**I**n *The Design of Everyday Things* Donald Norman argues for a user-centered approach to the design of the daily artifacts we take for granted.[1] While archives and archival collections are not everyday things for most people, they do document everyday things, and the archivist's representations and representational systems must characterize these everyday things for potential researchers.[2]

唐纳德·诺曼在《日常事物的设计》中，主张以使用者为中心，设计那些我们在日常生活中习以为常的器物。[1]虽然档案馆及档案馆藏对多数人而言并不是日常事物，但它们确实记录日常事物；档案员的表征及表征系统，必须为潜在研究者呈现这些日常事物的特征。[2]

原书第 151 页 · 对照段落 004

The term “representation” is used to refer both to the process or activity of representing and to the object(s) produced by an instance of that activity. The process of representing seeks to establish systematic correspondence between the target domain and the modeling domain and to capture or “re- present” through the medium of the modeling domain, the object, the data, or information in the target domain. To the extent that this re-presentation corresponds to, or models, the object, data, or information in the target domain the two can be thought of as representationally equivalent.[3]

“表征”一词，既指表征的过程或活动，也指某一次表征活动所产生的对象。表征过程试图在目标领域与建模领域之间建立系统性对应，并借助建模领域这一媒介，捕捉或“重新呈现”目标领域中的对象、数据或信息。当这种重新呈现与目标领域的对象、数据或信息相对应，或对其构成模型时，二者便可以视为在表征上等价。[3]

原书第 151 页 · 对照段落 005

This essay focuses on archival representation as a fluid, evolving, and socially constructed practice. *Representation* refers to both the processes of arrangement and description as well as the creation of access tools (guides, inventories, finding aids, bibliographic records) or systems (card catalogs, bibliographic databases, EAD databases) resulting from those activities. Throughout this essay the term *archival representation* is used for the archival function commonly and variously identified as arrangement and description, processing, and occasionally archival cataloging. I think that the term *archival representation* more precisely captures the actual work of the archivist in (re)ordering, interpreting, creating surrogates, and designing architectures for representational systems that contain those surrogates that stand in for or represent actual archival materials.

本文关注作为一种流动、演变且由社会建构的实践的档案表征。表征既指整理与描述过程，也指这些活动所产生的检索工具——指南、目录、检索工具、书目记录——或系统——卡片目录、书目数据库、EAD数据库——的创建。全文使用“档案表征”这一术语，指通常被不同地称为整理与描述、加工处理，有时称为档案编目的档案职能。我认为，“档案表征”更准确地把握了档案员实际所做的工作：重新排序、解释、创造替代性描述，并为容纳这些替代性描述的表征系统设计架构；这些描述替代或代表实际档案材料。

原书第 151 页 · 对照段落 006

The nature of representational tools in archives also makes them everyday things for archivists. At the same time, the codification of these tools and systems has created barriers to use. Researchers must know the codes and understand the underlying classification system. Many archivists focus on the creation of representations as the ultimate function of the archivist. As a result, the inventories and finding aids have been either the much-maligned or much-venerated objects of archivists either promoting or attacking archival theory.[4] To achieve a deeper understanding of archival representation, this essay stands this argument on its head and studies archival representations and representational systems themselves in an effort to theorize about these artifacts, determine how meaning is imbued in them, and discuss the centrality of these activities to archival work. This more empirical deconstruction of archival representation owes much to the theoretical writings of Terry Cook and others who have aptly applied postmodern theories to various aspects of the archival endeavor.

