books were published in across these ten years, and which ones, right? So you're using that as your analysis.
源分析，对吧？但作为主要来源，它应该是这样的，在这十年里出版了多少本书，哪些书？所以你用这个作为你的分析。

14:37
Right the year of publication. That piece of metadata is used as a way as

your primary source, right? Is your focus of your analysis.
就是出版的年份。那块元数据被用作你的主要来源，对吧？是你分析的重点。

14:46
Because your question is, how many books were published? All right, does it make sense? But if I want to elaborate more on this finding, can I put under footnote as a secondary sources.
因为你的问题是，出版了多少本书？好了，明白了吗？但是如果我想详细说明这个发现，我可以把它作为次要资料放在脚注下面吗？

14:58
Like, after, okay, e.g., you use this meta data, and then later on, you use this piece of information as a priming source. But because the method there is huge, like, there's a lot of more information. So can you use the other information as like the secondary source? of course.
比如，你用这个元数据，然后，你用这条信息作为启动源。但是因为这个方法很庞大，有很多更多的信息。那么你能把其他信息作为辅助来源吗？当然可以。

15:15
Use the information as you need, right? Ultimately, the question is, what is your research question, right? And how do you use that information?
根据需要使用信息，对吧？最终的问题是，你的研究问题是什么？你如何使用这些信息？

15:23
There's a lot of information that we don't use because we decided it's not relevant to the question. And then the ones that you do use, right? Then the question really is, is this the focus of the question, or is this incidental but useful in helping you Contextualize.
有很多信息我们没有使用，因为我们认为它们与问题无关。然后是你用的那些，对吧？接下来的问题是，这是问题的重点吗，还是说这是偶然的，但对你的情境化有帮助。

15:36
That sauce that you're looking at. So it's a respective kind of question in that sense.
你看到的酱汁。所以从这个意义上说，这是一个各自的问题。

15:44
Okay.
好吧。

15:44
Okay.
好吧。

15:49
Again, keeps doing that. That's fine. But, you know, this is a good analytical point to kind of.
继续这样做。这很好。但是，你知道，这是一个很好的分析点。

15:57
Make, and to clarify, thank you.
Make，澄清一下，谢谢。

15:59
Aren't there ways of mass analyzing sources with new ones? Is it possible to do distant reading, while flattening that data with more?
难道就没有办法用新的资源进行大规模分析吗？是否有可能在进行远程读取的同时，用更多的数据将数据扁平化？

16:11
I'm not much of mattering. Is the toll I would use here with any.
我无足轻重。是我在这里使用的收费标准。

16:15
You ask this question? Can you explain a little bit? I know you. All right here. I think it's more just like when it comes to.

你问这个问题？你能解释一下吗？我了解你。好了。我觉得这更像是。

16:26
To mass analyzing or distant reading, right? I guess a concern is that sometimes the historical question, or the kind of analysis you who might risk becoming very, like reductionist or very Like.
大量分析或远程阅读，对吧？我想一个问题是，有时候历史问题，或者你可能会冒着成为简化论者的风险的那种分析。

16:37
Deterministic, like, because, like, causal, logical, like or X equals to Y, which oftentimes like, I think for certain historical research reads it of a lot of, like.
决定论，比如，因为，比如，因果关系，逻辑，或者X等于Y，我认为在某些历史研究中，它经常被解读为。

16:47
New answers. So it's like, I guess the question is just like, is it possible to do this in reading without, like, reducing the data to just like?
新的答案。所以，我想问题是，有没有可能在读取的时候不把数据简化成这样?

16:55
A quantitative number of figure. So I guess this one is kind of without Latin data, right? Okay.
数字的数量。所以我猜这个没有拉丁数据，对吧？好吧。

17:05
It's an important concern, right? Because if we are reducing corpuses to numbers, digits calculations.
这是个很重要的问题，对吧？因为如果我们把语料库简化为数字，数字计算。

17:13
Then does it strip a lot of the context that we find is really important as

science? And that says, yes, it does. The question is, how would you use that?
那么它是否剥离了很多我们认为作为科学非常重要的背景？这说明，是的，它有。问题是，你会怎么用它？

17:24
Or how would you contextualize that number? How would you explain that number in a way that will have a free analysis? So is it important that you can calculate how central a person is to everyone else, right?
或者你如何理解这个数字？你如何用一种自由分析的方式来解释这个数字？所以计算出一个人对其他人来说有多重要，对吧？

17:37
You will see this new relation analysis, right? Because there are ways of numericizing, right? Of metricizing whether someone sits in the middle of the network or whether someone's in the corner of the network.
你们会看到这个新的关系分析，对吧？因为有数字化的方法，对吧？衡量某人是处于网络的中心还是处于网络的角落。

17:48
You can attach a number to that right. Numbers can be important if you want to provide some justification for saying, I want to talk about this person, rather than that person.
你可以在右边加上一个数字。如果你想要证明我想谈论这个人，而不是那个人，数字可能很重要。

17:57
That can be a useful way of sort of putting it into copy of research methodology, right? So, but they might mean nothing. That's my concern, as is like if someone who's like me need to exercise that with.
这是一种将其放入研究方法副本的有用方法，对吧？所以，但它们可能没有任何意义。这是我担心的，就像像我这样的人需要和我一起锻炼一样。

18:12
Like using distant reading, something might just end up like, flattering to

make some, like random, deterministic causal logic, which doesn't make sense. Or it's like, basically, you go so far into distant reading that you basically like lose.
就像使用远读，有些东西最终可能会像，讨好一些，像随机的，确定性的因果逻辑，这是没有意义的。或者基本上，你读得太远了，你基本上就像迷路了一样。

18:25
I'll get that any other day. Everything in history is about my second I want to say argument.
我改天再去拿。历史上的一切都是关于我的第二个论点。

18:29
So it is very possible for people for the trouble just generating numbers, right? But ultimately, as a historian, you have to think, why do am I doing this analysis? Why am I running this company.
所以人们很有可能遇到的麻烦只是生成数字，对吧？但最终，作为一名历史学家，你必须思考，我为什么要做这个分析？为什么我要经营这家公司？

18:40
What am I getting out of it then? What actually help me do with the research or understanding that source piece a bit better, right?
那我能得到什么呢？什么能帮助我更好地进行研究或者更好地理解原始材料？

18:46
Um.
嗯。

18:47
So that's always, that's why we always begin with, what is the research question, what are you trying to achieve? What are you trying to measure, right? What is the data you are trying to understand more.
所以这就是为什么我们总是以，研究问题是什么，你想要达到什么开始？你想测量什么，对吧？你想要了解的数据是什么？

18:58
So that you can figure out whether the output at the end is, makes any sense. All right.
这样你就能知道最后的输出是否有意义。好吧。

19:04
Or will actually help you.
或者能帮到你。

19:05
This is why we always go back to this.
这就是为什么我们总是回到这里。

19:10
Are you working your sources? What is the primary source? What is the secondary source?
你在调查你的线人吗？主要来源是什么？什么是次要来源?

19:15
Okay. When it comes to distant reading, there's some sort of built, in ways of making sure you reading the.
好吧。当涉及到远距离阅读时，有一些固有的方法来确保你阅读。

19:27
On tax, and usually for taxes called the case what comes before and what comes after the search term, or the term that you are looking at. So collocation can be really, Really.
在税收方面，通常在税收方面被称为搜索词之前和之后的情况，或者你正在查看的术语。所以搭配可以是真的，真的。

19:37
Good in that way of making sure you still look at the context and how is embedded, right?
这样做很好，确保你仍然关注上下文以及它是如何嵌入的，对吧?

19:44
Sometimes you can look at the Okay, I'm not going to talk about this point yet because I'm going to talk about AI.
有时你可以看看，好吧，我现在不打算讨论这一点，因为我要讨论人工智能。

19:51
AI is essentially a relational work, right? It's understanding every word in the context of other words.
人工智能本质上是一项关系工作，对吧？它是在其他单词的上下文中理解每个单词。

20:00
It's looking at what comes before the word happy, and what comes of the word happy. Then millions and millions and millions of examples, then they'll kind of guess.
它关注的是“快乐”这个词之前的内容，以及“快乐”这个词之后的内容。然后数以百万计的例子，然后他们就会猜测。

20:10
What you're looking for, right? So essentially this is text analysis, right? It's an algorithm that understands text real work. They can predict text row. It's it's like autocomput.
你在找什么，对吧？所以本质上这就是文本分析，对吧？这是一个能理解文本的算法。它们可以预测文本行。就像自动计算一样。

20:21
Does that really, really well. So in some ways, it's like collocation, right? Happy can be used in the.
做得非常非常好。所以在某种程度上，这就像搭配，对吧？Happy可以用在。

20:29
Really authentically. It can also be used, E.G., in really sarcastic place,

right? And so the words around the word happy in the.
很真实。它也可以用在讽刺的地方，对吧？于是周围的词就有了快乐这个词。

20:39
I think we would be like joy, right, or sunshine, right. Whereas the ones happy, using really sarcastically, would be like.
我想我们就像快乐，对吧，或者阳光，对吧。而那些快乐的人，用讽刺的语气，会说。

20:47
Ha, ha, to stop, and something like that, right? And so the web of words that surround that happy look different from the web of goods surround the good happy.
哈哈哈，停止，诸如此类，对吧？所以围绕幸福的词语网和围绕幸福的商品网看起来是不同的。

20:57
Authentic. And so the AI kind of learns that right, the same way that we as humans would look at the co locations of the word happy and kind of figure out, you know, they account two webs of words. They're two sort of separate clouds of words That.
真实的。所以人工智能学会了这一点，就像我们人类会看到“快乐”这个词的共同位置，然后弄清楚，你知道，它们是两个词网。它们是两种不同的词云。

21:12
Surround this use of happy So the air does that really, really quickly, because it's good at that. That's what it's trained to do.
所以空气很快就能做到这一点，因为它很擅长这个。这就是它被训练来做的。

21:19
We can, in some ways, use it to help us do some of this work faster and more efficiently than we can.

在某些方面，我们可以用它来帮助我们更快更有效地完成这些工作。

21:27
But as historians, we can't still want to take back in the context. The problem with AI is hyped a lot of the ground.
但作为历史学家，我们不能还想在当时的背景下收回。人工智能的问题在很多地方都被夸大了。

21:34
Necessary.
必要的。

21:36
There are ways around it. We can talk about it in the week of machine learning.
有很多方法可以绕过它。我们可以在机器学习的那一周讨论这个问题。

21:40
Talk about that, okay, but that's how we keep the context collocations usually, but that's what we do. The other method that I kind of skipped over because I want to talk about the address, but the other method is to look at the meta data.
谈论这个，好吧，但这就是我们通常保持语境搭配的方式，但这就是我们所做的。另一个方法我略过了因为我想讲地址，另一个方法是看元数据。

21:55
So context is not necessarily just within the source itself, but the metadata that's in the sauce, right? So looking at the year, looking at the author, the specific author, right? This author likes to use the word happy, but they only use it in.
所以上下文不一定只是在源本身，而是在酱汁中的元数据，对吧？看年份，看作者，看具体的作者，对吧？这位作者喜欢用“快乐”这个词，但他们只在……

22:07

In one particular sense, in the release, acoustic sense they never had, you have actually got set All right. And then that can be a useful indicator of how this work, or predictor of how this was.
在一个特殊的意义上，在释放中，在他们从未有过的声学意义上，你实际上已经设置好了。然后这可以作为一个有用的指标来说明它是如何工作的，或者预测它是如何工作的。

22:17
So title author, language like which language is written in, right? E.G., there's some words have regional ones, right? So.
所以标题作者，语言比如用哪种语言写的？例如，有些词有地域性，对吧？所以。

22:31
I can't remember there was a football team that went to Uganda and did really, really badly. And now the name of that football team just means terrible, right in Uganda.
我不记得有一支足球队去了乌干达，结果踢得非常非常糟糕。现在这支足球队的名字在乌干达的意思是“糟糕”。

22:41
So if you look at a Ugandan context, I think it's Lester or something. If you look at that, like, if you've done the Lester, right? I don't know what it's correct. If you've done the Lester, then if you've done something detail.
所以如果你看一下乌干达的背景，我想应该是莱斯特之类的。如果你看这个，如果你做过莱斯特，对吧？我不知道什么是正确的。如果你做过莱斯特，那么如果你做过一些细节。

22:51
Like you've got zero. All right, in that context, in the Ugandan English corpus that will have that.
就像你一无所有一样。好的，在这种情况下，在乌干达英语语料库中会有这个。

22:58

Context, right? So just begin the language for the source. The metadata can maybe help you.
背景下,对吧?那么就开始为源语言。元数据也许能帮到你。

23:04
Understand how and contextualize how the world is used.
了解世界是如何被使用的。

23:09
What's the difference between these two links? These are the two readings for this week. What's the difference?
这两个链接有什么区别？这是本周的两个阅读材料。有什么区别?

23:22
One brings you to the journal website. You don't bring you directly to the file.
一个带你到期刊网站。你不能直接带你去看档案。

23:31
How do you tell that links? EPDF Four. Oh, this one. Four.
你如何判断链接？EPDF 4。哦，这个。四。

23:41
Okay, that's, that's a good point. I bridge it. I really little forwarded in the landing page rate with each you know.
好的，这是一个很好的观点。我架桥。我真的很少在登陆页面上转发你知道的每一个。

23:47
Okay, good spot, but not no one else looking for Or should.
好吧，不错的地方，但不是没有人在找或者应该找。

23:50
I have some problems.
我有一些问题。

23:54
Accessing it, so I've changed it based on the lip proxy, anus. So so you enter via Anuss and then work.
访问它，所以我根据嘴唇代理，肛门改变了它。所以你通过Anuss进入，然后工作。

24:02
All right. Can you explain what that is?
好吧。你能解释一下那是什么吗?

24:04
Proxy server, right?
代理服务器，对吧?

24:11
So the difference here is that this is the dot com, and it slash whatever the link is here. It's a dot com, dot lit proxy, one dot, any.
不同之处在于，这里是。com，这里是斜杠。它是。com。lit proxy, 1。any。

24:21
What it means.
这意味着什么。

24:24
Is that if you are outside of campus and you press this link, you'll ask you to log in using your US ID, right? And it will grant you access to what the library has subscribed to.
如果你在校外，你点击这个链接，你会要求你用你的美国身份证登录，对吗？它将允许你访问图书馆所订阅的内容。

24:35
Right? It won't ask you to log.
对吧?它不会要求你登录。

24:41
Again. And in my aspect, it forgets.
再一次。在我看来，它忘记了。

24:45
Right? And so what you can do is you can do what finished it, which is to add in this part, in the front here.
对吧?你能做的就是你能做的就是把前面这部分加进去。

24:53
Between the table W and.
在表W和之间。

24:59
Yes, because after the entity is giving this one here is a dash, and that one here is thought. Now, if you don't want to do it manually.
是的，因为在实体给出这个之后这里是破折号，这里是思想。现在，如果你不想手工做。

25:09
Can you have?
你能吃吗?

25:10
And it will give you a bookmark that you can see in Java script, which will do it automatically for you.
它会给你一个书签，你可以在Java脚本中看到，它会自动为你做。

25:19
So terrible. So if you're using the Peril, if not, you can use this link, and it will give you.
那么可怕。所以如果你在使用危险，如果没有，你可以使用这个链接，它会给你。

25:29
The quote for it. Okay, one more point. Yes, elzevia doesn't really work. Recently, it gives you an extra capture challenge.
它的报价。好吧，还有一点。是的，艾赛维亚不怎么管用。最近，它给了你一个额外的捕捉挑战。

25:38
Of any bills. Okay, so, but if you do it through the annual website for the Journal.
任何账单。好吧，但是如果你通过《华尔街日报》的年度网站。

25:44
Key works. So I think I think there's some such things that are one problem.
关键的工作。所以我认为我认为有一些这样的事情是一个问题。

25:49
So digital data, it's not necessarily seamless. What Martin is saying is what you can do is you can go to the.
所以数字数据不一定是无缝的。马丁的意思是你可以做的是你可以去。

25:59
The library's discovery portal, and either type in the title of the journal article, or look for the journal itself.
图书馆的发现门户，或者输入期刊文章的标题，或者查找期刊本身。

26:06
Then let's see if I want, if I want a different.
然后我们看看，如果我想要一个不同的。

26:11
Yes, you can. Yes, except, I will say, this seems to be having an issue recently.
是的，你可以。是的，不过，我想说的是，这似乎最近出了点问题。

26:21

So what you can do is you can use Google Scholar, find the Journal article you're looking for. Go on to the page. Try using the top key bookmark.
你可以使用谷歌Scholar，找到你想要的期刊文章。翻到下一页。尝试使用顶部键书签。

26:30
Right? I'll put my first.
对吧?我先写我的。

26:31
That doesn't work, go into.
这不行，进去吧。

26:34
The Discovery Portal for US libraries, such for the Journal for the.
发现门户为美国图书馆，如为《华尔街日报》。

26:39
And then go to the sentence.
然后看句子。

26:45
All right.
好吧。

26:45
So anyone have any questions about this? This is kind of a little bit skill thing that I know. If you've not done this for a while, you might not know this Exists.
有人对此有什么问题吗？这是我所知道的一点技巧。如果你有一段时间没有这样做，你可能不知道这个存在。

26:54
But we do. I do sometimes give you the right link so that I give you the non proxy link, right? Which I know has caused some.

但是我们有。我有时候会给你正确的链接给你非代理链接，对吧？我知道这引起了一些。

27:03
Constellation.
星座。

27:04
Okay. So good learning opportunities in this as well, in classes.
好吧。在课堂上也有很好的学习机会。

27:11
Okay.
好吧。

27:14
I had a question here. How do you map uncertain and mobile historical species without making them here as fixed boundaries? Are a vague, epistemological question and very good intuition, because we are going to talk about that.
我有个问题。你如何绘制不确定的、可移动的历史物种，而不把它们作为固定的边界？是一个模糊的，认识论的问题和很好的直觉，因为我们会讨论这个问题。

27:29
Exactly in a few minutes, but also, we'll come back to this photo, especially last week.
几分钟后，我们还会回到这张照片，尤其是上周。

27:33
About visualizations because half about visualizations.
关于可视化，因为一半是关于可视化。

27:38
So part this question.

所以把这个问题分开。

27:41
How can I use approaches covered right in the course, in a way that could work with materials that are maybe not in English or in materials languages?
我该如何使用课程中涵盖的方法，在非英语或非材料语言的材料中发挥作用?

27:52
Cultural products from more obscure traditions in groups. Great question, right? Because the tools that exist tend to be written for.
文化产品来自更模糊的传统群体。问得好，对吧？因为现有的工具往往是为之编写的。

28:01
English language.
英语语言。

28:03
Markets, almost applicable, right?
市场，几乎适用，对吧?

28:05
This follows digitalization methods. Very digitalization tends to be focused on English language stuff, or most use language, right? So nowadays, E.G., french, german, but also is Asian.
这遵循数字化方法。非常数字化倾向于关注英语语言的东西，或者大多数使用的语言，对吗？所以现在，例如法语、德语，也是亚洲语。

28:18
Which is very slow. Chinese, E.G., is a focus Japanese.
速度非常慢。例如，汉语是日语的重点。

28:25

Okay.
好吧。

28:26
But there are a lot of other languages that don't have the attention that it deserves. So as digital historians, what we do is we try to look for tools that we.
但还有很多其他语言没有得到应有的重视。作为数字历史学家，我们要做的就是寻找工具。

28:37
And see whether we can be published in.
看看我们能否在。

28:39
Right? There's some work looking at non English, non legendscript languages as images the coral as there are people.
对吧?有一些研究将非英语，非传奇文字作为图像珊瑚就像人一样。

28:47
Right? And then use image recognition software to do that work.
对吧?然后使用图像识别软件来完成这项工作。

28:52
So that's kind of a fun here, right? So for us to do this, audience is about how do you adapt a tool, or similar tools, right? You learn about blast in the cell you're reading, right?
这很有趣，对吧？所以对于我们来说，观众是关于你如何调整一个工具，或者类似的工具，对吧？你是在牢房里学习爆炸的，对吧?

29:03
How do you use other sort of workflows and other applications and you have repurpose it? What's?
你如何使用其他类型的工作流和其他应用程序，你如何重新利用它？是什么？

29:09
Right?
对吧?

29:10
There's a lot of parallel thinking, natural thinking, that needs to happen, right? There's a lot of reading, a whole lot other people are doing, so you can figure out whether it might work in your context, right? There's a lot of imagination that's involved.
有很多平行思考，自然思考，这需要发生，对吧？有很多阅读材料，很多其他人都在做，所以你可以弄清楚它是否适用于你的环境，对吧？这里面有很多想象力。

29:21
It's not necessary, straightforward, even within data sets of the same language they might construct quickly be.
它不是必要的，直接的，即使是在相同语言的数据集中，它们可能很快就会被构建起来。

29:29
That might be to treat it differently.
这可能是为了区别对待它。

29:30
That's a challenge that we all kind of independent if you're working across.
这是我们每个人都要面对的挑战。

29:34
Thanks.
谢谢。

29:35
So, yes, so either. Usually we start by looking to see whether anyone's done similar work. If they're done similar, great work of that, right? If they have not, then you kind it to the start.