档案表征工具的性质，也使它们成为档案员的日常事物。同时，这些工具和系统的编码化，又设置了利用障碍。研究者必须了解编码，并理解其背后的分类体系。许多档案员把创造表征视为档案员的最终职能。因此，在倡导或批评档案理论的档案员那里，目录和检索工具往往成为备受诟病，或备受推崇的对象。[4] 为了更深入地理解档案表征，本文将这一论证倒转过来，研究档案表征及表征系统本身，试图对这些人工制品进行理论化，确定意义如何被赋予其中，并讨论这些活动在档案工作中的核心地位。这种更具经验性的档案表征解构，得益于特里·库克等人的理论著作；他们恰当地把后现代理论应用于档案事业的不同方面。

原书第 152 页 · 对照段落 007

Archivists actually need a deconstruction of the contexts they are trying to describe, remembering that “it is in the nature of deconstruction not just to see the wider context (those traces, or specters, stretching back into the past in an in finite regress), but also the fluidity, the flexibility, the ultimately uncontrollable nature of the context.”[5]

档案员实际上需要解构自己试图描述的背景，同时记住：“解构的本性，不仅在于看见更广阔的背景——那些无限回溯过去的痕迹或幽灵——还在于看见背景的流动性、灵活性，以及最终无法控制的性质。”[5]

原书第 152 页 · 对照段落 008

This essay examines the representation of records by records creators, archivists, and systems. To accomplish this, it focuses on the representational practices, the artifacts of representation, and the evolutionary nature both of the primary sources that the artifacts are trying to represent and of the artifacts themselves.

本文考察文件形成者、档案员和系统对文件的表征。为此，文章关注表征实践、表征产物，以及这些产物试图表征的一手资料和产物自身的演变性质。

原书第 152 页 · 对照段落 009

An examination of the activities, systems, and products of archival representation is long overdue. The past decisions by archivists have already been scrutinized in several other archival functions, and these studies have revealed assumptions and biases in archival practice. For example, the need to reexamine old appraisal decisions has been discussed frequently since Leonard Rapport's article “No Grandfather Clause.”[6] The collection assessment studies reported by Judith Endelman found that archivists' long-term perceptions of their collections were at times flawed, if not erroneous.[7] However, the archival function of archival representation has not experienced such public scrutiny even though retrospective conversion projects have uncovered discrepancies and highly misleading descriptions.[8] Despite the documented need to revisit previous collection descriptions, there have been few analyses of the nature of the original categorizations and descriptions, the revisions, or the evolution of descriptive practices. Yet descriptive practices are definitely one of the narratives, although arguably not so tacit, that Eric Ketelaar identifies in the archives.[9] The present essay explains the salient dimensions in an analysis of archival representations. Findings indicate that the function of archival representation is ongoing. In fact, one collection studied even warns users that “the content will change over time.”[10] Ketelaar goes even further by arguing that the meaning will change over time as records are put to different uses. In this latter scenario, archivists should be not only revisiting poor descriptions but completing periodic redescriptions of entire archives to accommodate these changing meanings over time.[11] With this in mind, archivists should begin to think less in terms of a single, definitive, static arrangement and description process but rather in terms of continuous, relative, fluid arrangements and descriptions as ongoing representational processes. In fact, electronic records description begins at creation and continues throughout the records continuum as metadata are added to document such events as versions, access, and redaction.[12]

早就应当考察档案表征的活动、系统与产物。在其他几项档案职能中，档案员过去的决定已受到审视，这些研究揭示了档案实践中的假设和偏见。例如，自伦纳德·拉波特发表《没有祖父条款》以来，重新审视旧有鉴定决定的必要性，便经常被讨论。[6]朱迪思·恩德尔曼报告的馆藏评估研究发现，档案员长期以来对自身馆藏的认识，有时即使并非错误，也存在缺陷。[7]然而，尽管回溯转换项目已经发现不一致和极具误导性的描述，档案表征这一职能仍未经历类似的公开审视。[8]虽然已有文献证明，应重新检查过去的馆藏描述，但对原初分类与描述的性质、修改，以及描述实践演变的分析仍很少。然而，描述实践无疑是埃里克·凯特拉尔在档案中识别的叙事之一，尽管可以说，它并非那么隐而不显。[9]本文说明分析档案表征时的重要维度。研究发现，档案表征职能是持续的。事实上，受研究的一项馆藏甚至提醒使用者：“内容将随时间变化。”[10]凯特拉尔更进一步主张，随着文件被用于不同目的，其意义也会随时间改变。在后一种情形下，档案员不仅应重新检查质量欠佳的描述，还应定期重新描述整个档案，以适应这些不断变化的意义。[11]因此，档案员应减少以单一、定型、静态的整理与描述过程来思考，转而把持续、相对、流动的整理与描述，理解为不断进行的表征过程。事实上，电子文件描述从形成时开始，并贯穿整个文件连续体；元数据不断加入，以记录版本、访问和删改等事件。[12]