所以，是的，两者都可以。通常我们会先看看是否有人做过类似的工作。如果他们做得很相似，那就很棒了，对吧？如果没有，那就从头开始。

29:47
Stretch.
拉伸。

29:50
Number two.
二号人物。

29:51
There always is that. Okay. So the discovery and the design work is it's going to take time and effort, and it's not necessarily going to produce the stuff that you're expected to use.
这种事总是有的。好吧。所以发现和设计工作是需要时间和精力的，它不一定会产生你期望使用的东西。

30:00
Who's going to give up?
谁会放弃呢?

30:01
Who's the name or you, why you work on this question?
你是谁，你为什么要研究这个问题?

30:05
Right? So then that's what gets up. Or do we go to the stuff that's really there that's really created?
对吧?这就是得到的结果。还是我们去找那些真正存在的，真正被创造出来的东西?

30:12
The music tools have already out there.
音乐工具已经存在了。

30:14
So again, we see that the inequality in terms of excess and ease of use shapes. Research.
所以，我们再一次看到了过剩和易于使用形状的不平等。研究。

30:24
Right, which is researching particles because of the things that we reward as a system for this industry.
对，就是研究粒子因为我们奖励这个行业的系统。

30:31
How's everyone doing? Very good to go.
大家都好吗？很好。

30:38
Great for me to fall.
摔倒对我来说太好了。

30:42
But handle inconsistent metadata from different databases, and that's tough, right, because they're all structured somewhat differently most of the time.
但是处理来自不同数据库的不一致的元数据是很困难的，对吧，因为大多数时候它们的结构都有些不同。

30:56
We usually do it manually right now. Basically, maybe feed it the meta data into your gen AI and get them to make some sense of it.
我们现在通常是手工做的。基本上，你可以将元数据输入到你的gen AI中，并让他们理解它。

31:06
Right? But ultimately, you still need to verify. So maybe.
对吧?但最终，你还是需要验证。所以也许。

31:14
Okay.
好吧。

31:14
But it might give you a direction to focus your attention to. That's always a good part.
但它可能会给你一个集中注意力的方向。这总是一个好的部分。

31:18
Um.
嗯。

31:20
But generally, you kind of just need to understand the scope of things.
但一般来说，你只需要了解事物的范围。

31:25
Is it just a few records affected by differences? And is it a?
仅仅是一些记录受到差异的影响吗？它是?

31:31
Systematic thing, right? Is it something that after 2014, order records look like that? Before 2014? For the records take another form, right? Then the question is, is it important for you?
系统的东西，对吧？2014年以后，订单记录是这样的吗？在2014年之前?以另一种形式记录，对吧？那么问题是，这对你重要吗?

31:41
To reconcile this inconsistency.
为了调和这种不一致。

31:43
Right? If you are looking at an analysis 2013 to 2015 and 2014 is kind of

where things change. Are you happy to shift your date of your analysis to?
对吧?如果你看一份分析2013年到2015年，2014年是情况发生变化的一年。你愿意把你的分析日期改到?

31:56
Before or after, right? Because you save you a lot of work.
之前还是之后，对吧？因为你节省了很多工作。

32:00
So understanding the nature of the inconsistency, and then figure out what it is worth with the train keyhead up.
所以理解不一致的本质，然后计算出它的价值。

32:09
Problems. You don't have enough here.
问题。你的钱还不够。

32:16
Right? You only have stacked, and then you've decided, okay, this is what my time is.
对吧?你只会堆叠，然后你决定，好吧，这就是我的时间。

32:22
Go back to your research question. What is it?
回到你的研究问题。这是什么?

32:31
We need this to work with these two inconsistent sets of data.
我们需要这个来处理这两组不一致的数据。

32:35
All right. Last one. We've been using some very Singapore specific topics. That's true, right, mandula. I know that, and I will, and I will try and remember explain them.
好吧。最后一个。我们一直在使用一些新加坡特有的话题。没错，是曼陀

罗。我知道，我会的，我会努力记住并解释它们。

32:54
Whatever they mean, just the context that, if you do bring up a single example, it'll be useful to explain the context of that for our friends, for not many of them.
不管它们的意思是什么，只是上下文，如果你举出一个单独的例子，这将有助于向我们的朋友解释上下文，对他们中的很多人来说。

33:02
Okay.
好吧。

33:02
Correct digital history products, right? I know some of you have sent me what you're planning to work on, an indication.
正确的数字历史产品，对吧？我知道你们中的一些人已经把你们的计划发给了我，这是一种暗示。

33:11
Please try and confirm with me the choice of your topic, your approach, and your data, right?
请试着和我确认一下你的选题，你的方法，你的数据，对吗?

33:17
By Wednesday. I know a couple of you are new, so you have a different deadline for that, but idea is you have fixed something in your mind that you can start exploring, right? Otherwise, by week six, you might end up till the hydro curve, right?
到周三。我知道你们中的一些人是新来的，所以你们有不同的截止日期，但我的想法是，你们已经在脑海中确定了一些可以开始探索的东西，对吗？否则，到第六周，你可能会到水力曲线，对吧?

33:32
So all I need to hear from you is the general topic of the history that you're

going to look at, right? The approach that you might be taking, whether it's text analysis or spatial or math, or whether you're trying to experiment with gen AI.
所以我只需要从你们那里听到你们将要看的历史的总体主题，对吧？你可能采取的方法，无论是文本分析、空间分析还是数学分析，或者你是否在尝试使用gen AI。

33:45
Or whether you're trying to work with relational analysis, you know, network analysis, right? Take one topic approach from the syllabus, right?
或者你是否在尝试使用关系分析，网络分析，对吧？从教学大纲中选取一个主题的方法，对吧?

33:55
Okay. So area, historical topic, or area, the approach, the method. And then lastly, the data that you want to work with.
好吧。因此，区域，历史主题，或区域，方法，方法。最后，你要处理的数据。

34:03
Right? Is it a corpus of texts? Are you looking? Are you looking at a set of factors? Are you looking at meta data from a particular archive, right? Are you looking at special data from a specific area or country or local region.
对吧?它是文本的语料库吗？你在看吗？你是在考虑一系列因素吗？您正在查看来自特定存档的元数据，对吗？您是否正在查看来自特定地区或国家或当地地区的特殊数据。

34:17
What is it that you want to just do? You don't need to have done it yet, but you need to identify what we are, so I can tell you whether it makes sense.
你想做的是什么？你不需要已经做过了，但你需要确定我们是什么，这样我才能告诉你这是否有意义。

34:25
Okay. So Wednesday, 06:00 p.m., send me an email, let me know the three

things.
好吧。周三下午6点，给我发邮件，告诉我这三件事。

34:36
If you have questions, come look for me. Come talk to me. You can sense, check what you're thinking about.
如果你有问题，来找我。来和我谈谈。你可以感知，检查你在想什么。

34:45
All right. So.
好吧。所以。

34:51
This is what we're going to talk about. We're going to talk a little bit about interdisciplinarity.
这就是我们要讨论的。我们要讨论一下跨学科。

34:58
And digital history, right? Um, wait.
还有数字历史，对吧？嗯,等。

35:02
Okay, we're going to talk a little bit about what it means for the theory, and we're going to talk a little bit about what it means for the practical nature of Doing.
好的，我们会讨论一下它对理论的意义，我们会讨论一下它对实践本质的意义。

35:13
What it means when you're looking at it in the disciplinary space.
当你从学科的角度来看它意味着什么。

35:17
And then I know, I think we take a break for this, and then we talk about research practices and our habits and obligations that come along with

your position as a researcher at a university.
然后我知道，我想我们休息一下，然后我们谈谈研究实践，我们的习惯和义务，作为一名大学的研究人员。

35:29
Which is very specific and has a context, it brings.
这是非常具体的，有一个背景，它带来。

35:33
That group identity impacts the rules that the communities that you work with will think about you, whether you like it or not, right?
这种群体认同会影响你工作的群体对你的看法，不管你喜不喜欢，对吧?

35:44
But just to be aware of that position.
但是要注意这个位置。

35:47
And how it might affect the ways that you can research outside.
以及它会如何影响你在外面进行研究的方式。

35:52
And that's really for us to rethink about how we can.
这真的需要我们重新思考如何才能。

35:58
That will be successful.
这将是成功的。

36:00
Okay, I promised to very quickly run through the approaches again, I know we did this last week, but we have a couple of new students. So just run through really quick.
好了，我答应过很快地再过一遍这些方法，我知道我们上周做过，但我们有几个新同学。快速地过一遍。

36:17
What all these means. Now, remember that I'm going to wait to hear from you guys what your topics are for your research projects. And this means I will.
这一切意味着什么。现在，记住，我会等着听到你们的消息，你们的研究项目的主题是什么。这意味着我会的。

36:25
Shape some of the orders of the later ones. So the text analysis is definitely happening next week, right? We have a workshop with Chris Hawkin at Gale next week. Special analysis is definitely week five, after, which is week six, which is our research project presentation, right? So this.
塑造后面的一些顺序。所以文本分析肯定会在下周进行，对吧？下周我们要和克里斯·霍金在盖尔开个研讨会。特别分析肯定是第五周，之后是第六周，那是我们的研究项目报告，对吧？所以这。

36:41
Going to present a sense of how you're getting on with the data and the research and the approach.
展示一下你是如何处理数据，研究和方法的。

36:46
This week six. So these are all after the research week, right? And that order might shift based on what everyone's doing, right?
本周是第六周。这些都是在研究周之后，对吧？这个顺序可能会根据每个人的行为而改变，对吧?

36:56
The more popular ones are put earlier, and the less popular ones are put later. Doesn't mean the less important. It just means that it helps more people along. But if you need help, you doing a topic that comes later.
越受欢迎的放得越早，越不受欢迎的放得越晚。不代表不重要。这只意味着它能帮助更多的人。但如果你需要帮助，你可以做一个主题。

37:07
Come talk to me or do the readings right, and then let me know if you need additional.
来找我谈谈，或者把阅读材料做好，如果你需要额外的内容，请告诉我。

37:12
Okay.
好吧。

37:14
Yes, this week, is there a software you need to prepare? No, it's a online tool. Oh, okay. Just make sure you can work in I'll send around instructions. So just checking to see the instructions that the same.
是的，这周你需要准备一个软件吗？不，它是一个在线工具。哦,好的。确保你能工作，我会给你发指令的。检查一下说明是不是一样的。

37:27
All right. So this is the system, right? It's called Gill Digital Scholarship. That okay.
好吧。这就是系统，对吧？它被称为吉尔数字奖学金。那好吧。

37:35
Text analysis can make something work. You can have frequencies work.
文本分析可以使某些东西发挥作用。你可以让频率工作。

37:40
Are looking at.
都在看。

37:41
Where the wed would sit next to each other.
新婚夫妇坐在一起。

37:44
Like I said, look up for craft instructions. There will be a short, sort of

paragraph just to make sure that you can log into the system and you can try out, because we'll be working with some corpuses and some tools in the digital scholarship.
就像我说的，查查工艺说明。会有一个简短的段落来确保你们可以登录系统并进行尝试，因为我们会使用一些语料库和一些数字奖学金中的工具。

37:58
So that's next week, special analysis, getting information from old maps, historical maps, and then representing the information.
这就是下周的特别分析，从旧地图，历史地图中获取信息，然后表示这些信息。

38:10
In the news of.
在...的新闻中。

38:11
The quick math.
简单算算。

38:17
Machine learning. I suspect what we'll do is we'll look at AISS research, right? How do you use AI to help you look to?
机器学习。我想我们要做的是看看iss的研究，对吧？你如何使用人工智能来帮助你看？

38:28
Purpose in a way that it's just marking sounder, then the general vehicle can get.
目的是在某种程度上，它只是标记声音，然后一般车辆可以得到。

38:36
We will talk about citizen science methods. How do you ask the public to help you with doing some of the transcription work? Usually?
我们将讨论公民科学方法。你如何要求公众帮助你做一些转录工作？通常？

38:45
Or sort of identifying things on maps, which is what we did also.
或者在地图上识别一些东西，这也是我们所做的。

38:50
Visualizing data just once.
只可视化一次数据。

38:55
Important. It is very important. But how do you?
重要的。这是非常重要的。但是你怎么知道呢?

39:00
Visualize that, transform that into different forms, right? So that's the same data.
想象一下，把它转化成不同的形式，对吧？这是相同的数据。

39:06
Why? And what are some of the principles that sit behind your choices of visualization method?
为什么?你选择可视化方法背后的原则是什么?

39:16
That analysis. How are people related to each other who talking to two right?
这种分析。和两个人说话的人是怎么联系起来的?

39:24
So that's pretty important for some kind of question, right? Is it possible for this person to have interacted with this person on this analysis? No.
这对于某些问题来说很重要，对吧？这个人有没有可能在分析中与另一个人有过互动？否。

39:33

We don't have any recorded instances, but we do talk to each other, and there's no recorded instances of people being connected to both.
我们没有任何记录在案的例子，但我们确实彼此交谈过，也没有记录在案的人与两个人都有联系的例子。

39:40
Screen telling is kind of a development from visualization. It's kind of, it's a mode of.
屏幕讲述是一种视觉化的发展。这是一种模式。

39:50
Listening.
听。

39:51
Okay.
好吧。

39:55
Thank you.
谢谢你！

39:55
On your mats.
在你们的垫子上。

39:58
Put it all together into the married story.
把这些都放到结婚的故事里。

40:02
Are really popular, really effective.
非常受欢迎，非常有效。

40:07

On this, this may be your choice of the output. I've had many students work on story maps because they are very, very.
在此，这可能是您选择的输出。我有很多学生研究故事地图，因为他们非常非常。

40:18
And they are a very useful kind of opportunity.
这是一个非常有用的机会。

40:22
All right, so keep it in mind, right? Remember, you can always jump forward and look at some of the meetings just.
好吧，记住了，好吗？记住，你可以提前看一些会议。

40:33
Of what they are before we even go to that week. So you're not feel restricted by the order.
在我们讲到那一周之前。这样你就不会觉得受到命令的限制。

40:39
Explore. All right. So we had a couple of focus questions this week, and they were about our ethical responsibilities in situation.
探索。好吧。这周我们有几个重点问题，是关于我们的道德责任。

40:49
And how we can protect your history to do good.
以及我们如何保护你们的历史做好事。

40:54
All right, this is really about the dispositions of today's historians. History has.
好了，这是关于当今历史学家的倾向。历史。

41:01
The profession has always evolved in some ways, right? And thinking

about our goal as a science and why the society outside of the university is something that maybe you don't necessary.
这个职业在某些方面一直在发展，对吧？想想我们作为一门科学的目标以及为什么大学之外的社会可能是你不需要的。

41:11
Perhaps you can think about in your other courses, or do that.
也许你们可以在其他课程中思考，或者这样做。

41:15
Because it's a history.
因为这是一段历史。

41:17
That's a ability for you to do it.
这是你的能力。

41:19
So we have to think about what it means specifically in a digital space, as your readings will have to explain.
所以我们必须思考它在数字空间中的具体含义，你们的阅读材料将会解释这一点。

41:25
Let's talk about interdisciplinary which has also formulations as multi there's inter there's strengths.
让我们来谈谈跨学科，它也有多种形式，有相互作用，有优势。

41:36
We won't talk about the definitions yet, but let's start with the question.
我们先不讨论定义，先从问题开始。

41:43
Because if all go as historians is to understand the past, to explain the past, what methods do you use, or do you borrow? That is not historical.

因为如果所有的历史学家都是为了理解过去，解释过去，你会用什么方法，或者借用什么方法？这不是历史。

41:55
What do you?
你呢?

41:57
Or think about your sources. What sources do you use that are not historical, traditionally historical?
或者想想你的信息来源。你使用的哪些资料不是历史的，不是传统历史的?

42:20
I guess if you are using sources that show a lot of facts, data.
我想如果你使用的资料来源显示了大量的事实和数据。

42:32
I guess you could consider that it may follow, like scientific theory, where they are trying to use empirical information, right?
我猜你可以认为它可能会遵循，就像科学理论一样，他们试图使用经验信息，对吧?

42:43
To support a certain fact, or they're trying to prove a certain phenomenon exist. So.
为了支持某个事实，或者他们试图证明某个现象的存在。所以。

42:51
I would say that just thinking that at its base language, just trying to do some facts or numbers to prove something could be considered, so, called, not historical.
我想说的是，在它的基本语言中，只是试图用一些事实或数字来证明一些东西可以被认为是，所谓的，不是历史的。

43:00

How does that compare to the historical method? Because what do you do when you construct a historical argument, when you're trying to establish?
这与历史方法相比如何？因为当你构建一个历史论点的时候，当你试图建立的时候，你会怎么做?

43:08
There's something to happen in the past.
有些事要发生在过去。

43:09
I suppose we question the context of where that information comes from.
我想我们应该质疑这些信息的来源。

43:17
And why the information was produced in a certain way, and where it was produced.
为什么这些信息会以某种方式产生，在哪里产生。

43:24
Why do you do that?
你为什么这么做?

43:28
Um.
嗯。

43:29
To understand the motivations or the context in which it was produced. So what were the power dynamics or?
去理解它产生的动机或背景。那么权力动态是怎样的呢?

43:40
Social structures that were either creating this.
社会结构要么创造了这个。

43:45
This production of knowledge, or in turn how it was affecting the production of knowledge as well? And is it fair to say that we're doing that? Because we need to evaluate the reliability.
知识的生产，或者反过来它是如何影响知识的生产的？说我们正在这么做公平吗？因为我们需要评估可靠性。

43:59
Okay.
好吧。

43:59
Or to understand the context of the information that is providing.
或者理解所提供信息的上下文。

44:08
Right?
对吧?

44:08
And so that we can understand whether this source speaks to the question that we are looking at.
这样我们就能理解这个来源是否与我们正在研究的问题有关。

44:14
Right? So.
对吧?所以。

44:17
I guess, brought this off, right? That's.
我想是他把这事搞定了，对吧？这是。

44:21
Help up my brain. Yes, it's not very good.
帮帮我的脑子。是的，不太好。

44:24
Does anyone know the scientific method?
有人知道科学方法吗?

44:29
Is it the inference? One hypothesis, repeat. Okay.
是推论吗？一个假设，重复。好吧。

44:39
Okay. Conferences. Beacon. Okay.
好吧。会议。灯塔。好吧。

44:43
So.
所以。

44:43
What do you start with hypothesis? You start with a hypothesis, right?
你从假设开始？你从一个假设开始，对吧?

44:53
Right? So you say, oh.
对吧?你会说，哦。

44:57
All the sheep in the world are black about.
世界上所有的羊都是黑色的。

45:03
Statement test, right? So she was black.
语句测试，对吧？所以她是黑人。

45:11
Do I test this?

我要测试这个吗?

45:13
Observation, I go, look at sheet, figure out, okay, so the method, right?
观察，我去看表格，找出方法，对吧?

45:24
Methodology is look at sheep.
方法论是看羊。

45:31
Right? So you're not going to look at all the sheep. You're going to come up with a sample size that's directly significant, right? I can possibly look at all the sheep in the world.
对吧?所以你不会看所有的羊。你会得到一个直接显著的样本容量，对吧？我可以看到世界上所有的羊。

45:41
I would if I could, right? But I will look at as many sheep as I can practically.
如果可以的话我会的，对吧？但我会尽可能多地观察绵羊。

45:47
Right? So I'll look at sheep from Singapore. I'll go to Australia, and I'll go and look at some sheep there. Maybe I'll go to the UK, because it's different continent, right? And then I'll go to America.
对吧?我来看看来自新加坡的羊。我要去澳大利亚，我要去那里看羊。也许我会去英国，因为那是不同的大陆，对吧？然后我会去美国。

45:59
Right? I'm trying to diversify the source of my observations, right?
对吧?我在尝试多样化观察的来源，对吧?

46:06
Because I want to be able to test the availability of this hypothesis right now. What happens if I go to America and I realize that some white sheep.

因为我想现在就能检验这个假设的有效性。如果我去了美国，我意识到一些白羊。

46:14
You go back and change hypothesis. So I have destroyed my hypothesis, and I have decided, okay, so some sheets are black, but also some of them are white.
你回去改变假设。所以我否定了我的假设，我决定，好吧，有些纸是黑色的，但也有一些是白色的。

46:25
Right?
对吧?

46:27
So I might stop there, or might go. Maybe I'm not exhausted for that. I need to go look at other places, right? So I don't know. So for now, this is what we have.
所以我可能会就此打住，或者继续。也许我还没有为此感到疲惫。我需要去其他地方看看，对吧？所以我不知道。现在，这是我们有的。

46:38
There are some black sheets, there's some white sheets. But this hypothesis will keep getting tested over and over again. Maybe someone will go to another country and they'll find other sheet. But for now.
有一些黑色的床单，有一些白色的床单。但这个假设会不断地被检验。也许有人会去另一个国家，他们会找到其他的单子。但是现在。

46:48
Based on this evidence. This is Apple.
基于这个证据。这是苹果公司。

46:52
What is the difference between this and the historical method?
这和历史方法有什么区别?

46:56
Do we have hypotheses in the historical method?
我们在历史方法中有假设吗?

47:04
How many of you say yes? Give me a greener that say yes, we have a hypothesis. Give me a red if you don't have a hypothesis.
有多少人说是的？给我一个绿色的表示，是的，我们有一个假设。如果你没有假设，就给我一个红色。

47:14
Okay.
好吧。

47:17
I see a rip. But what do you think that's not happening? Is it green? Okay.
我看到一个裂口。但你认为这不会发生吗？它是绿色的吗？好吧。

47:23
Primary sources to back it up. First, do you, are you saying this is how we construct a hypothesis?
有第一手资料支持。首先，你是说这就是我们构建假设的方式吗?

47:34
There is like a background for us to sheet the logic behind what?
这就像一个背景，让我们可以记录下什么背后的逻辑?

47:40
You think that happens here?
你觉得这在这里会发生吗?

47:44
No, no. Do scientists come up the hypothesis of nowhere?
不,不。科学家是否提出了无处可去的假设?

47:48
So you will have some perception of things with before we, I mean, certainly made certain thoughts to say about that. So from there is a hypothesis. Take from there, we'll do research whether what's the movie you're thinking?
所以在我们，我的意思是，做出一些想法之前你会对事物有一些感知。这是一个假设。从那里开始，我们会做一些研究，看看你在想什么电影?

48:04
Um, and verify. Mm, so we are not working in a vacuum, right? We kind of get a sense of, okay, maybe this is correct.
嗯，验证一下。所以我们不是在真空中工作，对吧？我们有一种感觉，好吧，也许这是正确的。

48:13
And then we kind of look for sources to test it.
然后我们会寻找资料来验证它。

48:16
Right? Let's have Scientists also don't work in a vacuum. They have a sense of accident sheet and account when he's in black sheet. But now I want to check whether it's Correct.
对吧?科学家也不能在真空中工作。当他在黑名单上时，他们有一种事故记录和账目的感觉。但是现在我想检查一下它是否正确。

48:26
So my hypothesis is a testable statement, right? Or she public, then let's go systematically test it.
所以我的假设是可检验的，对吧？或者她公开了，那我们就去系统地测试一下。

48:34
Right? With all these countries to got other sheep, but we can't do the same as historians, right? You get a sense of, okay, so this is what

generally other scholars have been saying.
对吧?所有这些国家都去找其他的羊，但我们不能像历史学家那样做，对吧?你会有一种感觉，好吧，这就是其他学者一直在说的。

48:43
Right that Singapore left Malaysia because of political differences, not economic differences.
新加坡离开马来西亚是因为政治分歧，而不是经济分歧。

48:52
Not racial differences. Let's say, okay, so these are hypothesis, right? And what do we do? We go look for evidence, right? What is the evidence that says it's political?
不是种族差异。比如说，这些都是假设，对吧？我们该怎么做？我们去找证据，对吧？有什么证据表明这是政治性的?

49:03
Is that evidence that says is economic? Is there evidence that says it's racial right? Then we.
这是经济上的证据吗？有证据表明这是种族权利吗？然后我们。

49:10
Evaluate, right? Is a reason for this source to lie? Is it reliable, right? Are they lying about something? Does it come from a source that has another motive?
评估,对吧?这个线人撒谎的原因是什么？它可靠吗？他们在撒谎吗？它的来源是否有其他动机?

49:20
Motive to lie? And how do we judge that reliability, right? Is this source true, right? Can we Is it even from that time?
说谎的动机？我们如何判断它的可靠性？这个消息来源是真的吗？我们能从那时起吗?

49:30

Right? Or is it created 50 years after that? Right? Is it a counterfeit source, or is it authentic, right?
对吧?或者它是在那之后50年创造的？对吧?这是假冒的，还是真的?

49:38
So there is a specific process, right? But actually, if you look from a macro perspective, it's kind of the same. We have a hypothesis. We look at evidence.
这是一个特定的过程，对吧？但实际上，如果你从宏观的角度来看，这是一样的。我们有一个假设。我们看证据。

49:47
The method of observation is different. Evaluation of material is different, but ultimately it's kind of the same.
观察的方法不同。对材料的评估是不同的，但最终是一样的。

49:55
Scientific process. This is why, if you look at different universities, sometimes history is the humanities, and sometimes it's a social science.
科学的过程。这就是为什么，如果你看看不同的大学，历史有时是人文学科，有时是社会科学。

50:06
Because it is a science that deals with humans, and that's why it's a social science.
因为这是一门与人类有关的科学，这就是为什么它是一门社会科学。

50:12
Looking at human society, human changes.
看看人类社会，人类的变化。

50:16
And the policy, social things, you're going to get a.
还有政策，社会问题，你会得到。

50:21
Of history. Our modern discipline was developed in the nineteenth century, right when we're thinking about science as the preeminent way of understanding the world.
的历史。我们的现代学科是在19世纪发展起来的，当时我们认为科学是理解世界的最佳方式。

50:32
If you have enough data, if you have enough sources, you will be able to reconstruct the parts, right?
如果你有足够的数据，如果你有足够的来源，你就能重建这些部分，对吧?

50:38
Are we that different from the facts? I don't know, method wise, that we're still thinking about truth, validity, empirical knowledge, right? Based on the sources that we have, we have really complex And the people we look at are really complex because animals.
我们和事实有那么大的不同吗？我不知道，方法方面，我们仍然在思考真理，有效性，经验知识，对吧？根据我们现有的资料，我们有非常复杂的我们观察的人非常复杂，因为动物。

51:00
Those one lie, but humans do.
它们会说谎，但人类会。

51:02
If you can replicate studies, right, you can use bacteria, and then you can test them multiple times, and they might give you the same result. You can.
如果你可以重复研究，对吧，你可以使用细菌，然后你可以多次测试它们，它们可能会给你同样的结果。你可以。

51:13
To replicate that. Can you replicate Singapore leaving Malaysia? You cannot.
来复制它。你能复制离开马来西亚的新加坡吗？你不能。

51:18
Can you replicate an exact person, right? This person's decision? And often to try it a hundred times, and let's see whether you make any changes. You can't do that.
你能复制一个完全一样的人吗？这个人的决定？经常要尝试一百次，看看你是否做出了改变。你不能这么做。

51:28
You can't go back into the past. Sorry.
你不能回到过去。对不起。

51:31
So we kind of have a much harder job to do than the scientist.
所以我们的工作比科学家要困难得多。

51:35
It means our conclusions are also necessarily based on different ways of evaluating it.
这意味着我们的结论也必须基于不同的评估方法。

51:41
And that's what makes the historical Method, historical Method, right?
这就是历史方法的由来，对吧?

51:45
We are tuned to things like reliability, right? Authenticity, provenance.
我们倾向于可靠性之类的东西，对吧？真实性,出处。

51:51
Because we can't replicate things. And.
因为我们无法复制事物。和。

51:54
Are the sources that you will be. This is evidence that you will.

是你们将来的来源。这就是你愿意的证据。

51:56
Very specific resonances and impacts.
非常具体的共鸣和影响。

52:00
That many different persons.
那么多不同的人。

52:02
Yes, I guess my kind of confusion is that can anything that is even after this historical method? Is this really a truth that?
是的，我想我的困惑是即使在历史方法之后也能有任何东西吗？这真的是事实吗?

52:12
Historians have probably, I mean, because of the crap of history. And Doctor Lawrence, you know, are these just like narratives that we are trying to create?
历史学家可能，我的意思是，因为历史的垃圾。劳伦斯博士，你知道，这些就像是我们试图创造的故事吗?

52:20
It's a good question, right? We make a distinction between the past and history.
这是个好问题，对吧？我们把过去和历史区分开来。

52:28
Can anyone explain very quickly what that difference is?
谁能快速解释一下这个区别是什么?

52:32
In the state of white Yes, oh, okay. The past is taken typically as suspects, like a bunch of stuff happened, whereas history.

在白色的状态下是的，好的。过去通常被认为是嫌疑犯，就像一堆发生过的事情，而历史。

52:43
Is your wallet is the narrative. So you create, like causal logics behind things which may not necessarily be true or not entirely testable. It's merely an interpretation.
是你的钱包就是故事。所以你在事物背后创造了因果逻辑，这些逻辑不一定是真的，也不一定是完全可测试的。这只是一种解释。

52:53
So, like, for instance, maybe, like, oh, somebody died, that's the past statement. But maybe you being like, this person died of grief, that would be like a narrative, because it's like how you test that as an interpretation, you come.
比如，比如说，哦，有人死了，这就是过去式。但也许你会说，这个人死于悲伤，这就像是一种叙述，因为这就像你如何测试它作为一种解释，你来了。

53:04
Maybe, because, like, you read the guy's books, and it's like, oh, he was very sad. And that's why.
也许是因为，你读了他的书，你会觉得，哦，他很伤心。这就是为什么。

53:09
So another way of feeling this is that the past is the totality of everything that has ever happened.
所以另一种感觉是，过去是所有发生过的事情的总和。

53:17
But we, as historians, go to all of these things. And what we're doing is we are creating narratives that explain and piece together pieces of evidence that we think is relevant.
但作为历史学家，我们会研究所有这些。我们所做的就是创造故事来解释和拼凑我们认为相关的证据。

53:29
To construct something that makes sense to us. It's a sense making exercise. That's what we do as humans, as historians. From all these different things, we assemble.
去构建一些对我们有意义的东西。这是一个有意义的练习。这是我们作为人类，作为历史学家所做的。从所有这些不同的东西，我们组装。

53:39
Things in a way that's in a way that help us explain and help us make meaning. A lot of us, right?
事物以某种方式帮助我们解释并帮助我们理解意义。很多人，对吧?

53:47
It doesn't mean it's fictional. It means it's effective. Fiction means the structure comes from us, right? It doesn't mean that it's based on fiction.
这并不意味着它是虚构的。这意味着它是有效的。虚构意味着结构来自于我们，对吧？这并不意味着它是基于虚构的。

53:57
So that's an important distinction. Then I'll put structureless historians will like to make.
这是一个重要的区别。然后我会把无结构的历史学家喜欢做的。

54:05
Those histories don't exist up there to be found.
那些历史在天上是找不到的。

54:09
Class.
类。

54:11
Because we make simple.
因为我们让事情变得简单。

54:13
That was very up. Is that one? Okay? Are we good to go? Are we green? Good to go.
真是太棒了。是那个吗？好吧?我们可以走了吗？我们是绿色的吗？可以走了。

54:24
Anyone need you to explain something else? Okay, okay. So, and this really came from a discussion about what is, what is not.
还有人需要你解释什么吗？好吧,好吧。所以，这真的来自于一个关于什么是，什么不是的讨论。

54:35
And the distinction I kind of wanted to bring up here between the scientific method and historical method is that we are looking at different types of information, data sources.
我想在这里指出的科学方法和历史方法的区别在于我们研究的是不同类型的信息和数据源。

54:46
Right, but our discipline is probably a tax.
没错，但我们的纪律可能是一种税。

54:50
Right? You'll go more around. Okay. Tax government sources records documentation, right?
对吧?你会走得更多。好吧。税源记录文件，对吗?

54:59
But as a discipline, we have diversified what are some non textual things that we use?
但是作为一门学科，我们已经多样化了我们使用的一些非文本的东西是什么?

55:04
Art. So we had to analyze art as a human output, as a cultural output, social output, right that for us, reflects.
艺术。所以我们必须把艺术作为一种人类的产出来分析，作为一种文化的产出，一种社会的产出，对我们来说，这反映了。

55:14
Priorities, assumptions about the world, right? Because they are created and there for them, artifact and evidence of what people think and help people.
优先顺序，对世界的假设，对吧？因为它们是被创造出来的，是为人们而存在的，是人们思考和帮助人们的产物和证据。

55:22
Anything else. Photos, right? Photograph, the framing of it, the choice of the subject, right, tells us about the photographer, but we can also use it as evidence for what was there.
其他东西。照片,对吗?照片，它的框架，主题的选择，对吧，告诉我们关于摄影师的事情，但我们也可以用它作为证据来证明那里有什么。

55:35
Or as present, right? So as a primary source, or as a way to understand the photographer himself, or the context we should keep from.
或者作为礼物，对吧？所以作为一个主要的来源，或者作为一种理解摄影师本人的方式，或者是我们应该避免的背景。

55:43
Anything else, specimens, specimens. So natural history, specimens, we can look at, E.G.?
还有别的吗，标本，标本。自然历史，标本，我们可以看，例如?

55:54
Um.
嗯。

55:54
Bees, right? We can understand the natural distribution by looking at the metadata. Where was this specimen collected? Is it still there? Is it not there anymore? Is it possible that?
蜜蜂,对吧?我们可以通过查看元数据来理解自然分布。这个标本是在哪里收集的？它还在那儿吗？它已经不在那里了吗？有可能吗?

56:05
Samila Utama saw a lion in Singapore. Right context here. Samila Otama, prince from Palemba, came to Singapore and apparently saw a lion.
Samila Utama在新加坡看到了一头狮子。这就是上下文。来自Palemba的王子Samila Otama来到新加坡，显然看到了一头狮子。

56:17
Right? And therefore he called this place the Lion City of Singapore.
对吧?因此他称这个地方为新加坡狮城。

56:21
Okay, true or not is a different story. You can take dr pr's Mooc, which discusses, in one entire lesson, the veracity of something about thomas's Lion story.
好吧，真假是另一回事。你可以参加dr . pr的Mooc课程，它在一整节课中讨论了托马斯狮子故事的真实性。

56:33
Historically, we know actually that there are no lines. Lines are not native in Singapore, right?
从历史上看，我们知道实际上没有线。线条不是新加坡本土的，对吧?

56:39
But lions have, think the doctor here another narrative to it, right? It's not necessary the lion, you see, but it's a lion that is to travel, right? The lion's wrong.
但是，医生认为狮子有另一种说法，对吧？你看，不一定是狮子，但狮子是要旅行的，对吧？狮子错了。

56:48
Art history.
艺术的历史。

56:50
Yes. So we use all sorts of other materials, right? Materials, literally, right. Art earns artifacts, ceramics, coins.
是。所以我们使用各种各样的其他材料，对吧？材料，没错。艺术可以赚取文物、陶瓷、硬币。

57:05
Cloth textiles, right? We use this as evidence of transmission, right? Whether they are ideal transmissions in terms of.
布料，对吧？我们用这个作为传播的证据，对吧？它们是否是理想的传输。

57:15
Art, right, looking at how people are using light, the framing techniques, right perspective, right in art or in photography or in video media.
艺术，对，看人们如何使用光线，框架技术，正确的视角，在艺术或摄影或视频媒体中。

57:25
Right? You can track the influence of ideas, of influences, of artists, of patrons, people who commission these things, right? What they think is fashionable.
对吧?你可以追踪思想的影响，艺术家的影响，赞助人的影响，委托这些事情的人的影响，对吧？他们认为什么是时尚。

57:36
What they think is in vogue, right? That happens to textiles as well clothing, right? Martin brought out the example of natural specimens, right? They are.
他们认为流行的是什么，对吧？纺织品和服装也会发生这种情况，对吧？马丁举了一个自然标本的例子？他们是。

57:46
Good cases where we do what is called biological anthropology, right? We look, e.g. at the oxygen isotol in people's teeth.
这是我们研究生物人类学的好例子，对吧？例如，我们观察人们牙齿中的氧同位素。

57:56
Because that encodes the type of water that you drink as a teenager.
因为它编码了你在青少年时期喝的水的类型。

58:01
Right, because your teeth developed them. And by looking at what oxygen exactly is in your heat, you can generally tell where you grew up, because you're drinking water from that source.
对，因为你的牙齿长出来了。通过观察你体内的氧气含量，你就能知道你是在哪里长大的，因为你喝的水都来自那个地方。

58:14
So the article that I have in mind is how we can ascertain that in seventh century Britain, people who lived there and buried there came from the Mediterrane.
所以我想到的这篇文章是我们如何确定在七世纪的英国，居住和埋葬在那里的人来自地中海。

58:25
Quite fascinating, right? Because their isotopes had to come from the Mediterranean visa.
很迷人，对吧？因为它们的同位素必须来自地中海签证。

58:32
What it means is that people travel, even after the Roman empire fell.
它的意思是，即使在罗马帝国灭亡之后，人们仍然在旅行。

58:37

Interesting.
有趣。

58:40
Different type of evidence. Historians. We are macpies, right? Whatever tells us anything about us, we'll use it right, if we understand the methods, right? This obviously used chemical analysis.
不同类型的证据。历史学家。我们是苹果派，对吧？只要能告诉我们任何关于我们自己的信息，只要我们理解了方法，我们就会正确地使用它，对吧？这显然使用了化学分析。

58:52
As a topic analysis, right? Spectrographs to identify, combine it with archaeological methods. Right? Of preservation or biological specimens. Right? Understanding the context of where they were buried.
作为主题分析，对吧？用光谱仪识别，再结合考古方法。对吧?保存或生物标本的。对吧?了解他们被埋葬的地方。

59:05
How do we vary when they were buried, right for all important pieces to put together before we can come to a conclusion that these people came from there and were buried in this area at this time.
我们对他们被埋葬的时间有什么不同，在我们得出结论之前，所有重要的线索都在一起，这些人来自那里，在这个时候被埋葬在这个地区。

59:16
Oh, interesting what they can do beyond just text.
除了发短信，他们还能做什么，真有意思。

59:21
Right where people were using programs to.
就在人们用程序来。

59:32
Identify amino assets and categorize them, keep them wrong, right?

识别氨基资产并分类，保持错误，对吧?

59:36
We can use for text. Because someone said, hey, look at that. Isn't that just understanding parts of a text?
我们可以用for text。因为有人说，嘿，看那个。那不就是理解文本的一部分吗?

59:45
Right and how they are reuse and identifying them in other places. Can use of the text.
对，以及它们如何在其他地方被重用和识别。能运用课文内容。

59:50
And we do right. Another example that I can't remember where we talked about in the spatial one is where we used.
我们做得对。另一个例子，我不记得我们在空间课上讲过的是。

59:59
So, you know, when you go for medical scans, right? People do X rays or mris, and then they try and look for anomalies, like cancer cells and stuff like that, right? And so what they did was there was a computer program.
所以，你知道，当你去做医学扫描时，对吧？人们做X光或核磁共振，然后他们试图寻找异常，比如癌细胞之类的东西，对吧？所以他们做的是有一个计算机程序。

01:00:11
That would compare to and detect whether there's a change, or identify specific things, like the way it's grown, right? And say, ah, that exists here, and that doesn't exist.
这将比较并检测是否有变化，或者识别特定的东西，比如它的生长方式，对吧？然后说，啊，这个存在，这个不存在。

01:00:24
The group that I work very closely with, use that to identify whether railway

infrastructure exists enough.
与我合作非常密切的一个小组，用它来确定铁路基础设施是否足够。

01:00:32
But you have these maps, and you say, okay, railway infrastructure looks like track lines, or real chats with this kind of patching.
但你有了这些地图，你会说，好吧，铁路基础设施看起来像铁轨，或者用这种修补的方式进行真实的聊天。

01:00:40
Right? And then said, okay, now you are looking for patterns. Your program that's looking for patterns. These are the patterns you look up for.
对吧?然后说，好的，现在你在寻找模式。你的程序正在寻找模式。这些是你要寻找的模式。

01:00:47
Any bit. So now we have a fantastic program called Map Reader that currently only works on very standardized maps, but that's how technology works.
任何一点。所以现在我们有一个很棒的程序叫做地图阅读器，它目前只能在非常标准化的地图上工作，但这就是技术的工作原理。

01:00:57
But that allows us to very quickly identify across the entire UK, which areas have railway lines or railway infrastructure. And then we can ask questions like.
但这使我们能够非常迅速地识别整个英国，哪些地区有铁路线或铁路基础设施。然后我们可以问这样的问题。

01:01:09
Was the environment better around these places? Who was living around?
这些地方周围的环境更好吗？谁住在附近?