原书第 152 页 · 对照段落 010

The idea of developing representational tools as a continuous process is evidenced by the fact that archivists increasingly replace analog representational systems—such as the card catalog or finding aids in the United States—with computer-based systems—such as machine-readable cataloging (MARC) or encoded archival description (EAD). This is also important because the artifacts of archival representation are more than access tools. For better or worse, they have also been collection management tools for archivists. As such, archival representations and the technologies that archivists rely on to create, view, and communicate information about primary sources are occasions for structuring. Structuring is the ongoing processes of actions, interactions, decision making, behavior, and cognition that form the basis of organizational life.[13] In this case, archival representational practices are structuring elements. The creation of each inventory or guide reinforces, extends, or transcends previous artifacts. Thus, each new representational artifact contributes to the knowledge base of the repository at the same time it changes it.[14] These processes are iterative, dynamic, and interrelated.

将表征工具的开发视为连续过程的观念，可以从一个事实得到印证：档案员日益用计算机系统，例如机读编目（MARC）或编码档案描述（EAD），取代美国的卡片目录或检索工具等非数字表征系统。这一点也很重要，因为档案表征的产物不只是检索工具。无论效果好坏，它们也一直是档案员的馆藏管理工具。因此，档案表征，以及档案员用以创建、查看和传达一手资料信息的技术，构成了结构化发生的契机。结构化是行动、互动、决策、行为和认知的持续过程，构成组织生活的基础。[13]在这里，档案表征实践就是结构化要素。每一份目录或指南的制作，都会强化、扩展或超越此前的产物。因此，每一件新的表征产物，都在为保存机构的知识基础作出贡献的同时，改变这一基础。[14]这些过程具有迭代性、动态性，并彼此关联。

原书第 152 页 · 对照段落 011

Let's extend this line of inquiry to the classification and representational systems in archives. Archival representations can present a creator's, an archivist's, and potentially even a user's view of the collection as well as how the archivist frames the underlying papers or records for the world. Hanne Albrechtsen and Elin K. Jacob argue that these schemes need not communicate solely internally but are links between collections and users.

让我们把这一探究方向扩展到档案中的分类与表征系统。档案表征可以呈现形成者、档案员，甚至潜在使用者对馆藏的看法，也可以呈现档案员如何向外界框定背后的个人文件或机构文件。汉娜·阿尔布雷希特森和埃琳·K.雅各布认为，这些方案不必只服务于内部沟通，而是馆藏与使用者之间的纽带。

原书第 152 页 · 对照段落 012

The notion of the classification scheme as a transitional element or “boundary object” offers alternative to the more traditional approach that views classification as an organizational structure imposed upon a body of knowledge to facilitate access within a universal and frequently static framework. Recognition of the underlying relationship between user access and the collective knowledge structures that are the basis for knowledge production indicates the dynamic role of classification in supporting coherence and articulation across heterogeneous contexts.[15]

把分类方案视为过渡要素或“边界对象”的观念，为更传统的方法提供了另一种选择。传统方法把分类视为施加于知识集合的组织结构，以便在普遍、往往静态的框架中促进获取。认识到使用者获取与作为知识生产基础的集体知识结构之间的根本关系，便能认识到分类在不同背景之间支持连贯与衔接的动态作用。[15]

原书第 152–153 页 · 对照段落 013

Archivists are not yet at this dynamic point where archival categorizations for access and collection management are transparent, flexible, and effective tools for both users and archivists. Furthermore, archivists must transcend boundaries at each end of the archival spectrum, not only between users and primary sources but also between creators and creating organisms and the archives. The discussion in Australia has primarily focused on the archival boundary through which records may pass when moving from office of origin to the archives. In a successful transition, the boundary object or records must maintain coherence in both communities (office and archives).[16] Therefore, a discussion of representational coherence across this boundary between the creator and the archives follows.