01:01:13
Whether you place in poorer places or richer places, right? What about

change over time, right? Does it gentrify a place? That's what's really good.
不管你住在贫穷的地方还是富裕的地方，对吧？那么随着时间的变化呢？它会使一个地方变得更高贵吗？这才是真正的好。

01:01:22
Does it change biological patterns and migration patterns for animals? Right? If we compare this to another data set, right?
它会改变动物的生物模式和迁徙模式吗？对吧?如果我们把这个和另一个数据集比较，对吧?

01:01:31
So all these questions are available because we have used methods or apps or programs from other places.
所有这些问题都是可用的，因为我们使用了其他地方的方法或应用程序或程序。

01:01:39
Lots of potential. Lots of potential.
潜力很大。潜力很大。

01:01:45
Okay.
好吧。

01:01:45
You learn any of this in graduate school in history.
这些你们在研究生院的历史课上学过。

01:01:51
Sorry, because you can tell it takes a lot, right? It requires you to understand, E.G., for this one.
抱歉，因为你知道这很费功夫，对吧？它要求你理解，例如，对于这个。

01:02:00
I suppose, right? Distributions of chemicals in the natural world, right? This

one requires you to understand how archaeology works.
我想是吧？化学物质在自然界的分布，对吧？这需要你了解考古学是如何工作的。

01:02:10
All right, how dating works, right? Dating methods. So in archaeology, you require, you know, you know, carbon dating, because it's important to your view. But as a story, you don't.
好了，约会是怎么进行的，对吧？约会的方法。所以在考古学中，你需要，你知道，你知道，你知道，碳年代测定法，因为它对你的观点很重要。但作为一个故事，你不需要。

01:02:19
You can't depend on meta data. You depend on people to be looking at the paper, right? The paper that the text comes on, right? What is it made of? Is it made of.
你不能依赖元数据。你依赖于人们看报纸，对吧？那张纸上有文字，对吧？它是用什么做的？它是由。

01:02:30
Hope is the middle perfect.
希望是中间的完美。

01:02:33
People used to crying up clothing, right type of fibers, and then paper. So I passed around the low book last week.
人们习惯于先说衣服，然后是正确的纤维，然后是纸。所以我上周把这本书传了出去。

01:02:43
That's fabric. People.

01:02:45
At where that fabric comes from. And there are all sorts of things like trade networks, book publications, right? How do books travel?

织物的来源。还有各种各样的东西，比如贸易网络，图书出版，对吧？书是如何旅行的?

01:02:54
Right? Where will they publish? And how did it? Where did they go? Right? Who's making this paper? What is the market for that?
对吧?他们将在哪里出版？它是怎么做到的？他们去了哪里？对吧?谁在做这张纸？这有什么市场?

01:03:02
So opening up our methods and thinking about them like a magpie is pretty useful sometimes, right? But.
所以，开放我们的方法，把它们想象成一只喜鹊，有时是很有用的，对吧？但是。

01:03:14
There is what some we identified as decent treatment.
有一些是我发现的

01:03:19
Can anyone describe what feeding souls are?
有人能描述一下什么是灵魂喂养吗?

01:03:23
Theoretical sense.
理论意义。

01:03:30
Trading zone.
交易区域。

01:03:33
What the feeling of?
什么感觉?

01:03:39
Does make place where certain parties are allowed to trade. So trading is also where people in colonial history, right are where food generally.
确实创造了允许某些各方进行交易的地方。所以贸易也是殖民历史上的人们，通常是食物的来源。

01:03:50
Allowed to trade. So.
允许交易。所以。

01:03:53
Usually visitors from Europe.
通常是来自欧洲的游客。

01:03:56
Come to various different locations, the local polity, the local ruler would say, here's an area in which you can base yourself and all staff you can do.
来到不同的地方，当地的政府，当地的统治者会说，这是一个你可以立足的地方，你可以做所有的工作。

01:04:07
Treating with our.
用我们的。

01:04:08
European believers came to this region were very much affect.
来到这个地区的欧洲信徒都很受影响。

01:04:14
They were outnumbered. Their technology wouldn't be that good. And so they were very much.
他们寡不敌众。他们的技术不会那么好。所以他们非常。

01:04:20
The winds and densities of the local rulers.

当地统治者的风和密度。

01:04:23
Don't meet.
不满足。

01:04:26
But what it means is that you have these zones where.
但这意味着你有这些区域。

01:04:31
Would interact with one another.
会相互作用。

01:04:34
And they come from very different backgrounds, very different assumptions and very different methods with us in the world.
他们来自非常不同的背景，非常不同的假设和非常不同的方法。

01:04:41
We have come theorized this, that you've seen this in the film. You reading by thinking about asymmetries in knowledge, asymmetries and skills.
我们已经把这个理论化了，你们在电影里也看到了。你通过思考知识的不对称、技能的不对称来阅读。

01:04:51
And so digital humanities, with all those fields where you are working across the splints, with people with vastly different skillses and vastly different disciplinary perspectives.
所以数字人文，在你工作的所有领域，和有着不同技能和不同学科观点的人在一起。

01:05:02
All right. And something that you see historically is that once, there's an asymmetry, like when the Europeans got.

好吧。你在历史上看到的是，曾经有一种不对称，比如当欧洲人。

01:05:11
Really good technology for warfare to change the dynamics for treat.
这是一项非常好的战争技术，可以改变战局。

01:05:17
All right, you get hydroism, essentially.
好的，本质上，你得到了水离子。

01:05:21
Right? You get sort of a forcing of the will and real colonization in that sense.
对吧?从这个意义上说，这是一种意志的强迫和真正的殖民。

01:05:29
That kind of does happen as well in disciplines. All right.
这种情况在学科中也会发生。好吧。

01:05:35
Especially if you're looking in a field that requires both sites to function.
特别是如果你正在寻找一个需要两个网站都能正常工作的领域。

01:05:40
Or sometimes one more, I'll give you an example.
有时候还有一个，我给你们举个例子。

01:05:44
Um.
嗯。

01:05:46
In our case, it's about really historians not knowing enough about things like computer science, the methods, the processes to workflows, to really be able to negotiate.

在我们的案例中，真正的问题是历史学家对计算机科学、方法、工作流程等方面的了解不够，无法真正进行谈判。

01:06:01
What the final product should be.
最终产品应该是什么样子。

01:06:03
Sometimes even just moving this further.
有时甚至只是更进一步。

01:06:06
I know, I said it's important that, you know how other things work and what all these terminology means, right? Because it gets you through the door, but getting through the door is just the first step.
我知道，我说过重要的是，你知道其他事物是如何工作的以及所有这些术语的含义，对吧？因为它能让你进门，但进门只是第一步。

01:06:16
Being able to actually determine how things look at the end, right? Is another story. Here is my story.
能够决定事物最终的样子，对吧？那是另一回事了。这是我的故事。

01:06:25
I worked well. You've got a part of my story at the beginning, right? So I picked up gis kind of on the way.
我工作得很好。你一开始就了解了我的故事，对吧？所以我在路上把他接走了。

01:06:33
And for fun, it wasn't anything to do with the phd, but I decided I'll do it because I was interested in learning more, all right, and seen, maybe becoming useful. Made it right.
为了好玩，这和博士学位没有任何关系，但我决定这样做，因为我对学习更多感兴趣，好吧，也许会变得有用。做对了。

01:06:42
So I did my post off working on special data GS. And as most digital projects go, you look at the team, because you can't possibly do it by yourself.
所以我结束了对特殊数据GS的研究。就像大多数数字项目一样，你关注的是团队，因为你不可能一个人完成。

01:06:52
I'm the historian and team. I had another history personal team. So my supervisor was a true and true historian, right?
我是历史学家和团队。我有另一个历史个人团队。所以我的导师是个名副其实的历史学家，对吧?

01:07:01
Very traditional, open tax or with people. So it's a history and history. On the other side, we have what we call research software engineers. These are people who design software for research purposes.
非常传统，开放税收或与人。所以这是一个历史和历史。另一方面，我们有所谓的研究软件工程师。他们是为了研究目的而设计软件的人。

01:07:13
Right? So they are interested in how can you use computer software to help pursue research goals, right? Identify research conclusions, make visualizations.
对吧?所以他们感兴趣的是如何使用计算机软件来帮助实现研究目标，对吧?识别研究结论，使其可视化。

01:07:24
Like that, right? And so they had all the technical know how to run the server. What's the best way to use tools like the Treejs, so on and so forth? Job school batteries.
像这样，对吧？所以他们掌握了运行服务器的所有技术知识。使用诸如Treejs之类的工具的最佳方式是什么？工作学校电池。

01:07:34
Right? So my goal was kind of to sit in the middle because I'm the digital humanist. I know what the historians are interested in, because I'm.
对吧?所以我的目标是坐在中间，因为我是数字人文主义者。我知道历史学家对什么感兴趣，因为我。

01:07:43
Right? But I know kind of enough to work with the computer scientists, because I know that.
对吧?但我知道的足以和计算机科学家一起工作，因为我知道。

01:07:49
Data. I have no body function and stuff like that. So then the question is, the direction comes in here as the historian, right? My historian boss.
数据。我没有身体机能之类的东西。那么问题来了，方向是历史学家，对吧？我的历史学家老板。

01:07:58
Right? We talk about what this thing should look like among the South as historians. And then I go talk to the research software engineers, a computer scientist, and I say, hey, you know, I know this is possible. Let's do that, right.
对吧?我们以历史学家的身份讨论这件事在南方应该是什么样子。然后我去找研究软件工程师，一个计算机科学家，我说，嘿，你知道，我知道这是可能的。我们就这么做吧。

01:08:11
This is kind of how we would achieve it, and this is how we operationalize it in a computer program.
这是我们实现它的方法，这是我们在计算机程序中操作它的方法。

01:08:17
Right? This is how the data should look like, right? So I was working with the data, creating the data set.
对吧?数据应该是这样的，对吧？所以我在处理数据，创建数据集。

01:08:23
Right? So I'm sitting in the middle between two disciplines.
对吧?所以我正处在两个学科之间。

01:08:28
It's kind of fun, but it's also very violent, because what happens in the end is by computer scientists who said, oh.
这很有趣，但也很暴力，因为最后发生的事情是计算机科学家说，哦。

01:08:37
To reverse a little bit. So my project was on that map, right?
稍微反转一下。所以我的项目在地图上，对吧?

01:08:43
This is Chesapeake Bay, north East America, washington, DCS split up the road.
这里是切萨皮克湾，美国东北部，华盛顿，DCS分路。

01:08:51
And I said, look.
我说，看。

01:08:54
We know indigenous studies, right? That points on the map don't just mean that they're there, right? A village, a city.
我们知道土著研究，对吧？地图上的点并不仅仅意味着它们在那里，对吧？一个村庄，一个城市。

01:09:06
An urban settlement, right? There's a point on the map, but actually they're kind of around, you know that from documentary methods. We know that from all of history.
一个城市定居点，对吧？地图上有一个点，但实际上它们就在附近，你可以从文献资料中了解到。我们从历史中都知道这一点。

01:09:16
So then the question for us, then, is, colonial maps only put points.
那么问题来了，殖民地图只标出了点。

01:09:22
So we kind of need to complicate this, right? The question is, how do we do that on a digital platform?
所以我们需要把它复杂化，对吧？问题是，我们如何在数字平台上做到这一点？

01:09:29
And so my solution was, okay, well, then we need to introduce some sense of probability, right? Like a heat map. It's most likely that, if there's a point here, that they would be around here.
所以我的解决方案是，好吧，那么我们需要引入一些概率的概念，对吧？就像一张热图。很有可能，如果这里有一个点，它们会在这附近。

01:09:41
But there's a decreasing possibility that there might be somewhere else as well, and a probability will depend on terrain, right? Whether there's a mountain range in the way.
但是在其他地方也有可能存在的可能性越来越小，概率取决于地形，对吧？是否有山脉挡在路上。

01:09:50
Or reverse, right? That don't obstruct, but extent forests cover, which for Europeans deport with an obstruction, but for indigenous peoples who roots.
或者反过来，对吧？这并不妨碍，而是扩大了森林的覆盖范围，对于欧洲人来说，这是一种阻碍，但对于扎根的土著人民来说。

01:10:02
Right? They knew the forest so well that they were using as roots. And that really contradicts about the ways that we understand geography.

对吧?他们对这片森林非常熟悉，所以他们用它作为根。这与我们对地理的理解相矛盾。

01:10:10
Right? And so I said, okay, so let's draw a heat map, right? A combined heat map based on these points and based on the terrain. And then we can kind of Calculate.
对吧?于是我说，好吧，我们来画一张热图吧？基于这些点和地形的综合热图。然后我们可以计算。

01:10:19
Where you will probably see the Indigenous Reports of America.
在那里你可能会看到美国土著报告。

01:10:25
Right? So settles the digital site, right? It's a solvable problem that we can calculate.
对吧?那么数字网站就解决了，对吧？这是一个可解的问题，我们可以计算出来。

01:10:34
Fulfills the historical side, which is about probability, and the fact that we're working from evidence that's a bit faulty, but we're combining it with what we know.
满足了历史的一面，这是关于概率的，事实上，我们的证据有一点错误，但我们把它和我们所知道的结合起来。

01:10:43
From other sources. The computer scientist said, no, if it's not on the Colonial map, we can't put it there.
从其他来源。计算机科学家说，不，如果它不在殖民地图上，我们就不能把它放在那里。

01:10:54
Why?

为什么?

01:10:54
Why? Because they were thinking at it from a one zero perspective. It's either there or it's not there. You can only follow what's on the map.
为什么?因为他们是从1 - 0的角度来考虑的。要么在那里，要么不在那里。你只能按照地图上的指示行事。

01:11:05
Because that's historically accurate, which is funny, because they are talking to historians and telling us what is historically accurate.
因为这在历史上是准确的，这很有趣，因为他们在和历史学家交谈，告诉我们什么是历史上准确的。

01:11:13
I fought with them for 18 months. I didn't win that. I did not win.
我和他们斗争了18个月。我没赢。我没有赢。

01:11:17
Did it, because ultimately they're the ones who ended up creating the final thing.
之所以这么做，是因为最终他们是创造最终产品的人。

01:11:25
Is it because you'll see it as doing something, additional work that you need to do? No, this is lifted your job.
是因为你认为这是你需要做的额外工作吗？不，这是解除你的职务。

01:11:34
Sheet maps like a very basic thing you learn in gis. I imagine they know that they should know that.
表格地图是你在gis中学到的非常基本的东西。我想他们知道他们应该知道。

01:11:42
But their objection was not whether it can be done. Objection was whether

it reflects the material, the sources.
但他们反对的不是是否能做到。反对的是它是否反映了材料和来源。

01:11:52
In this case, the Colonial maps that only have points and lines.
在这种情况下，殖民地地图只有点和线。

01:11:55
They couldn't see beyond the maps themselves, which were our main source.
他们看不到地图以外的东西，而地图是我们的主要来源。

01:12:03
You see, they were epistemically opposed to the idea that we should exercise our imagination.
你们看，他们在认识论上反对我们应该运用想象力的观点。

01:12:12
In visualizing something beyond what the map itself says.
在想象地图本身之外的东西。

01:12:18
So we are clients. We employed them to help us create this. By the end of the day, we still came up with something that essentially looks like this.
所以我们是客户。我们雇佣他们来帮助我们创造这个。在一天结束的时候，我们仍然得到了一些看起来像这样的东西。

01:12:34
Points and lights.
点和光。

01:12:35
It doesn't look very much different from a colonial method, right? What's the new thing? What's the new thing? Good question.
它看起来和殖民法没有太大区别，对吧？有什么新鲜事吗？有什么新鲜事

吗？好问题。

01:12:45
It's a good question.
这是个好问题。

01:12:48
And then no one to the box. Oh, what's that? But you employed them, I know. But how?
然后没人到盒子里。哦，那是什么？但是你雇佣了他们，我知道。但如何？

01:12:59
How is it possible?
这怎么可能?

01:13:01
Because of the contract. Once you sign a contract based on the understanding about what would be produced, the understanding is we will produce a digital visualization based on the material. Ultimately, the design cannot be specified because we're still figuring out the design.
因为合同的关系。一旦你签署了一份基于对制作内容的理解的合同，我们就会根据材料制作一个数字可视化。最终，我们无法明确设计，因为我们仍在摸索设计。

01:13:16
You can specify that in a contract. So at the end of the day, what happened was it came down to, obviously, it got a bit nasty in some ways.
你可以在合同中指定。所以在一天结束的时候，发生的事情是，很明显，它在某些方面变得有点肮脏。

01:13:26
Oh, accuracy. What is accuracy? We don't have enough staff hours to do that.
哦,准确性。什么是准确性？我们没有足够的员工时间来做这件事。

01:13:33
What was agreed upon in the original brief.
原始摘要中达成的协议。

01:13:37
That's what happens.
事情就是这样。

01:13:42
As historians see, the problem is we are in a group of historians. We kind of know the imagination, key part.
正如历史学家所见，问题在于我们是一群历史学家。我们知道想象力是关键。

01:13:54
Of any historical work. But when you're talking to people outside of this room, outside of the discipline, they understand history in a very black and white manner.
任何历史著作。但是当你和这个房间之外的人交谈时，在这个学科之外，他们对历史的理解是非黑即白的。

01:14:05
They're there. They're not there. It's there evidence that they're there. Is there hard evidence that they're there? No, then we consider.
它们的存在。他们不在那里。有证据表明它们在那里。有确凿的证据证明他们在那里吗？不，那我们考虑一下。

01:14:13
This is part of a much larger problem, obviously, right, about how we understand knowledge and truth and the recipe in the way it works.
很明显，这是一个更大问题的一部分，关于我们如何理解知识和真理以及它的运作方式。

01:14:24
Right things are not clean cut. We know that a lot of people don't,

especially when you do fish in school.
正确的事情并不是一成不变的。我们知道很多人都不知道，尤其是当你在学校钓鱼的时候。

01:14:31
Something right, always wrong. They all get out there 5 min. That's it, right.
对的事，总是错的。他们都出去5分钟。就是这样。

01:14:40
It's a very simplistic way of understanding it. And this is what we'll call a systemic violence.
这是一种非常简单的理解方式。这就是我们所说的系统性暴力。

01:14:45
Or disciplinary violences, right where they're not really taking it on our word, as historians, that this would be considered a start factor.
或者是纪律暴力，作为历史学家，他们并没有真正相信我们的话，这将被视为一个开始因素。

01:14:56
And ultimately, they're kind of the ones who decided.
最终，他们是做决定的人。

01:15:00
Sad. I know it's your business. Get a sad.
伤心。我知道这是你的事。得到一个悲伤。

01:15:07
Right?
对吧?

01:15:10
A bit, no more business from them, from you. No, absolutely not. Might then mean they end up turning.
有一点，他们和你的生意都没有了。不，绝对不是。这可能意味着他们最终

会转向。

01:15:19
They became an in hosting. So the University in China.
他们成了东道主。所以中国的大学。

01:15:27
Although if you want to find, you could. But the university themselves, of which this the research software unit, right? This group of people.
如果你想找的话，你可以。但是大学本身，这是研究软件的单位，对吧？这群人。

01:15:37
Are technically employed in a university. They will engage as external partners from us on the project, right? But they still belong in another university.
在大学里从事技术工作。他们将作为我们项目的外部合作伙伴参与进来，对吗？但他们仍然属于另一所大学。

01:15:47
Not one that was working with, but the idea was, if the housing university, they got a better sense of what research is, and they're working with academics and stuff like that, right? When we were kind of done, the managerial position was that they ought to reserve their expertise for their own.
不是和他们一起工作，但他们的想法是，如果住房大学，他们对研究有了更好的理解，他们和学者们一起工作，对吧？当我们差不多完成的时候，管理层的立场是他们应该把他们的专业知识留给自己。

01:16:01
You should just.
你应该。

01:16:03
Stop working with people outside of their university, and they.

停止与大学以外的人合作，他们。

01:16:08
For other digital humanities. Other digital humanities.
其他数字人文学科。其他数字人文学科。

01:16:15
But that's my.
但那是我的。

01:16:22
Doesn't make sense.
没道理啊。

01:16:23
The disciplinary items.
纪律处分项目。

01:16:25
I think it's interesting that the computer science has got much power, because normally the outside world, when you ask a person to do a software.
我觉得很有趣的是计算机科学有很大的影响力，因为通常在外部世界，当你让一个人做一个软件。

01:16:36
Just do everything, even though they might not agree with it because they need to do it. So I'm actually quite surprised. I that's how it does.
做每一件事，即使他们可能不同意，因为他们需要这样做。所以我真的很惊讶。事情就是这样的。

01:16:43
Just thing, right? It could also be because you've said that academic and situation.
只是一件事，对吧？也可能是因为你说了学术和环境。

01:16:46
Right? If we hired an external firm that would have just denied, sure, whatever.
对吧?如果我们聘请了一家外部公司，他们会直接拒绝，当然，随便了。

01:16:51
It's your thing in the end, right? So we'll do it. Sometimes we can versus people who have been working with researchers and therefore have some sort of familiarity.
这终究是你的事，对吧？我们来做吧。有时我们可以与那些与研究人员一起工作的人进行比较，因此对他们有一定的了解。

01:17:02
And then, if you, hey, you know what, we can make these decisions because we are also working in research.
然后，如果你，嘿，你知道吗，我们可以做这些决定，因为我们也在做研究。

01:17:07
Then you see the asymmetry becomes wider if you're walking people outside who have no idea what you're talking about.
如果你带着不知道你在说什么的人走出去，你会发现这种不对称会变得更大。

01:17:16
Right? And you can overru them because you say, I'm the researcher here, right? So it's very tangled.
对吧?你可以推翻他们，因为你说，我是这里的研究人员，对吧？所以很纠结。

01:17:27
You have to work with people, which a lot of the science. You don't work with people, right? You work with sources and material, right? But here you have to look in a few.

你必须和人一起工作，这是很多科学。你不跟人打交道，对吧？你的工作有来源和材料，对吧？但这里你得看几个。

01:17:36
You have to manage relationships. I can't tell you how many things I spent just talking to people and saying hello and going, like, hey, how was your day? How's your dog?
你必须管理好人际关系。我无法告诉你我花了多少时间和人们聊天，打个招呼，然后问他们，嘿，你今天过得怎么样？你的狗怎么样了？

01:17:49
Right, but that ultimately is part of the disciplinary work, and working the team.
没错，但这最终是纪律工作的一部分，也是团队工作的一部分。

01:17:55
You have to replan that research project. Now, how would you adjust?
你得重新规划那个研究项目。现在，你将如何调整？

01:18:03
There are two things that come to mind. One is, I would have been involved in the project market earlier. So one of the big problems is that they didn't have a digital humanness.
我想到了两件事。一个是，我会更早参与项目市场。所以最大的问题之一就是他们没有数字化的人性。

01:18:14
On the team when they were constructing the brief.
在团队里做简报的时候。

01:18:17
The context is the historians that I was working with New The digital history is a fun thing. It's a good thing.
背景是和我一起工作的历史学家New数字历史是一件有趣的事情。这是一件好事。

01:18:27
It's great because it can also create impact. So the big impact that we're doing with this is we are showing how we're trying to demolish the stereotype that the gyms characters disappear, and when next thing.
这很棒，因为它也能产生影响。所以我们所做的最大的影响是我们展示了我们是如何试图打破刻板印象的，健身房的角色消失了，当下一件事。

01:18:38
And the Colonial maps actually have good evidence that they continue to thrive behind the Colonial statelines.
殖民时期的地图有很好的证据表明他们在殖民时期的州线后面继续繁荣。

01:18:45
They weren't pushed out, and they didn't just file and so, and we know that from the people who are still alive today, or traditions, and all the stories that we still hear from the people.
他们没有被赶出去，他们也没有提交文件等等，我们从今天还活着的人那里知道，或者从传统中知道，从人们那里听到的所有故事。

01:18:55
That we work with, right? And so this was meant to be a way of showing people that they continued to live there.
这是我们的工作，对吧？所以这是一种向人们展示他们继续生活在那里的方式。

01:19:05
And we could do this right there, right by showing off the overlapping of spheres of the indigenous sphere, in the colonial sphere.
我们可以在这里做这个，通过展示重叠的领域土著领域，在殖民领域。

01:19:13
That's the goal. The problem is, they didn't have me on the team when they first designed this, or they were first come with this idea. I was brought in.

这就是我们的目标。问题是，当他们第一次设计这个的时候，或者他们第一次想到这个想法的时候，我并没有在团队里。我是被带进来的。

01:19:24
After they got the money, and after they signed the contract, after which there was no space within the contract to go, ah, but this is kind of the direction of shift on it.
在他们拿到钱之后，在他们签了合同之后，在合同中就没有空间了，但这是一种转变的方向。

01:19:34
So that's partly one of the problem.
这是问题的一部分。

01:19:37
They don't, obviously don't pick people who work with people that you know well enough, and you understand how they would act. And.
很明显，他们不会选择那些和你很熟悉的人一起工作的人，你知道他们会怎么做。和。

01:19:47
Unequal asymmetric treatings, or.
不平等的不对称待遇，或者。

01:19:50
So relationship building, getting to know people, even if you're not looking them right now, is kind of important.
所以建立关系，了解别人，即使你现在没有看着他们，也是很重要的。

01:19:57
There is a much longerly way you can just sit down and say, hey, I'm going to do this and start doing it tomorrow.
你可以坐下来说，嘿，我要做这件事，明天就开始做。

01:20:04

These projects. It takes time. It takes long people. It takes coalition building.
这些项目。这需要时间。这需要很长时间。这需要建立联盟。

01:20:10
You will try and fail. It will not be available. Some people might be available for a particular time, so on and so forth. Your ten peoples might not match your funding Datelines might not match.
你会尝试失败。它将不可用。有些人可能在特定的时间有空，等等。你的10个人可能不匹配你的资金期限可能不匹配。

01:20:21
So on and so forth. But that is why these projects are literate, right? Sometimes the setbacks, sometimes you fail. How do you push forward?
以此类推。但这就是为什么这些项目是有文化的，对吧？有时是挫折，有时是失败。你如何向前推进?

01:20:30
So you fall forward in that sense. Are you? Even if I don't work with this person, the I'll come back to them in three years.
从这个意义上说，你是向前倒下的。是吗?即使我没有和这个人一起工作，我也会在三年后回到他们身边。

01:20:40
Right?
对吧?

01:20:40
How do we keep that alive?
我们如何保持这种活力?

01:20:43
Okay. Concerns.
好吧。的担忧。

01:20:52
Okay, so, um.
好吧，那么。

01:21:02
That kind of reframes a little bit what we mean. We basically do history.
这就重新定义了我们的意思。我们主要研究历史。

01:21:08
Right? Because, again, that's not traditional history. Working with people is not traditional history. Working with computer scientists is not traditional history.
对吧?因为，这不是传统的历史。与人合作并不是传统的历史。与计算机科学家合作并不是传统的历史。

01:21:18
Doing visualizations is not traditional history. But then a question that we naturally call to is, what is history, and why are we doing it?
可视化并不是传统的历史。但我们自然会想到的一个问题是，什么是历史，我们为什么要创造历史?

01:21:28
What are you doing for?
你在干什么?

01:21:31
Right digital history gives us that opportunity to sub, reinterrogating some of these basic assumptions about what history looks like, what historical practice looks like when we have these tools.
正确的数字历史给了我们一个机会，让我们重新审视一些基本的假设，当我们有了这些工具，历史是什么样子的，历史实践是什么样子的。

01:21:44
Does it mean?
这意味着什么?

01:21:50
For the discipline, our own identity as historians? What does it mean for what we understand our core skill sets of the historical method? What should we be teaching in school?
对于这门学科，我们作为历史学家的身份？这对我们理解历史方法的核心技能意味着什么？我们应该在学校教什么？

01:22:00
Right? What would make you equipped as a historian for today, rather than?
对吧?是什么让你成为今天的历史学家，而不是?

01:22:07
And this one off a few years ago.
这个是几年前的。

01:22:08
I'll come one, by the way, of your living objectives. What does this mean for this?
顺便说一下，我来谈谈你的生活目标。这意味着什么呢?

01:22:21
Um.
嗯。

01:22:22
And the threat that we're going to pick up again after the break is, what does this mean when we as historians get involved in building archives?
休息后我们将再次讨论的威胁是，当我们作为历史学家参与建立档案时，这意味着什么?

01:22:31
And collections, because now we can. It's no longer the progress of this archivist.

收藏，因为现在我们可以。这不再是档案保管员的进步。

01:22:37
Become archivists, but now you might actually get intimately involved in designing a doing archive.
成为档案管理员，但现在你可能会密切参与到设计一个正在做的档案中。

01:22:44
Right? So what, then do we think about?
对吧?那么，我们该考虑什么呢?

01:22:48
Okay, so let's take a break. We'll come back in 10 min.
所以让我们休息10分钟

01:22:56
We will open with this question about.
我们将从这个问题开始。

01:22:57
And putting information online, and visualization is always good.
把信息放到网上，可视化总是好的。

01:23:02
If you've done the readings, you know, that's a very simple answer, right? But it is important to identify that you have always.
如果你做了阅读，你知道，这是一个非常简单的答案，对吧？但重要的是要认识到你一直都有。

01:23:13
That is assumption that information online, which it has accessible, is universal, good.
这是一种假设，即人们可以获取的网上信息是普遍的、好的。

01:23:23

And that's because we are brought up in an environment where we believe that the freefall of information. Free access to information is important for building an educated citizenry is important for things like democracy.
那是因为我们在一个相信信息自由落体的环境中长大。信息的自由获取对培养受过教育的公民很重要，对民主也很重要。

01:23:38
Right? The more information you have, the more knowledge you have, you ought to be more well rounded. You ought to understand the two perspectives.
对吧?你拥有的信息越多，你拥有的知识越多，你应该更全面。你应该理解这两种观点。

01:23:45
And therefore you will be more enlightened. It's enlightened.
因此你会更开明。这是开明的。

01:23:49
Hello.
你好。

01:23:53
You know, that's.
你知道，那是。

01:23:55
Evidently not very true. We've never had more educated people in the world. We've never had more access to information.
显然不太正确。我们从未有过这么多受过教育的人。我们从未有过如此多的获取信息的途径。

01:24:02
But we have increasing metabolisms. We are questioning systems that have existed for hundreds of years, sometimes for really good reasons.
但是我们的新陈代谢在增加。我们在质疑已经存在了几百年的制度，有时是

出于很好的理由。

01:24:12
But the question is, how do we make sure that the people who need to be safe better, are safe better?
但问题是，我们如何确保那些需要更安全的人，更安全?

01:24:19
How do we make sure that the research that we do are not causing harms, whether unintended right?
我们如何确保我们所做的研究不会造成伤害，无论是无意的，对吗?

01:24:28
What are some of the things that we need to think about as we move from just writing histories to curating collections, especially digital collections?
当我们从写历史转向收藏，尤其是数字收藏时，我们需要考虑哪些事情?

01:24:39
Also a bigger hand in doing it, because now digital methods are entrusting us with that power.
我们也更有能力去做，因为现在数字技术赋予了我们这种能力。

01:24:49
Oh.
哦。

01:24:53
Would you come back to this question that I kind of left you off with right? Which is, why do you do research?
你能回到这个问题上吗，我把这个问题留了下来，对吧？那就是，你为什么要做研究?

01:25:01
What is your purpose in this morning?
你今天上午的目的是什么?

01:25:05
And overall answers, by the way. All right, but it's interesting to hear from a few of you. Why do you do research? And why do you do this for?
顺便说一下，总的答案。好吧，但听听你们几个人的意见还是挺有意思的。你为什么要做研究？你为什么要这么做?

01:25:19
Think, like when I look at my own motives, it's like when I look at these documents, like on their own, they don't say.
想想看，当我审视自己的动机时，就像当我审视这些文件时，就像他们自己，他们没有说。

01:25:29
A lot. And so for me, the why is about, like, the interpretation of what happened to the people.
很多。所以对我来说，“为什么”是对发生在人们身上的事情的解释。

01:25:36
And then to understand and maybe draw a lesson.
然后去理解，也许从中吸取教训。

01:25:41
My attitude is to.
我的态度是……

01:25:44
So it's kind it's up finding out right about the past, but illustrating what's happened.
所以这是一种发现过去的正确方式，但也说明了发生了什么。

01:25:51
What it means, right? Do you? Ultimately, this seems to me like for you. I know it takes a personal, sort of angle to it. You're researching things that have impacted your Family.

这意味着什么，对吧？你呢?最终，我觉得这是给你的。我知道这是个人的问题。你正在研究影响你的家庭的事情。

01:26:03
And sort of the ways in which your family history has happened and moved.
以及你的家族史发生和发展的方式。

01:26:10
Across time, right? So some of us have really personal motivations to do historical work.
跨越时间，对吧？所以我们中的一些人做历史研究是出于个人动机。

01:26:15
Anyone else needs to share a little bit about why you can.
其他人需要分享一下为什么你可以。

01:26:29
I guess the motivation of doing my research is that sometimes you may be inspired by some interest, like you find something is very fascinating and interesting.
我想我做研究的动机是，有时你可能会受到一些兴趣的启发，比如你发现一些非常迷人和有趣的东西。

01:26:44
But usually I think people are like me. I didn't want to just stay in the stage of.
但通常我认为人们都和我一样。我不想只停留在这个阶段。

01:26:53
I just know the obvious information, or obvious facts, but I want to know, like the paper, like causes, or the development, or is history. So I tend to.
我只知道明显的信息，或明显的事实，但我想知道，像论文，像原因，或发展，或它的历史。所以我倾向于。

01:27:09
Search more things, and then you will find another interesting thing, and that will keep you muching on the way of researching.
搜索更多的东西，然后你会发现另一个有趣的东西，这将使你在研究的道路上走得更远。

01:27:17
So curiosity, right? This is curiosity to understand how people have lived, how societies have formed and developed.
所以是好奇心，对吧？这是了解人们如何生活，社会如何形成和发展的好奇心。

01:27:27
Understanding human nature. That's my own motivation as well. I'm interested in understanding how many different ways they are to be human.
了解人性。这也是我自己的动机。我感兴趣的是了解他们有多少种不同的做人方式。

01:27:37
Right? And time and history provide you a kind of evidence, right? For me, I do history because it.
对吧?时间和历史为你提供了一种证据，对吧？对我来说，我学历史是因为它。

01:27:46
Helps illustrate different ways that you can be human. It problematizes the ways that we are being human today, because there are a lot of things that we.
这能说明你为人的不同方式。它质疑了我们今天作为人类的方式，因为有很多事情我们。

01:27:55
See as, oh, it's naturally like that, because it's always been like that. History probably replaces that very quickly, right? Shows you that there are so

many different ways of understanding the same word.
看，哦，这是自然的，因为它一直都是这样的。历史可能会很快取代它，对吧？向你展示了理解同一个单词有很多不同的方式。

01:28:06
Understanding certain contexts, of understanding what you see and what you feel and what you hear. And so then we have to be quite humble, epistemologically.
理解特定的环境，理解你所看到的，你所感受到的，你所听到的。所以在认识论上，我们必须非常谦虚。

01:28:15
Right, intellectually, to really.
对，理智上，真的。

01:28:18
We consider a lot of the stuff that we are saying or that we're thinking or that we believe.
我们会考虑很多我们说的，想的，相信的东西。

01:28:23
And so the.
所以。

01:28:28
And why we help dive into that is because then I'm going to ask you, what do you find meaningful to produce?
我们之所以要深入研究这个问题是因为我要问你们，你们觉得生产什么东西有意义?

01:28:37
Because the traditional outputs, or history and historians, right, has been books in journal articles, right? We tell.
因为传统的产出，或者历史和历史学家，对吧，都是期刊文章中的书籍，对吧？我们告诉。

01:28:47
The goals is to add on to knowledge, right, to refine knowledge, to make sure that we're saving out untrue So, you know.
我们的目标是增加知识，对吧，提炼知识，确保我们没有漏掉不真实的东西，所以，你知道。

01:28:58
Arguments that no longer hold water right.
不再站得住脚的论点。

01:29:02
The knowledge piece, you want to make sure that we are exploring new things. A lot of it, a lot of research historically, a lot of history. Research historically, is driven.
知识部分，你要确保我们在探索新事物。很多，很多历史研究，很多历史。历史上的研究是被驱动的。

01:29:15
By new concerns.
新的关注点。

01:29:17
Right by realizations in wider society that some things have been underexplored and some things actually matter. And you want to look at.
在更广泛的社会中，人们意识到有些事情没有得到充分的探索，有些事情实际上很重要。你想看看。

01:29:27
Right? So the class example here is economic or gender history, right? The role of economic structures. We're thinking Marxist history here, right? The role of people.
对吧?这门课的例子是经济或性别史，对吧？经济结构的作用。我们考虑的是马克思主义历史，对吧？人的角色。

01:29:41
Rather than rulers, right? History from below, right?
而不是统治者，对吧？下面的历史，对吧？

01:29:45
The role of the little men, the workers, the laborers, right in shaping historical change, right?
小人物的角色，工人，劳动者，塑造了历史的变化，对吧？

01:29:54
Whether they are revolutions, or whether they're just societies that plot the law, right?
不管是革命，还是只是社会组织制定法律，对吧？

01:29:59
The role of women in society, right in roles that are typically underseen because they are not in positions of power.
女性在社会中的角色，她们所扮演的角色通常是被忽视的，因为她们没有权力。

01:30:08
But looking at household history, looking at histories of caregiving, of maternity child rearing.
但是看一下家庭历史，看一下照顾的历史，看一下母亲抚养孩子的历史。

01:30:17
Right now. This was additional history. They were revolutionary when they first came out, right The history of children.
现在。这是额外的历史。它们刚问世的时候是革命性的，对吧儿童的历史。

01:30:26
People who don't typically meet traces in history, because children can't get, like, leave sources.
这些人通常不会在历史上留下痕迹，因为孩子们不能留下线索。

01:30:34
Right? The voices that don't appear in the archives aren't immediately obvious.
对吧?那些没有出现在档案里的声音并不是很明显。

01:30:39
Right? And we go. So where were the children? Right?
对吧?我们开始。那么孩子们在哪里呢？对吧?

01:30:44
Because if you look at archives, it doesn't sound like they really exist, right? Where are the animals?
因为如果你看一下档案，它们听起来不像是真的存在，对吧？动物在哪里?

01:30:48
Where the plants.
哪里有植物。

01:30:51
Where's the weather or the climate, right?
天气和气候呢，对吧?

01:30:56
So if you look at historical research as a few, that has always evolved based on the questions that we.
所以如果你把历史研究看成是少数，它总是基于我们所提出的问题而发展。

01:31:02
Concerned about as people who live in society.
作为生活在社会中的人所关心的。

01:31:06
Oral history, yes, but a quick question about the voice that we don't hear, because I'm struggling with it as well. I can find a lot of things, E.G., from.
口述历史，是的，但是一个关于我们听不到的声音的问题，因为我也在努

力。我可以找到很多东西，例如，从.....

01:31:17
Journal site, but not from the female side. It's just not registered. Are there other historical approaches or methods that's used for these voices that usually do not get registered?
期刊网站，但不是来自女性方面。只是没有注册。有没有其他的历史方法或方法用来处理这些通常没有被记录下来的声音?

01:31:28
So some ways of recovering this is by looking at different sets of evidence. So in indigenous studies, E.G.?
所以恢复的一些方法是通过观察不同的证据。那么在土著研究中，例如?

01:31:36
Because a lot of them don't appear in Colonial records. And even if they do, they are in legal records or really biased records or maps, right? You could read against the green, which is what we do as a story, right? We look for evidence that exists. It didn't mean to present itself.
因为他们中的很多人都没有出现在殖民地的记录中。即使他们这样做了，他们也在法律记录中或者是有偏见的记录或地图中，对吧？你可以反着绿色读，这是我们写故事的方式，对吧？我们寻找存在的证据。它不是故意要出现的。

01:31:52
But it's there, and you can understand it. If you eat close enough, right? If you account for bias, you can get a sense of actually what reality was. So that's one Method.
但它就在那里，你可以理解它。如果你吃得够近，对吧？如果你考虑到偏见，你就能对现实有所了解。这是一种方法。

01:32:02
The other way to find alternative sources or evidence, in this case, oral history. Because at least in many indigenous cultures, oral culture is the dominant culture is not written textual culture.

另一种寻找替代来源或证据的方法，在这种情况下，口述历史。因为至少在许多土著文化中，口头文化是占主导地位的文化而不是书面文本文化。

01:32:13
And we know from studies of orality and authenticity in Western contexts, 700 years is when oral authenticity and truthfulness and oral accounts.
我们从西方语境中对口述真实性的研究中得知，700年是口述真实性，真实性和口述的时期。

01:32:25
Disappear roughly 700 years, right in Aboriginal history, there's one case, 21000 years.
消失了大约700年，就在土著历史上，有一个案例，21000年。

01:32:33
So we are looking at sort of huge geological changes. There is a study from 20 isolated aboriginal communities along the coast of Australia.
所以我们正在研究巨大的地质变化。这是一项对澳大利亚沿海20个孤立的土著社区的研究。

01:32:43
Where they record a massive sea change, level, sea level change event from 21000 years ago.
他们记录了21000年前的一次巨大的海平面变化。

01:32:50
To our culture. It's a confidence of the practice. One.
我们的文化。这是对实践的信心。一个。

01:32:56
Original societies are very concerned, and they price environmental knowledge.
原始社会对此非常关注，他们为环境知识定价。

01:33:02

Two. They have very strong social structures about passing down this information. Every generation has one person who is tasked with remembering every single detail about this event.
两个。它们有非常强大的社会结构来传递信息。每一代人都有一个人负责记住这一事件的每一个细节。

01:33:14
And in the next generation, they identify who that is, and they make sure they pass it down.
而在下一代，他们会确定这是谁，并确保将其传承下去。

01:33:19
So there are some things that kind of work together for the information the last 21000 years, through oral culture.
所以在过去的21000年里，有一些东西通过口头文化共同传递信息。

01:33:27
How do they select the next person?
他们如何选择下一个人?