档案员尚未达到这种动态状态：用于利用和馆藏管理的档案分类，成为对使用者与档案员双方都透明、灵活、有效的工具。此外，档案员必须跨越档案链条两端的边界，不仅是使用者与一手资料之间的边界，也是形成者及形成机构与档案馆之间的边界。澳大利亚的讨论主要关注文件从形成部门转移到档案馆时可能穿越的档案边界。在成功转移中，边界对象，也就是文件，必须在办公室和档案馆这两个共同体内都保持连贯性。[16]因此，下面将讨论形成者与档案馆之间这一边界两侧的表征连贯性。

## Representations by Creators
## 形成者的表征

原书第 153 页 · 对照段落 014

The representation or organization of knowledge has been a concern for creators of that knowledge as well as archivists and librarians since the Middle Ages. Rosalind McKittrick identifies a functional arrangement of manuscripts and codices in Carolingian monasteries.[17] Peter Burke argues that larger cultural ideas about the order of the universe were reified in the organization of libraries during the Renaissance.[18] McKittrick's and Burke's findings support Eviatar Zerubavel's contention that categorization is not an individual cognitive process but rather the result of a complex dynamic of cultural and social forces. At the same time, the categorization process seeks to divide and isolate by “drawing fine lines” among meaning and representations “as if they were discrete, totally detached from their surroundings.”[19]

自中世纪以来，知识的表征或组织，不仅是档案员与图书馆员，也是知识形成者关注的问题。罗莎琳德·麦基特里克识别出，加洛林王朝时期修道院中的手稿与古抄本，采用职能性的整理方式。[17]彼得·伯克认为，文艺复兴时期对于宇宙秩序的宏观文化观念，在图书馆的组织中具体化。[18]麦基特里克与伯克的发现，支持埃维亚塔·泽鲁巴维尔的主张：分类不是个人认知过程，而是文化与社会力量复杂动态作用的结果。同时，分类过程通过在意义与表征之间“划出细致界线”，力图将其分隔与孤立，“仿佛它们是彼此分离、完全脱离周围环境的”。[19]

原书第 153 页 · 对照段落 015

Representational systems are manifestations of both a culture as well as the infrastructure to support that culture. These representations structure later descriptive processes by creating acceptable boundaries of thought and discourse around the practice of archival representation. At the same time, successful representational schemes must support a degree of ambiguity. As Geoffrey Bowker and Susan Leigh Star note, categorizations also need to allow for change, permeability, and different levels of adherence by separate entities in the culture.[20] These variables of culture, identity (variously bringing together and pulling apart), and adaptability to change are seen in the representations of creators that follow.

表征系统既体现一种文化，也体现支持这种文化的基础设施。这些表征在档案表征实践周围建立可接受的思考与话语边界，从而塑造后续描述过程。同时，成功的表征方案必须支持一定程度的模糊性。杰弗里·鲍克与苏珊·利·斯塔尔指出，分类还需要允许变化、渗透性，以及文化中不同实体对分类遵从程度的差异。[20]下文关于形成者表征的例子，将呈现文化、认同——时而聚合，时而分离——以及适应变化等变量。

原书第 153 页 · 对照段落 016

Colin Mackenzie served as a cartographer and surveyor for the East India Company in colonial India in the late eighteenth and early nineteenth centuries. During the course of his thirty-eight-year career in India, he amassed a collection of historical records and artifacts through the employ of other British officials as well as native Indian assistants. Mackenzie's collection of accounts, records, and artifacts is as much a reflection of his own culture as it is a history of the Indian subcontinent he sought to document. Mackenzie's "arrangement of the collection" was passive, although even this affected the records.