01:33:31
Also different factors. Sometimes gender. Sometimes it's familiar relationships. So sometimes a family is that line is known as men too.
还有不同的因素。有时性别。有时是熟悉的关系。所以有时候一个家族也被称为男人。

01:33:42
Be the knowledge for that specific technology.
成为特定技术的知识。

01:33:45
Well, of course, this is, this is a H case where there are some really strong social factors that affect their transmissional knowledge, but in sort of wider circumstances.
当然，这是一个H案例，其中有一些非常强大的社会因素影响他们的传播知

识，但在更广泛的情况下。

01:33:57
At least in European history, which I'm closer to 700 years when things can't disappear.
至少在欧洲历史上是这样的，我已经接近700年了，那时东西是不会消失的。

01:34:05
I heard of a case in Burmese history. I can never find the sauce.
我听说过缅甸历史上的一个案例。我总是找不到酱汁。

01:34:11
Somewhere, so I can't give it to you, but it was an accident involving, I think it's utense, maybe.
在某个地方，所以我不能告诉你，但这是一起事故，我想可能是很紧张。

01:34:20
One of the first army's leaders. There was an accident that he was involved in, kind of really diversive.
第一支军队的领导人之一。他卷入了一场事故，很不寻常。

01:34:28
But in the oral culture, they memorize every single part of the event.
但在口头文化中，他们记住事件的每一个部分。

01:34:32
When this person arrived, a copy number to make a model. And it's important because he was a significant player, and so that information gets encoded.
当这个人到达的时候，一个复制数字来制作一个模型。这很重要，因为他是一个重要的球员，所以这些信息被编码了。

01:34:44
Into rhythm and song, easy the Monarchs, for you to pass on, right?
进入节奏和歌曲，简单的君主，让你传递，对吧?

01:34:50
The next generation.
下一代。

01:34:52
So that is a different sources, which has a different way of understanding reliability and measuring reliability.
所以这是一个不同的来源，它有不同的方式来理解可靠性和测量可靠性。

01:35:03
Obviously involves memory, right? So you have to get familiar with.
显然涉及到记忆，对吧？所以你必须熟悉。

01:35:11
Orality as a source, and then figure that out and evaluate for yourself. Reliability, context, information, authenticity and truth.
口语化作为一个来源，然后自己找出并评估。可靠性，语境，信息，真实性和真实性。

01:35:21
From that. So that's one photographs. Other mature evidence can be good, right? So looking at what's left behind.
从这一点。这是一张照片。其他成熟的证据可能是好的，对吧？看看剩下的是什么。

01:35:30
Whether there are textiles or main artifacts. I know you have spoons in your family collection, right?
是否有纺织品或主要文物。我知道你的家族收藏里有勺子，对吧？

01:35:40
Are there any associated material with that that gives you the metadata, additional prominence, information for that, who who sent them, who repaired them, who used them.

是否有任何与之相关的材料给你提供元数据，额外的突出信息，谁发送了它们，谁修复了它们，谁使用了它们。

01:35:51
How are they used? Right? So some questions. Lend yourself household questions. How are they used? Who used them to catch them? Right? You can get true oral recollections.
它们是如何使用的？对吧?有些问题。问自己一些家庭问题。它们是如何使用的？谁用它们来抓它们的？对吧?你可以得到真正的口头回忆。

01:36:00
Probably because this might not be working now.
可能是因为这招现在不管用了吧。

01:36:02
So there are different ways of walking around a question, right? The issue is trying to understand, in this case, the gender dimension to your family history.
所以回答问题有不同的方式，对吧？在这种情况下，问题是试图理解你的家族史的性别维度。

01:36:13
Right? It's tough. It's difficult because it's not straightforward. So you're cutting naturally, and think, okay, what other piece of evidence might survive?
对吧?它是非常艰难的。这很难，因为它不是直截了当的。所以你会自然地剪掉，然后想，好吧，还有什么证据可以保存下来?

01:36:22
How might be, get transmitted down to all presently?
怎么可能，传递到现在的所有?

01:36:25
Is that interesting? Give you a sense of how we might want to think about approaching the past essentially.

有趣吗？让你们了解我们可能想要从本质上看待过去。

01:36:37
Okay, um.
好的,嗯。

01:36:42
So what I really wanted to to kind.
所以我真正想做的是。

01:36:48
Kind of put in your minds and to keep in the forefront of your mind is, what do you want your legacy to be?
在你们脑海中挥之不去的一个问题是，你希望自己的遗产是什么？

01:36:56
Okay, so.
好的,所以。

01:36:56
Because you're all in this for particular reasons. You're all driven by more this, mostly probably curiosity. We're not being here for the money, for sure.
因为你们都有特殊的原因。你们都被更多的东西驱使着，很可能是好奇心。我们来这里肯定不是为了钱。

01:37:06
Um, so, like, why are you interested in why you do it right?
你为什么对你为什么做得对感兴趣？

01:37:11
What do you want to achieve out of your historical work and all the research that you do?
你想从你的历史研究和研究中得到什么？

01:37:19
Personally, I landed in publication, and I find it meaningful.
就我个人而言，我得到了出版，我觉得这很有意义。

01:37:27
Because I can see how the work in a recession doing can affect people and their lives. So with the Map Project, E.G.?
因为我知道在经济衰退中工作是如何影响人们和他们的生活的。例如，在地图项目中?

01:37:35
The kids, you know, get through their family history, and they actually see it in the classroom.
孩子们，你知道，通过他们的家族史，他们实际上在课堂上看到了。

01:37:40
That's great.
太好了。

01:37:42
Because otherwise there's nothing up there that sounds authority to you, that actually doesn't say nothing.
因为不然的话，上面就没有什么听起来很权威的东西了，实际上并没有说什么。

01:37:48
Really.
真的。

01:37:51
Meaningful, right?
有意义的,对吧?

01:37:53
What might you say?

你会怎么说?

01:37:55
Who do you want to think that how long you might be your family, right?
你想让谁认为你是你的家人，对吧?

01:38:02
They might be helping them see themselves within the current of history.
他们可能会帮助他们在历史潮流中看到自己。

01:38:06
Replacing yourself in a wider context.
在更广阔的环境中替换自己。

01:38:10
Making sense who you are, who your community is.
弄清楚你是谁，你的社区是谁。

01:38:16
That community, whether it's an immigrant community, right? Whether it's a family that has lived in the place for generations, right? What does that mean?
这个社区，不管是移民社区，对吧？无论是在这个地方住了几代人的家庭，对吧？这是什么意思?

01:38:34
Now we've been talking about ourselves by idealistic case, right? This is kind of what we want to do. And.
我们一直在用理想主义的例子讨论我们自己，对吧？这就是我们想要做的。和。

01:38:45
Who we are, right and what legacy we want to leave. But the truth of the matter is we exist within society. And.
我们是谁，对不对，我们想留下什么遗产。但事实是我们存在于社会中。

和。

01:38:53
Industries and social and economic networks that we have no control over most of us individuals.
我们大多数人无法控制的行业，社会和经济网络。

01:38:59
Right? And the two of it is, there are, there is a funding in a metrics landscape, or evaluating work.
对吧?其中的两个是，有一个在指标领域的资金，或者是评估工作。

01:39:08
For allocating resources. And that's something that you need to be quite, sort of hard noted about. You need to know that decis is.
用于分配资源。这是你们需要注意的一点。你需要知道decis是。

01:39:16
We can't just always just do what we want to do, because you need money.
我们不能总是做我们想做的事，因为你需要钱。

01:39:20
You need type. You need people. You need help.
你需要打字。你需要人。你需要帮助。

01:39:24
Okay. And so I know we've been talking a little bit about metrics, right? What does it look like and what is rewarded within academia as an industry?
好吧。所以我知道我们一直在谈论参数，对吧？它是什么样子的？作为一个行业，学术界的奖励是什么?

01:39:35
Right, or society, in more general case, right? And that ships research and

gender. That shifts the kind of stuff that comes up from historians.
对，或者社会，在更普遍的情况下，对吧？这将研究和性别联系在一起。这就改变了历史学家的观点。

01:39:44
And they do sort of pre couple incentives within a little.
他们做了一些配对前的激励。

01:39:49
About that across the three weeks.
在这三个星期里。

01:39:51
Well, what I want to pay attention to is what we call extracting this model.
我要注意的是我们所说的提取这个模型。

01:39:56
Is a system current.
是系统电流。

01:40:00
In research.
在研究。

01:40:01
Not just history, but across the humanities and circumstances.
不仅仅是历史，还有人文和环境。

01:40:05
In some fields, it is more secure. In indigenous studies, E.G.?
在某些领域，它更安全。在土著研究中，例如?

01:40:10
Really.
真的。

01:40:12
No problem.
没有问题。

01:40:12
Does anyone know what attractiveness means?
有人知道吸引力是什么意思吗?

01:40:17
I'm just, I don't know very well. But from what I'm understood, it's when knowledge is taken from a community. So I'm taking the example of an indigenous, indigenous studies.
我只是，我不是很清楚。但据我所知，这是指从一个群体中获取知识。我举了一个土著研究的例子。

01:40:33
Knowledge is being taken from a community, and the community itself has no control over where that knowledge goes.
知识是从社区中获取的，而社区本身无法控制知识的去向。

01:40:42
May be forced to reveal information under duress. So.
可能在胁迫下被迫透露信息。所以。

01:40:47
So mode of how the information is collected is also a point to be noted, and they have no control of who gets to see it, who gets to use it, and how it gets used.
所以信息收集的方式也是值得注意的一点，他们无法控制谁能看到它，谁能使用它，以及如何使用它。

01:40:59
They have no way, and more often than not, they would be compensated for whether monetarily or otherwise. They have no They don't get anything

out of the.
他们没有办法，而且通常情况下，他们会得到金钱或其他方面的补偿。他们没有他们没有得到任何东西。

01:41:10
The general thruster is definitely correct, right? I mean, there's some things that are clearly illegal, which is.
总推进器肯定是正确的，对吧？我是说，有些事显然是违法的，那就是。

01:41:21
Something that you.
一些你。

01:41:25
That was going to be good, abdus. So we have research ethics, which is that people should, ought to be able to consent.
会很不错的，abdus。所以我们有研究伦理，即人们应该，应该能够同意。

01:41:33
To getting interviewed, to sharing information, especially personal information, right things that will make them identifiable, right?
接受采访，分享信息，尤其是个人信息，这些都能让他们被认出来，对吧?

01:41:42
So if you do any.
所以如果你做任何。

01:41:44
Research with people, including oral history. You are required at all institutions nowadays to go through an ethics review.
与人一起研究，包括口述历史。现在所有的机构都要求你通过道德审查。

01:41:55
To indicate where there might be tourists, if you're working with elderly people under 21 populations, and say prisons where there might be

caution.
如果你的工作对象是21岁以下的老年人，要指出哪里可能会有游客，并指出可能会有危险的监狱。

01:42:07
Right risk, any risk in bulk, you need to identify those risks and need to explain how you address them. It's not that you can do use.
对，风险，任何大规模的风险，你都需要识别这些风险并解释你如何应对它们。并不是说你可以使用。

01:42:17
It's just that you need to be quite careful, and you need to illustrate to the university and the Ethics Review Board how you will address these things.
只是你需要非常小心，你需要向大学和伦理审查委员会说明你将如何处理这些事情。

01:42:25
Okay.
好吧。

01:42:27
But then there's the difference between what is legal and what is right.
但是什么是合法的，什么是正确的，这是有区别的。

01:42:32
You can do many things legally, like take information from a publicly available forum.
你可以合法地做很多事情，比如从公共论坛获取信息。

01:42:39
And publish it. We publish it. Send it around legal, correct orly, right.
然后发表。我们发表它。只发送合法的，正确的，对吧。

01:42:50
Right question.

正确的问题。

01:42:52
Kind of taking consent right? Legally speaking, it's published, right? It's out there in the world. Anyone can access it.
这是一种征得同意的行为，对吧？从法律上讲，它是出版的，对吧？它就在这个世界上。任何人都可以访问它。

01:43:01
But the question is, is it right to put it in places, to circulate into places where it wasn't meant to be originated? There was no expectation that a public foreign post in a small website in the corner of the Internet.
但问题是，把它放在一些地方，传播到它本不应该产生的地方，对吗？万万没有想到，一个对外公开的帖子会出现在互联网的一个小网站的角落里。

01:43:13
Will be seen all around the world or elsewhere.
将在世界各地或其他地方被看到。

01:43:17
Right?
对吧?

01:43:19
Legal, yes. Legal number.
合法的,是的。合法的数字。

01:43:25
And with extractivism, mostly legal.
而采掘活动大多是合法的。

01:43:32
You can, you can go into the community, do all your ethic stuff to the legal line. Go in. Make relationships. Get information, report them.
你可以，你可以进入社区，在法律上做你所有的道德方面的事情。进去。使

人际关系。获取信息，报告他们。

01:43:44
In a research paper and never go back.
在一篇研究论文里，再也不回去了。

01:43:47
There's no legal obligation for you to tell them what the research has done or freedom.
你没有法律义务告诉他们研究做了什么，也没有自由。

01:43:54
There is no legal obligation to necessarily pay them unless to be a frequent contract.
没有法律义务一定要支付他们，除非是一个频繁的合同。

01:44:00
There's no obligation to continue those relationships.
没有义务继续维持这些关系。

01:44:06
Right? And so this is what's happened. What's the push factor? People need to publish, right? People need to put stuff up.
对吧?这就是发生的事情。推动因素是什么？人们需要发表，对吧？人们需要张贴东西。

01:44:17
And once it's out, you're done right. What's the?
一旦它出来了，你就做对了。的是什么?

01:44:22
You need to go back. You don't need to keep.
你得回去。你不需要保留。

01:44:26

Talking to these people that you spend.
和你花钱雇的人谈谈。

01:44:27
Can you quickly?
你能快点吗?

01:44:29
The systems help us push you, incentivize you towards quick and new stuff. So once you've exhausted the mind of things.
这个系统帮助我们推动你，激励你去尝试快速的新事物。所以一旦你用尽了所有的心思。

01:44:43
Move on.
继续前进。

01:44:44
So generations of researchers have done this. This is why, if you go talk to conditions communities today, and they know you're a researcher from a university.
一代又一代的研究人员都在这样做。这就是为什么，如果你今天去和条件社区交谈，他们知道你是大学的研究人员。

01:44:55
You're ready not speak to you.
你准备好了不跟你说话。

01:44:57
What changed? Nothing changed. Keep here. Report the hard and soul to you. Explain to you how they see the world. Explain to you that philosophy shared with you.
改变了什么?没有什么改变。继续在这里。向你报告辛苦和灵魂。向你解释他们是如何看待世界的。向你解释一下与你分享的哲学。

01:45:08
All the troubles and experiences that they've had. And then this person goes off, disappears, never see them again. Nothing changes.
他们经历过的所有麻烦和经历。然后这个人走了，消失了，再也没见过他们。没有什么变化。

01:45:15
So why?
所以为什么？

01:45:18
Whiteboard.
白板。

01:45:22
This is very similar to questions about emotional labor, right? I know we're talking about team building, building relationships with team members and stuff like that.
这和情绪劳动的问题很相似，对吧？我知道我们在谈论团队建设，与团队成员建立关系之类的事情。

01:45:37
That is what sociologists would call emotional evil. Is what that you have to do. That isn't necessarily work work, but it involves your emotion, involves your person, involves your personal skills.
这就是社会学家所说的情感之恶。是你必须要做的。这不一定是工作，但它涉及到你的情感，涉及到你的人，涉及到你的个人技能。

01:45:48
None of this obviously fits within the system of how what men can work is. It's also very gender, because interpersonal work is an emotional labor is usually.
这些显然都不符合男人如何工作的体系。这也很性别化，因为人际工作通常是一种情绪劳动。

01:45:58
Than by women.
而不是女人。

01:46:00
Right. Curating community relationships, making sure everyone gets along right.
正确的。管理社区关系，确保每个人都能正常相处。

01:46:07
Gender, and that's partly why, if we don't recommend it when we recompen for work, because it's gender.
性别，这就是部分原因，如果我们在给工作报酬时不推荐，因为这是性别。

01:46:15
So it's all mixed up together.
所以它们都混在一起了。

01:46:19
Very complicated, not a great thing, but you can see where the incentives come from and why it pushes people to do particle things.
非常复杂，不是一件伟大的事情，但你可以看到动机来自哪里，以及为什么它推动人们做粒子的事情。

01:46:29
And why we have extractivism as a research practice.
为什么我们把提取主义作为一种研究实践。

01:46:33
And white means that there might be people who would rather not speak to you if they know you are. Given research.
白色意味着如果有人知道你是白人，他们可能宁愿不跟你说话。鉴于研究。

01:46:39
It's not your fault, necessarily, but it's the reality.

这不一定是你的错，但这就是现实。

01:46:44
The line between legality and ethical practice is it exists. It's not the same thing.
合法性和道德实践之间的界限是存在的。这不是一回事。

01:47:00
What kind of research do you want to be?
你想做什么样的研究?

01:47:03
What do you want to produce? I keep saying previous because it's very capitalistic program to get, what do you want to produce? Right? Maybe.
你想生产什么？我一直在说，因为这是一个非常资本主义的项目，你想生产什么？对吧?也许吧。

01:47:13
The better questions. Who do you want?
更好的问题。你找谁?

01:47:14
And how do you want the stuff that you need to reflect?
你想要怎样反映你需要的东西?

01:47:20
Because these questions are real.
因为这些问题是真实存在的。

01:47:24
They are important. They're not stuck in across the.
它们很重要。他们没有被困在。

01:47:32
So I work in.

所以我工作。

01:47:40
And look in English history, and look in the six employees, where you have the English Civil War between King Chancellor, first, with kind of a Nazi character.
看看英国历史，看看这六个雇员，你会看到英国内战，首先是国王大臣之间的内战，有点像纳粹人物。

01:47:52
And his parliament, who didn't like a minor, right? And so today.
他的议会不喜欢未成年人，对吧？今天也是如此。

01:47:57
Cromwell was the general for Parliament. He went into Ireland and essentially conducted.
克伦威尔是议会的将军。他去了爱尔兰，指挥。

01:48:04
Is it Cromwell in Ireland?
是克伦威尔在爱尔兰吗?

01:48:08
Just thinking about.
只是在想。

01:48:10
Right? His head is in a secret location, because people are afraid you are going to dig it up.
对吧?他的头被藏在一个秘密的地方，因为人们害怕你把它挖出来。

01:48:17
And do what, a little bit.
然后做什么，一点点。

01:48:20
My supervisor, my phd supervisor, is the only person who is a member of the Cromwell Society and the King Charles Affairs, the Market Society.
我的导师，我的博士导师，是唯一一个克伦威尔协会和查理国王事务协会，市场协会的成员。

01:48:28
There's no overlap in the membership because they hate each other, absolutely each other. And my sofa is the only person who's a member.
成员之间没有重叠，因为他们彼此憎恨，彼此憎恨。我的沙发是唯一的会员。

01:48:39
This happened.
这发生了。

01:48:44
So.
所以。

01:48:44
The Cromwell society are embarrassed of Oliver Cromwell, okay? And its principles and its action.
克伦威尔团体对奥利弗·克伦威尔感到尴尬？它的原则和行动。

01:48:50
I mean, maybe not. The genocidal ones say that King Charles the first dies at the end because he gets executed by Parliament.
我的意思是，也许不是。种族灭绝论者说，查理一世最后死了，因为他被议会处决了。

01:48:59
He deserves, and he becomes a marker, so he's technically a St. in the Church of England.
他应得的，他成为了一个标记，所以严格来说他是英格兰教会的圣人。

01:49:08
So there's all society costs, the first market society.
这是所有社会成本，第一个市场社会。

01:49:13
And we support.
我们支持。

01:49:16
And those interest groups essentially communicate with sexes. Today.
这些利益集团本质上是通过性别进行交流的。今天。

01:49:22
They run their own society and membership, and they do like talks, and invite lecturers to give presentations.
他们有自己的社团和会员，他们喜欢演讲，邀请讲师做演讲。

01:49:30
The life of.
的生活。

01:49:32
Um.
嗯。

01:49:36
Or.
或。

01:49:37
That happened many, hundreds of years ago.
那是几百年前的事了。

01:49:39

There can be still very much present relevance and resonance.
仍然可以有很多当前的相关性和共鸣。

01:49:44
Something else obscure is the Civil War thought.
另一个模糊的是内战思想。

01:49:49
You know what I mean, right? Far removed, but still very much cultural touchstones.
你知道我的意思，对吧？虽然相距遥远，但仍然是文化的试金石。

01:49:56
So by coming back to what kind of historical do you want to be?
那么回到你想成为什么样的历史学家?

01:50:08
What kind of legacy, I suppose you might think, but backwards? What kind of legacy do you could be?
我猜你可能会想，除了倒退，这是什么遗产？你能成为什么样的遗产?

01:50:14
As a person, someone who works in this area, who's interested in the past, representations of the past, in sharing.
作为一个人，一个在这个领域工作的人，一个对过去，对过去的表现，对分享感兴趣的人。

01:50:24
About the past, right? Which is, as we know, a rich, really interesting.
关于过去，对吧？正如我们所知，这是一个丰富的，非常有趣的。

01:50:30
Diapers.
尿布。

01:50:32
Nuanced parts, right?
微妙的部分，对吧?

01:50:38
How do you do that? How do you express that?
你是怎么做到的？你怎么表达呢?

01:50:43
Computer scientists.
计算机科学家。

01:50:46
What about the kids who live in school? They've all done history in school.
那些住在学校的孩子怎么办？他们在学校里都学过历史。

01:51:03
That's how we think about.
这就是我们思考的方式。

01:51:04
And that most people was only exposure to history.
大多数人只接触过历史。

01:51:07
Is, do you remember this week?
你还记得这周吗?

01:51:09
What does the left of what it mean by this? Right?
左边是什么意思呢？对吧?

01:51:13
And what happened and what happened and what happened, and then.
发生了什么，发生了什么，发生了什么，然后。

01:51:22
How you look.
你看起来怎么样。

01:51:22
Good challenge, right? This fantastic challenge, because now we have a whole society to work with. People actually know, you might find it a bit more complicated than that.
很好的挑战，对吧？这是一个巨大的挑战，因为现在我们要与整个社会合作。人们实际上知道，你可能会发现它比这更复杂。

01:51:32
Right? We are always testing hypotheses. We're always evaluating evidence. If new evidence comes to light, you might revise a hypotheses, right?
对吧?我们总是在测试假设。我们总是在评估证据。如果有新的证据出现，你可能会修改假设，对吧?

01:51:41
Facts are facts that we are pretty sure is correct. But if something turns out, we ought to revise.
事实就是我们非常确定是正确的事实。但如果有什么结果，我们应该修改。

01:51:49
We know that the scientists know that because they look at hypotheses. But the.
我们知道科学家们知道这一点，因为他们看的是假设。但是。

01:51:56
Not necessarily because we present it as incontrovertible fact.
不一定是因为我们把它当作无可辩驳的事实。

01:52:01
Right? The most modernist critique of history is that we hide all our

characters into the footnotes.
对吧?最现代主义的历史批判是我们把所有的人物都藏在脚注里。

01:52:08
We write our narratives as nicely form, narratives that sound might be envied on to each other. And all the messy stuff about referencing, about where this information comes from, all the new ones that comes with.
我们把我们的故事写得很好，这些故事可能会让彼此羡慕。还有所有关于引用的乱七八糟的东西，关于这些信息的来源，以及随之而来的所有新信息。

01:52:21
I've evaluated this. I discarded this because I don't think it's reliable. All that sits in the footnotes.
我已经计算过了。我放弃了这个，因为我认为它不可靠。所有这些都在脚注中。

01:52:26
Hidden it all the way.
一直藏着。

01:52:28
So full structures will say, no, we cannot do that. We have to show our messages. We have to use the word I.
所以完整的结构会说，不，我们不能那样做。我们必须展示我们的信息。我们必须用I这个词。

01:52:35
In all this free text, because it chose front and center the fact that you and.
在这所有的自由文本，因为它选择了前面和中心的事实，你和。

01:52:43
They consider decisions, editorial decisions.
他们考虑决策，编辑决策。

01:52:45

Validity divisions, potential procedural decisions, that it's important for other people to come back and go. So this is why they did it. So this is why they saw this way. What if we look at evidence in another way.
有效性分歧，潜在的程序性决定，对其他人回来和离开很重要。这就是他们这么做的原因。这就是他们这么看的原因。如果我们从另一个角度看证据呢?

01:53:00
Okay.
好吧。

01:53:00
What does it mean for the reader of history who might not be trained in history, and they're reading this work, where they're going, oh, I see how they're thinking. I see how they're reasoning.
对于那些没有受过历史训练的历史读者来说，这意味着什么，当他们读到这本书的时候，他们会想，哦，我知道他们是怎么想的了。我知道他们是怎么推理的。

01:53:12
Okay, right.
好的,正确的。

01:53:14
I see. Okay, so this is what people are sure about. This is what we're pretty sure about. But, you know, ultimately meet people.
我明白了。好吧，这就是人们所确定的。这是我们非常确定的。但是，你知道，最终还是要认识人。

01:53:20
Very great. It's not second one. Or do you get people comfortable with the greenness? You know, we know reality is gray. None of it is ever from second one.
非常好。不是第二个。还是你让人们对绿色感到舒适？我们都知道现实是灰色的。没有一个是来自第二个人的。

01:53:31
But how do you get into that discussion without going down the moral Okay, that was maybe right, which is what people would go right? Oh, if everything is great, then maybe Hitler was right.
但是你怎么能在不违背道德的情况下进行讨论呢？好吧，这可能是对的，人们会怎么做？哦，如果一切都很好，那么也许希特勒是对的。

01:53:42
Then we need to have a wider conversation for black and whiteness, right? Because this is the same thing, right? Either he's very good, either he's really bad.
那么我们需要就黑与白进行更广泛的讨论，对吧？因为这是一样的，对吧？要么他很好，要么他很坏。

01:53:54
Or me, she has to be looking right again.
对我来说，她必须恢复正常。

01:53:57
Bifurcation, right? A binary.
分岔,对吧?一个二进制。

01:54:00
Everyone was complicated. It was complicated because it doesn't mean he was good.
每个人都很复杂。这很复杂，因为这并不意味着他很好。

01:54:12
Right?
对吧?

01:54:12
I don't know we, I know that we've Hitler, but here we go.
我不知道我们，我知道我们有希特勒，但我们开始吧。

01:54:21
The heater thing reminded me of the one German.
加热器的事让我想起了那个德国人。

01:54:27
Down for Okay. So the one the means, yes, the one the means. So I think it's a criticism of making him human in the lecture when the so called.
选择“ok”。所以这个是指的，对，是指的。所以我认为这是对在讲座中把他变成人类的一种批评，当所谓的。

01:54:40
The receiver people is that is actually evil person. But I think that is, I think that's where it goes right of the argument. I think it's much better to show his Argument.
接受者实际上是邪恶的人。但我认为，我认为这就是论点的正确之处。我认为最好展示他的论点。

01:54:50
Anyone can be.
任何人都可以。

01:54:55
So it's like.
所以就像。

01:54:56
Well, it's true, right? When you realize that even the most random person has the capacity for evil. That's quite scary. That's what Hannah ren wrote in on particular reason. And like, one's trial in Jerusalem, basically, like everyone's saying like, oh.
这是真的，对吧？当你意识到即使是最随意的人也有作恶的能力。这太可怕了。这是汉娜·任写的一个特别的理由。就像，一个人在耶路撒冷的审判，基本上，每个人都说，哦。

01:55:11
It's the ultimate evil paranos like guys, he's scary because he's just an unthinking human. And it's because of that stupidity and unthinkingness that he basically agreed to everything that he listened, including the final solution.
这是终极邪恶的偏执狂，他很可怕，因为他只是一个没有思想的人类。正是因为这种愚蠢和不加思考，他基本上同意了他听到的一切，包括最终的解决方案。

01:55:21
So, I mean, these are texture conclusions.
所以，我的意思是，这些是纹理结论。

01:55:29
Right that.
正确的。

01:55:31
Come from the end of reasoning and thinking deeply about humans and what things are capable of. It's not something we fit into. A tweet.
从推理和思考的角度出发，深入思考人类和事物的能力。这不是我们能适应的。一条微博。

01:55:39
We used to use speech, right? It's not something that fits on the byline of a newspaper article necessarily.
我们曾经使用言语，对吧？它不一定适合在报纸文章的署名上出现。

01:55:45
Right? So our modern condition is we're looking for cleanances.
对吧?所以我们的现代条件是我们在寻找清洁。

01:55:49
It does better, right is you clean, authoritative, sounding answers that come conclusive.

它做得更好，是你干净，权威，听起来是结论性的答案。

01:55:55
It's what we are looking for, apparently, as people who live in a modern living.
显然，这是我们作为生活在现代生活中的人们所追求的。

01:56:00
We know as historians, is not true. We are looking for the compact. We are looking for the ones we suspect things when they are too perfect, right? But then we are kind of on top here.
我们作为历史学家知道，这是不正确的。我们正在寻找紧凑型汽车。我们在寻找那些我们怀疑事物过于完美的东西，对吧？然后我们在上面。

01:56:12
If you look at how people use AI, e.g., how many people now, look at the Google AI overview, rather than clicking through the first few pages and figure out for themselves.
如果你观察人们如何使用人工智能，例如，现在有多少人，看看谷歌人工智能概述，而不是点击前几页自己弄清楚。

01:56:23
Whether this comes from a popular page or this comes from a popular source, maybe we should have been listening to.
不管这是来自一个流行的页面还是来自一个流行的来源，也许我们应该听听。

01:56:29
My parents will do that. They don't do that at All right. They're like, oh, the ice is this? And I'm just like.
我父母会这么做的。他们不这么做好吧。他们会说，哦，这是冰吗？我就说。

01:56:38
Okay. Where is it getting information from? Right? And it's tough because

we expect things. We expect information to flow.
好吧。它从哪里获取信息？对吧?这很艰难，因为我们对事情有所期待。我们期待信息的流动。

01:56:47
We expect information to be simple. Reality to be simple, but it's not. I can change our expectation. How can we talk about complexity and uncertainty in a way that's productive?
我们希望信息是简单的。现实看似简单，其实不然。我可以改变期望。我们怎样才能以一种富有成效的方式来讨论复杂性和不确定性?

01:56:59
That helps people go, you know, actually, it's fun to be uncertain. Fun to engage in a complexity.
这会帮助人们，你知道，事实上，不确定是很有趣的。参与一种复杂的乐趣。

01:57:06
It's something we can do as historians, because we are talking about things that people are interested in. People love history, if you let them work with it.
这是我们作为历史学家可以做的事情，因为我们谈论的是人们感兴趣的事情。人们喜欢历史，如果你让他们研究历史的话。

01:57:17
And don't know about the complexity.
也不知道其中的复杂性。

01:57:19
You can write the history of coffee.
你可以写咖啡的历史。

01:57:24
And tell people how the theme that comes to them, right in a starbuck.
然后告诉人们他们是如何想到的主题，就在星巴克。

01:57:31
Right, has traveled all around the world, is affected by historical currents from places like.
是的，他环游世界，受到历史潮流的影响，比如。

01:57:37
Italy, right? Or China, right? Just mocha, right. How does chocolate interact with a bean? With a coffee bean?
意大利,对吧?或者中国，对吧？只有摩卡，对吧。巧克力和豆子是如何相互作用的？用咖啡豆吗?

01:57:47
Right? Does that happen? How can you bring in what people are interested, what people work with every day, what people know, and then complexify it.
对吧?这种情况会发生吗？你如何引入人们感兴趣的东西，人们每天使用的东西，人们知道的东西，然后把它复杂化。

01:57:58
Right afternoons, enrich the understanding, right fuel their curiosity about the stuff that they think is really my doing. But actually.
下午，充实他们的理解，激发他们对我所做的事情的好奇心。但实际上。

01:58:08
Maybe interesting story of globalization, right? About trade networks, about information exchange.
也许是一个有趣的全球化故事，对吧？关于贸易网络，关于信息交换。

01:58:15
Right? Digital visualization story maps are a good tool to do some of that.
对吧?数字可视化故事地图是一个很好的工具。

01:58:25
Okay.

好吧。

01:58:31
But we kind of draw our minds back to what we can do as researchers, especially if we're working with community.
但我们会把我们的思想拉回到我们作为研究人员能做的事情上，尤其是当我们与社区合作时。

01:58:43
That are marginalized or haven't really had the voice out there or have been the victim of extracted its practices right, something that you can think about.
那些被边缘化的人或者没有真正发出声音的人或者是被榨取的行为的受害者，你可以想想这些。

01:58:52
Is that you in a research university have a different viewpoint, a different perspective. You kind of know, what are the potential ramifications of putting someone's voice out there?
你在研究型大学有不同的观点，不同的观点。你知道，把某人的声音放到网上会有什么潜在的后果吗?

01:59:04
Because you're aware of how, of where this information holds and how it might be so complicated.
因为你知道这些信息是如何保存的，以及它可能是多么复杂。

01:59:10
That you talk to may not be in that position to understand that. And so then it is our role to talk about it, to share about it.
与你交谈的人可能无法理解这些。所以我们的职责就是谈论它，分享它。

01:59:18
Right to tell them that, hey, you know, you might be saying yes to this, but actually, do you know that someone might take this out of context, right?

Then we need to consider how this is done, or how public to make this something.
告诉他们，嘿，你知道，你可能会同意这个，但实际上，你知道有人可能会断章取义，对吧？然后我们需要考虑如何做到这一点，或者如何公开这件事。

01:59:32
Commission, right? You say you wanted to be public, but maybe you ought to consider that. This is.
委员会,对吧?你说你想公开，但也许你应该考虑一下。这是。

01:59:37
This happened, and this is how people make.
事情就是这样发生的，人们就是这样做的。

01:59:39
And there's a perspective that is very valuable.
这是一个非常有价值的观点。

01:59:43
If you trust, you don't have access to that.
如果你信任，你就无法接触到它。

01:59:46
What you do because you.
你做什么是因为你。

01:59:47
Read, reading.
阅读,阅读。

01:59:49
Journal articles about how other people find it and their implications that it goes on.
关于其他人如何发现它及其影响的期刊文章。

01:59:53
And is what we mean by your phone concept, right?
这就是我们所说的你的手机概念，对吧?

02:00:02
One content is it's not just exactly where things are going, but also do they really understand what you are consenting to?
其中一个内容是，这不仅仅是事情的发展方向，还包括他们是否真正理解你同意了什么?

02:00:08
Do you understand that the words that you are sharing the bus, the ideas in the process are sharing the bus, might be understood this way? Might be?
你是否明白，你正在共享公共汽车的词语，在共享公共汽车的过程中的想法，可能是这样理解的？可能吗?

02:00:18
Replicated in another forum, shared in these papers and so forth, right? Or they will live forever in the repository, in an archive.
在其他论坛上复制，在这些论文中分享等等，对吧？或者它们将永远存在于存储库中，存在于存档中。

02:00:26
That will be accessible to people.
这对人们来说是很容易理解的。

02:00:29
For use, and so forth.
为了使用，等等。

02:00:31
Knowing what options exist. So one option would be to put a time.
知道存在哪些选择。所以一个选择就是设定一个时间。

02:00:41
Okay.
好吧。

02:00:41
Embargo, right? So someone might share information, record, or history and say, can you embargo it until I die?
禁运?所以有人可能会分享信息、记录或历史，然后说，你能把它封锁到我死吗?

02:00:50
So I record that information. I record the composition, right? And the evidence.
所以我记录下这些信息。我记录了作文，对吧？还有证据。

02:00:56
But it will only be public after they pass away. So that's an option. Some people would say, ten years, 15 years.
但只有在他们去世后才会公开。这是一种选择。有些人会说，10年，15年。

02:01:05
Some people say, let my descendant decide, so on and so forth, right?
有些人说，让我的后代来决定，等等，对吧?

02:01:12
Of course, archives need money.
当然，档案馆需要钱。

02:01:16
To run. They have limited space, so they will, of course, rather not embargo something entirely. They might say, is it possible for researchers to have access to it? It wouldn't be.
来运行。他们的空间有限，所以他们当然不会完全禁止某些东西。他们可能会说，研究人员有可能接触到它吗？不会的。

02:01:25
You public like you want to consider some options, because if you're storing it, you want to make sure it's usable. In some ways, you have to negotiate it right?
你需要考虑一些选项，因为如果你要存储它，你需要确保它是可用的。在某些方面，你必须进行协商，对吗?

02:01:33
Understanding that these options is for your interview group.
要明白这些选择是为你的面试小组准备的。

02:01:38
Right? The person who's sharing that knowledge and helping them see. Okay, so if we made it only accessible to these types of people, That would be very helpful, and most people who would get recorded one to be able to affect the world?
对吧?分享知识并帮助他们了解的人。好吧，如果我们只对这类人开放，那就很有帮助了，大多数人都会被记录下来，能够影响世界?

02:01:50
The world outside of them, right? So giving them the sense of what options to exist, it's not everyone can see it versus we don't do it at all.
他们之外的世界，对吧？所以让他们知道存在什么选择，不是每个人都能看到，而不是我们根本不这样做。

02:02:00
Right?
对吧?

02:02:00
But helping them, walking them through some of these different steps and options, can be quite.
但是帮助他们，引导他们完成这些不同的步骤和选择，可能会相当。

02:02:08
It's the ethical thing to do with this, actually, right?
这样做是合乎道德的，对吧?

02:02:12
And this is really about professional responsibility and institutional power, right? We talked about asymmetry just now. This is asymmetry.
这实际上是关于职业责任和机构权力的，对吧？我们刚才讨论了不对称。这就是不对称。

02:02:22
You know, you are an expert in the research environment and the research ecosystem. They are not. So how do you make sure that they know that?
你是研究环境和研究生态系统方面的专家。事实并非如此。那你怎么确保他们知道呢?

02:02:31
About what's going to happen to the material that they're providing.
关于他们提供的材料会发生什么。

02:02:38
Something that is kind of a victim now in Indigenous cities, is nothing about us without us.
在土著城市中，有些东西是受害者，没有我们，就没有我们。

02:02:50
Essentially, that just means that if you're going to write about a community, you ought to get them.
从本质上讲，这只是意味着如果你要写一个社区，你应该得到他们。

02:02:56
Break.
休息。

02:02:56

Shouldn't be you writing by yourself in isolation, apart from the community.
你不应该独自写作，远离社区。

02:03:02
Right? The research has to be something that's cool, designed with.
对吧?这项研究必须是很酷的，设计有。

02:03:09
Community to help answer, solve what the community is interested in doing.
帮助解答、解决社区有兴趣做的事情。

02:03:14
It means that it's not necessary your research agenda, but you have to think about how you want to design your research in conjunction with that.
这意味着这不是你的研究议程所必需的，但你必须考虑如何与之相结合来设计你的研究。

02:03:22
Yes. What if the other party doesn't see the value of what you're trying to do?
是。如果对方看不到你所做的事情的价值怎么办?