十八世纪末、十九世纪初，科林·麦肯齐在殖民时期的印度，为东印度公司担任制图员与测量员。在印度工作的38年间，他雇用其他英国官员及印度本土助手，积累了一批历史文件与物品。麦肯齐所收集的记述、文件与物品，既是他试图记录的印度次大陆的历史，也同样反映他自身的文化。他对馆藏的"整理"是被动的，然而即使如此，也影响了文件。

原书第 153 页 · 对照段落 017

The collection of information meant the appropriation of knowledge in more than just a revenue- related sense. When local documents were collected, authority and authorship were transferred from local to colonial contexts. The different voices, agencies, and modes of authorization that were implicated in the production of the archive got lost once they inhabited the archive.[21]

信息的收集意味着对知识的占有，而且不只是与税收相关的占有。地方文献被收集时，权威与作者身份便从地方背景转移到殖民背景。参与档案生产的不同声音、行动主体和授权方式，一旦进入档案，便消失了。[21]

原书第 153 页 · 对照段落 018

Later organizers of the collection, and there have been several, have further obscured the culture and identity, authority and authorship. Transfer of coherence of the records from the local to the colonial and later to a more historical context resulted in a loss of meaning for the original local creators of the records. Ironically, while the records have been reorganized for repurposing, historians have been trying to reconstruct their original context since Mackenzie's time.

此后不止一位整理者，进一步遮蔽了文化与认同、权威与作者身份。文件的连贯性从地方背景转移到殖民背景，随后又转移到更具历史性的背景，导致文件对于最初地方形成者的意义流失。讽刺的是，虽然文件被重新组织以适应新用途，历史学家自麦肯齐时代以来，却一直试图重建其原初背景。

原书第 153 页 · 对照段落 019

Yet representations can also reflect recoveries of identity. After Vatican II, all religious orders were ordered to revise their constitutions and rules. This process required that religious communities examine their "charism," or the original spirit or vision of the group. As a result, communities rushed to the archives for information, often finding their records in chaos.[22] This connection is explicitly stated in the policies and procedures manual for the Salem Heights Archives.

然而，表征也能体现认同的恢复。第二次梵蒂冈大公会议之后，所有修会都被要求修订宪章与规章。这一过程要求宗教共同体审视自身的"神恩"，也就是群体最初的精神或愿景。因此，各共同体纷纷到档案馆寻找信息，却常常发现文件一片混乱。[22]塞勒姆高地档案馆的政策与程序手册，明确说明了这一联系。

原书第 153 页 · 对照段落 020

Importance: Archives have become particularly important in the post-Vatican II period of history as a source for the process of renewal, enabling Sisters to keep in touch with their roots—historically and spiritually—and ensuring renewal and adaptation within the context of the spirit and history of the Congregation.[23]

重要性：在梵二会议之后的历史时期，档案作为更新过程的资料来源，变得尤其重要；它使修女能够在历史和灵性上与自身根源保持联系，并确保更新和适应在修会精神与历史的背景中进行。[23]

原书第 153–154 页 · 对照段落 021

In order to recover their roots, order was needed in the archives. Although presented as following provenance, a common schema promoted by early instructors of religious archives workshops is more accurately identified as functional in nature. Furthermore, these functions supported the redrafting of religious constitutions and rules. While there are local adaptations in the names of the divisions, the overall structure of the schema mirrors the Dewey decimal system and features nine "record groups" classifications: (1) Founder(s) and Foundation, (2) Chapters, (3) General Superiors, (4) Administration, (5) Treasury/Finance, (6) Provinces, (7) Houses/Missions /Parishes, (8) Formation/Spirituality, and (9) Publications. This is one example of the assertion by James M. O'Toole that religious archives are different in that external, nonarchival beliefs influence the archives.[24] I would go further than O'Toole, who noted that religious archives are different because they are based on denominational identities. In the case of women religious, the archives both helped form or reform a particular religious identity and were then, in turn, reformed by that new identity. One might theorize also that the development and implementation of this schema, which is pervasive in the archives of religious communities, formed a way for religious communities to be in the archival world (avowing to adhere to provenance) but not quite be of that world (developing a peculiar definition of provenance).