02:03:30
So you can try and explain why you think it's valuable and how it might be valuable to them. Sometimes they might not be to see that, but.
所以你可以试着解释为什么你认为它是有价值的，以及它如何对他们有价值。有时候他们可能看不出来，但是。

02:03:41
If they say no, then let's no, you don't look at it.
如果他们说不，那就不要看了。

02:03:46
Ultimately, they need to be partners. You can't do it without them, and you

shouldn't be doing without them.
最终，他们需要成为合作伙伴。你不能没有他们，你也不应该没有他们。

02:03:54
It might be important, but this is not the only way that that legacy can survive.
这可能很重要，但这并不是遗产得以延续的唯一途径。

02:04:00
Right? The knowledge project that we do in a university is not the only knowledge project that access.
对吧?我们在大学里做的知识项目并不是唯一的知识项目。

02:04:07
Community heritage comes in very different forms. We think of it as it's important that it gets recorded, reported, categorized, you know, put out there into a sum of academic knowledge.
社区遗产有非常不同的形式。我们认为重要的是，它被记录，报告，分类，你知道，放在那里的学术知识的总和。

02:04:20
But there are many other knowledge traditions that exist for a very long time that we are not happy to do that. We are not practitioners.
但是还有许多其他的知识传统已经存在了很长时间，我们不愿意这样做。我们不是实践者。

02:04:27
It doesn't necessarily die because it doesn't coordinate.
它不一定会因为不协调而死亡。

02:04:31
Take an emails called the D text, so you can.
发一封叫做D文本的邮件，这样你就可以。

02:04:35

Just trust it to.
只要相信它。

02:04:37
Survive on.
生存。

02:04:38
Does knowledge need to survive for it to be meaningful? I mean, even if it's fitting?
知识是否需要存在才有意义？我是说，即使它很合适？

02:04:46
Trees are my Enlightenment principles, right? That knowledge in itself to exist and put to persist.
树木是我启蒙运动的原则，对吧？这种知识本身存在并持续存在。

02:04:57
Good.
好。

02:04:57
Knowledge can move something to have an impact on people, and then both.
知识可以推动事物对人产生影响，然后两者兼而有之。

02:05:02
That's fine.
这很好。

02:05:06
Right?
对吧？

02:05:06

Why do we need to like a museum? Collect, categorize, display.
为什么我们需要喜欢博物馆？收集、分类、展示。

02:05:14
Right?
对吧？

02:05:14
Living traditions change. Shift. Why do we want to fossilize something?
生活的传统会改变。转变。我们为什么要把东西变成化石？

02:05:20
Because of the gaze that we have, right? The external gaze on something that we can take a snapshot of and that we can.
因为我们的凝视，对吧？外部的注视我们可以拍下快照，我们可以。

02:05:30
Corn. We can treat. We can sell. We can market.
玉米。我们可以治疗。我们可以卖。我们可以营销。

02:05:34
This is.
这是。

02:05:36
Living traditions that don't deserve to be turned into commodities.
活着的传统不应该变成商品。

02:05:44
Your report.
你的报告。

02:05:47
Document.
文档。

02:05:47
You see what I mean when I say digital history's applauding at some of the basic assumptions of history and the knowledge and the price that we're working on.
你明白我的意思了吧，当我说数字历史是在为历史的一些基本假设、知识和我们正在研究的价格鼓掌。

02:06:00
Because all these concerns suddenly come to light, because you are the driving seat now about how you want to conduct research.
因为所有这些担忧突然暴露出来，因为你现在是你想要如何进行研究的驾驶员。

02:06:07
Also, all the threats that underpin who we are as researchers start to unravel.
同时，所有支撑我们作为研究人员的威胁都开始瓦解。

02:06:17
Let's well, thank you.
让我们好吧，谢谢。

02:06:26
Okay.
好吧。

02:06:26
So an equitable partnership, right between a researcher and a community.
所以一个公平的伙伴关系，就在研究人员和社区之间。

02:06:37
Usually means we move away.
通常意味着我们要搬走。

02:06:40
Problem. Just think about extracting information.
问题。想想如何提取信息。

02:06:42
Evidence right for our own knowledge, projects towards something that actually ends up caring for.
据我们所知，证据是正确的，项目最终会得到关心。

02:06:49
Is it good for this community that this knowledge is out there? Is it good for this community that the documentation of this knowledge is out there. Sometimes it is because, if it goes, let's say, into a research paper that gets published. It can be cited in a court of law.
这些知识在那里对这个社区有好处吗？这些知识的文档在那里对这个社区有好处吗？有时候是因为，比如说，如果它变成了一篇发表的研究论文。它可以在法庭上被引用。

02:07:03
That can be very important for land claims, E.G., so historians work have been used to justify, right how costs interpret trees.
这对于土地索赔来说非常重要，例如，历史学家的工作被用来证明，成本是如何解释树木的。

02:07:13
E.G., right? So it's not a zero sum game. It's not an either. All. Sometimes it can be really useful because academic research is what is.
例如,对吧?所以这不是一个零和游戏。两者都不是。所有人。有时候它真的很有用，因为学术研究就是这样。

02:07:24
Understandable, and vegetable to system for power like corpse.
可以理解，而且植物人对系统的权力就像尸体一样。

02:07:30

Right?
对吧?

02:07:30
That's how I'm set up. So they're not.
我就是这样被陷害的。所以它们不是。

02:07:34
It's not always a Yes, it's always a good thing. It's a good thing.
它并不总是对的，它总是一件好事。这是一件好事。

02:07:37
I think about reciprocity, right? The basic expectations, at least pay people for their time.
我想到了互惠，对吧？最基本的期望，至少是付给人们付出的时间。

02:07:47
If you're doing over dinner, or, you know, you're doing the evenings.
如果你在晚餐时做，或者，你知道，你在晚上做。

02:07:51
Of the people's work, so on and so forth.
人民的工作，等等。

02:07:53
But you should be painful for the time that they spent looking for evidence, very looking for parts of their heritage and telling you and sharing with you and explaining to you That.
但你应该为他们花在寻找证据上的时间感到痛苦，非常寻找他们的遗产的一部分，告诉你，与你分享，向你解释。

02:08:04
Right? I know many of you probably have to explain things in your life to people who don't understand things, and you feel that actually is quite hiring right to explain how you feel, to explain what you see and how you

see the world.
对吧?我知道你们中的许多人可能不得不向不理解事物的人解释你生活中的事情，你觉得解释你的感受，解释你所看到的以及你如何看待这个世界实际上是一种很好的雇佣权利。

02:08:16
That takes time and effort, right? And to do it over and over again.
这需要时间和精力，对吧？一遍又一遍地重复。

02:08:24
At least.
至少。

02:08:24
The options you recommend, right?
你推荐的选项，对吧?

02:08:27
I talked about cocreation, right? But just look.
我谈到了共同创造，对吧？但是看看。

02:08:32
Co curation, what you're doing.
共同策划，你在做什么。

02:08:34
Museum Exhibition.
博物馆展览。

02:08:36
Right, getting them to work with you, so that those perspectives are you come from them. And what you're doing is essentially your facility.
让他们和你一起工作，这样你的观点就来自他们。你所做的基本上就是你的设备。

02:08:45
Right? You are in the bridge. How does the audience understand this? How is the community seeing this? And if they're going to take this approach, how would the audience see it?
对吧?你在桥里。观众是如何理解的呢？社区对此有何看法？如果他们要采用这种方法，观众会怎么看?

02:08:57
Already understanding what is the expectation of an audience, right? So E.G., when I did an exhibition earlier this year, we were looking at Aboriginal perspectives.
已经理解了观众的期望，对吧？例如，当我今年早些时候做一个展览的时候，我们在看土著的观点。

02:09:08
And there was a lot of cool creation that was happening in the background. But for me, my work was the localization. How do I make a story that comes from the?
背景中有很多很酷的创作。但对我来说，我的工作是本地化。我该如何制作一个故事呢?

02:09:19
That's not really.
这不是真的。

02:09:21
The Singaporean audience.
新加坡观众。

02:09:25
Right?
对吧?

02:09:25
The real adaptation, and the localization will just depend of thinking about

where are the characters.
真正的改编和本土化取决于对角色所在位置的思考。

02:09:30
Connections here, says a sea cucumber tree that happens in northern Australia that goes and tangles South Asia, goes all the way up to China. And this went off for hundreds of years before.
这里的联系，一棵生长在澳大利亚北部的海参树说，它缠绕着南亚，一直延伸到中国。这在几百年前就已经发生了。

02:09:41
State boundaries, including the one in Australia, cut off.
国家的边界，包括澳大利亚的边界，被切断了。

02:09:46
Treat a barrier between C trade from Australia.
对待与澳大利亚之间的贸易壁垒。

02:09:51
Yes. How do you decide on what gets an exhibition and whatnot?
是。你如何决定哪些作品可以展出，哪些不可以?

02:09:56
Money.
钱。

02:09:58
Political priorities, like of funding from the Australian High Commission because they're interested in doing public diplomacy.
政治优先权，比如来自澳大利亚高级委员会的资金因为他们对公共外交感兴趣。

02:10:04
But I was interested in showing these stories, especially to my class, because I am.

但我对展示这些故事很感兴趣，尤其是给我的班级看，因为我就是。

02:10:12
Very hard time explaining the Aboriginal concept of country with capital C, because you cannot understand it in academic it means this and this and this and this and this particular.
很难用大写C来解释原住民对国家的概念，因为你在学术上无法理解它的意思它的意思是这个，这个，这个，这个和这个特别的。

02:10:21
It's an experience. You have to be in country.
这是一种经历。你必须在乡下。

02:10:24
To understand the country. And I can't do that in the classroom. I have to do it in the experential space. And for me, that was, this museum exhibit is a digital, immersive experience.
了解这个国家。我不能在教室里这么做。我必须在体验空间里做。对我来说，这个博物馆的展览是一种数字化的、身临其境的体验。

02:10:33
We brought in from Australia to do that. That's my motivation. And then I had to leverage on other people's motivations, including the High Commission, including the Central Ivy, which is interested In.
这是我们从澳大利亚请来的。这就是我的动力。然后我必须利用其他人的动机，包括高级委员会，包括中央常春藤，他们对。

02:10:44
Showcasing their technology and their space, right, but also promoting the disciplinary education I had to interest my history department.
展示他们的技术和空间，对吧，同时也促进了学科教育，我必须引起历史系的兴趣。

02:10:53
Which is interested in sort of building student numbers and increasing

enrollment, right? And getting good teaching evaluations and soft stuff, right? So understanding all the different stakeholders.
他们对增加学生数量和增加入学人数很感兴趣，对吧？获得良好的教学评估和软的东西，对吗？所以要理解所有不同的利益相关者。

02:11:03
Understanding what they're motivated by, what you can leverage on, and they're bringing it together so that it can make something happen.
了解他们的动机是什么，你可以利用什么，然后他们把它们结合在一起，这样就可以实现一些事情。

02:11:16
Public history.
公共历史。

02:11:16
At some point. So for me, what I got out of it was that I got an invaluable.
在某个时刻。所以对我来说，我从中得到的是无价的。

02:11:29
Opportunity to expose Singapore ins and Singapore in students of students, and Singapore to something that you wouldn't even get unless.
有机会让新加坡的学生了解新加坡，让新加坡的学生了解新加坡，让新加坡了解一些你根本得不到的东西，除非。

02:11:37
You were in country in Australia, working with knowledge builders who will have to spend.
你在澳大利亚的一个国家，和知识建设者一起工作，他们将不得不花费。

02:11:43
What then what they did was they provided video introductions. So.
然后他们做的是提供视频介绍。所以。

02:11:48

Knowledge builders who agreed to record themselves on videos, welcoming you to the land, explaining to you a little bit about the background. Share.
知识的建设者同意把他们自己录成视频，欢迎你来到这片土地，向你解释一些背景。份额。

02:11:55
Perspective.
视角。

02:11:57
And then, having incorporated the panels, the explanation, the tax, you know, and stuff.
然后，把小组，解释，税收，你知道的，和其他东西结合起来。

02:12:03
And, of course, the whole digital experiences of the university experience.
当然，还有整个数字化的大学体验。

02:12:08
Okay, are the kind of things that maybe you want to think about as you will do history, beyond just the traditional ways.
这些都是你们在学习历史时应该考虑的问题，而不仅仅是传统的方法。

02:12:30
Thinking about how you might increase the number of voices and participation curation.
考虑如何增加声音和参与策划的数量。

02:12:34
Could you bring in voices that represent carbon material that you're working with?
你能把你正在使用的碳材料的声音带进来吗?

02:12:38

Right? So even if I were to do an exhibition on Charles the First and the English Civil War, right, I will want to think about, okay. So, actually, for the stakeholders today, walk alive.
对吧?所以即使我要做一个关于查理一世和英国内战的展览，我也会思考。所以，实际上，对于今天的利益相关者来说，活着。

02:12:48
Is it the royal family? Is it Parliament itself? Is it the Irish who submits genocide at the hands of Pomo? Right? What are those perspectives and what are actually some of the angles that we do.
是皇室吗？是议会本身吗？是爱尔兰人把种族灭绝交给了波莫吗？对吧?这些角度是什么以及我们实际做的一些角度是什么。

02:12:58
To talk about, right, the legacy of violence, of war, right? The legacy of an execution.
谈论暴力和战争的遗产，对吧？死刑的遗产。

02:13:05
E.G., right? There's a legal legacy, there's a live legacy, there's a political legacy, right? So on and so forth.
例如,对吧?有法律遗产，有生活遗产，有政治遗产，对吧？以此类推。

02:13:12
And bring it in those voices at the very beginning.
从一开始就把这些声音带进来。

02:13:16
Something else you can do is think about how you can help or make a space, whether it's self curation or spontaneity. How do you help people make sense of it? Give them a space to make sense of the history.
你可以做的另一件事是考虑如何帮助或创造一个空间，无论是自我管理还是自发的。你如何帮助人们理解它？给他们一个空间去理解历史。

02:13:29

Or the evidence that is in front of them.
或者他们面前的证据。

02:13:31
How do you open up the interpreter space? Because this is what we do, right? And we know it's important, and we know it's really enriching.
你如何打开口译员的空间？因为我们就是这么做的，对吧？我们知道它很重要，我们知道它真的很丰富。

02:13:42
And it seeks our curiosity when we can work with evidence and do the interpreters.
它激发了我们的好奇心，当我们可以处理证据并做解释的时候。

02:13:48
So why do we deny it to others?
那我们为什么要拒绝别人呢?

02:13:50
How might you be able to structure a space for people to do that?
你怎样才能为人们构建一个这样的空间呢?

02:13:56
Make sense of what you're saying. Give them the raw evidence. Help them.
理解你所说的话。给他们原始证据。帮助他们。

02:14:04
Talk to the process that we did when you looked.
谈谈你看的时候我们做的过程。

02:14:08
When we're thinking about kind of structuring archives, right? How might you incorporate at its very base, at very foundations?
当我们考虑构建档案的时候，对吧？你如何在最基础的地方，在最基础的地方进行整合?

02:14:20
The ability for communities to correct for themselves, to identify what they want to keep for themselves and what they want to show the public.
社区自我纠正的能力，确定他们想为自己保留什么，他们想向公众展示什么。

02:14:28
How do you incorporate voices of community in museum archives or catalogues? Right? Lived experience in, say, reflecting on photographs.
你如何将社区的声音纳入博物馆档案或目录？对吧?生活经验，比如说，反思照片。

02:14:42
That from those communities.
来自那些社区。

02:14:46
Right?
对吧?

02:14:48
How do you do that?
你是怎么做到的?

02:14:49
Excess levels based on needs. This is what we're talking about, right? Which parts are private, which parts are public, which parts are restricted to groups or communities that we come.
基于需求的超额水平。这就是我们要谈的，对吧？哪些部分是私人的，哪些部分是公共的，哪些部分仅限于我们来的团体或社区。

02:14:59
Or the ones that they wish to share it with. How do you design systems that will allow you to have that company?

或者是他们想要分享的人。你如何设计系统来让你拥有这样的公司?

02:15:06
Regular level. There are some good examples you read about, some of them in the reading.
常规水平。你们在阅读材料中读到过一些很好的例子。

02:15:12
The overview of the research projects here.
这里是研究项目的概述。

02:15:15
Of course, you know, just being aware of that pasta, we do have as an academic community to these populations that.
当然，你知道，只是意识到意大利面，作为一个学术团体，我们确实有这些人群。

02:15:27
In the way that or better, or was your You have inherited that relationship. And you can even.
以这样的方式，或者更好，或者是你的，你继承了这种关系。你甚至可以。

02:15:37
And so when people say, no, it's not necessary reflect on you, but it might be reflect.
所以当人们说，不，这没有必要反映在你身上，但它可能是反映。

02:15:46
Okay, so how's everyone doing? I know we can't cover very heavy ground this seminar. Are we good?
好吧，大家都好吗？我知道我们不能在这个研讨会上讨论太多的问题。我们还好吗?

02:16:02
Green. Look good. Read for a pressing question that you need to respond

to.
绿色的。看起来不错。阅读一个你需要回答的紧迫问题。

02:16:10
Okay.
好吧。

02:16:11
Okay. So that's what we did today, right? We talked a little bit about interdisciplinarity. We talked about information asymmetry. What happens?
好吧。这就是我们今天做的，对吧？我们谈到了一些跨学科的问题。我们讨论了信息不对称。会发生什么呢?

02:16:21
You enter the trading zone of digital history that you do need to work with others, and you do need to do the emotion.
你进入了数字历史的交易区，你确实需要与他人合作，你确实需要表达情感。

02:16:28
Labor of interpersonal relationships, cultivation of partners, thinking the long term, right? We talked about research practices and ethics. What are our legal obligations, but maybe also of ethical obligations?
人际关系的劳动，伙伴的培养，长远考虑，对吧？我们讨论了研究实践和伦理。我们的法律义务是什么，也许还有道德义务是什么?

02:16:42
Right? And how do they reflect the personal researcher you want to be? And what do you want to be behind?
对吧?它们如何反映出你想成为的个人研究者？你想在后面做什么?

02:16:49
As your legacy, and how that repeated to the.
作为你的遗产，这是如何重复到。

02:16:54
Putting the at the this one project that you might want to consider doing right? So as you are kind of stewing and thinking about the project that you want to do.
把注意力放在你可能想要做的一个项目上，对吗？所以当你在思考你想做的项目时。

02:17:05
Right? How might you incorporate some of these ideas, principles, ambitions, right?
对吧?你如何将这些想法，原则，抱负结合起来呢?

02:17:13
Remember, your digital project is not going to be a huge thing, so it's going to be a.
记住，你的数字项目不会是一个大项目，所以它会是一个。

02:17:18
More circumscribed thing. But what I want you to do is I want you to experience the process of making more right and thinking about, okay, so I've done this now as a proof of concept. How can I expand it?
更受限制的东西。但我想让你们做的是，我想让你们体验一下做更多正确的事情的过程，然后思考，好吧，我现在已经做了这个，作为一个概念的证明。我怎么展开它?

02:17:28
In the future to something bigger.
在未来要做更大的事情。

02:17:31
How do I add more text? How do I really add a new method to me? How do I expand the reach of what I've done? Okay.
我如何添加更多的文本？如何真正地为我添加一个新方法？我如何扩大我所做的事情的影响范围？好吧。

02:17:39
Okay. So that kind of concludes our model, sort of, control.
好吧。这就是我们的模型，控制的结论。

02:17:47
But inward looking segment of the semester. It's been theoretical. It's been a bit heavy. But what we're going to do from next week, almost is we're going to start looking at some methods.
而是本学期的内省部分。这只是理论上的。有点重。但从下周开始，我们要做的是，我们将开始研究一些方法。

02:17:58
Approaches, right? We're going to start look at some tools that we can work with, practically as a digital historian. Next week, it's going to be about tax because that is.
方法,对吧?我们将开始研究一些我们可以使用的工具，实际上就像一个数字历史学家。下周，我们将讨论税收，因为这是。

02:18:08
First move, I guess you get other than numbers. But that is kind of how people get started with digital history, mostly. And so that's what we're going to start with.
第一步，我猜你得到的不是数字。但大多数人都是这样开始研究数字历史的。这就是我们要做的。

02:18:18
Next week, there will be some instructions just to make sure that you can read the login to build.
下周，将会有一些说明，以确保您可以阅读登录来构建。

02:18:25
Scholarship. Glad everyone has successful.
奖学金。很高兴大家都成功了。

02:18:26

But keep an eye up for it. Next week is a great opportunity to inherit it from.
不过要留意一下。下周是继承它的好机会。

02:18:33
Working in personality in a private firm, I must add.
我必须补充一句，在一家私人公司从事人格方面的工作。

02:18:38
Right, and ask them about holiday as a corporation, working with historical material and texts, and purchase.
对，然后问他们关于假期作为一个公司，处理历史材料和文本，以及购买。

02:18:46
Okay, I'll remind you of the election before we start our teams meeting with him. And as he walks you through the workshop to introduce you some of these.
好吧，在我们和他开会之前我会提醒你选举的事。他会带你们参观车间向你们介绍其中的一些。

02:18:56
Methods. Those are the focus questions. They are on the syllabus.
方法。这些是重点问题。都在教学大纲上。

02:19:01
Welcome back.
欢迎回来。

02:19:05
You haven't a quick reminder if you.
你没有快速提醒，如果你。

02:19:07
Sorry.
对不起。

02:19:10
If you have, remember, you need to do six reflective writings across the semester. If you haven't done any of the two or three, you need to catch up.
如果有的话，记住，这学期你需要写六篇反思性文章。如果你没有做这两三个，你需要赶上来。

02:19:26
Okay.
好吧。

02:19:27
Make sure you have six. I have a question about degrading, sometimes, like in the rows, not every row is filled in. Is that because the topic.
确保你有六个。我有一个关于退化的问题，有时候，就像在行中，不是每一行都填满了。是因为这个话题。

02:19:40
That's in the role was not in reading. And if you don't grade it, yes, that's right. I don't, I don't give you a number if the reading is or what I Expect.
那是在角色里而不是在阅读里。如果你不给它打分，那就对了。我不会给你们一个数字，如果读数是我期望的。

02:19:51
Do that.
这样做。

02:19:52
So evaluating a data set, if there's no data set you evaluate, I'm not going to give you a number for that.
计算一个数据集，如果没有需要计算的数据集，我就不给你一个具体的数字了。

02:19:58
Makes sense.

是有意义的。

02:19:58
All right, so that is what we're done with. Today. We are like.
好了，这就是我们要做的。今天。我们就像。

02:20:05
Okay. So when?
好吧。所以当吗?