为了找回根源，档案需要秩序。早期宗教档案工作坊的讲师推广了一种常见方案，虽然声称遵循来源原则，但更准确地说，其性质是职能性的。此外，这些职能支持了宗教宪章与规章的重新起草。各地对分部名称虽有所调整，方案整体结构却仿照杜威十进分类法，设有九类"全宗"：（1）创始人及创立；（2）修会会议；（3）总会长；（4）行政；（5）财务；（6）会省；（7）会院 / 传教区 / 堂区；（8）培育 / 灵修；（9）出版物。这是詹姆斯·M.奥图尔主张的一个例子：宗教档案具有特殊性，因为外部的、非档案性的信念会影响档案。[24]奥图尔指出，宗教档案之所以不同，是因为它们建立在宗派认同上；我还想进一步说，对于女性修会而言，档案既帮助形成或重塑特定宗教认同，随后又反过来被这种新认同重塑。我们也可以提出理论解释：这种普遍见于宗教共同体档案的方案，其发展与实施，使宗教共同体得以置身档案世界之中——声称遵循来源原则——却又不完全属于这个世界，因为它们发展出一种独特的来源定义。

Creators evolve representational systems for more mundane reasons also. The Henry Ford Office records and the Edsel Ford Office records from the Ford Motor Company Archives, 1914-52 (now housed at The Henry Ford in Dearborn, Michigan) have been organized in several ways over the years. Initially (ca. 1914-21), in the in-house system, every folder reflected a personal or corporate name or a subject heading. In 1919, general folders labeled *A, B, C*, and so on began to appear. These files contain both subjects and personal and corporate names. This early system was apparently derived from Winthrop Sears (of the Sears library cataloging fame). From July 1921 through 1929, the Library Bureau automatic index system was imposed on the files. This was a numerical filing system based on the names of individual correspondents and companies. This was expanded in July 1923, as a result of an expanding amount of incoming mail, by adding more precise subdivisions of personal and corporate names. As the Ford Motor Company records became more complex, yet another expansion of the system occurred in January 1927. Documents were alphabetized according to person or company, although the exact part of the name of a company used for filing is often inconsistent. In this latter system, each alphabetized item is assigned a code: the first part of the code comes from the first letter of the last name of an individual or the first letter of the principal word of the company; the second part of the code comes from the first letter of the first name of the individual or the first letter of the secondary word of the company name. In 1930 the filing system again changed to the Amberg Numerical System. This again created a more complex yet detailed approach to the organization of office records. The Amberg system had greater depth than the Library Bureau system. For example, in the Library Bureau system the letter *A* had five subdivisions, while in the Amberg the letter *A* had forty-three. In the Amberg system, the names of the correspondent, company, or subject were alphabetized using the initial letters, assigned a code number, and filed in the folder of the same number. Thus, relatively unskilled clerks were able to identify the correct files and work swiftly. To foster greater efficiency, the Amberg Company even sold either prelabeled folders or adhesive labels for file folders. With all its detail, though, even the Amberg system was abandoned in 1950 for another in-house system based primarily on the names of correspondents and businesses with limited subject access.[25]

形成者也会出于更日常的原因，发展表征系统。福特汽车公司档案中1914—1952年的亨利·福特办公室与埃德塞尔·福特办公室文件，如今保存在密歇根州迪尔伯恩的亨利·福特博物馆，多年来经历过数种组织方式。最初约在1914—1921年，内部系统中的每个文件夹对应一个人名、公司名称或主题词。1919年开始出现标为A、B、C等字母的综合文件夹，其中同时包含主题、人名和公司名称。这套早期系统显然源自以西尔斯图书馆编目闻名的温思罗普·西尔斯。1921年7月至1929年，文件采用Library Bureau自动索引系统：这是一套依据个别通信者与公司名称的数字归档系统。1923年7月，由于来信数量增多，系统增加了更精确的人名和公司名称细分。随着福特汽车公司文件更加复杂，1927年1月又一次扩展系统。文献按照个人或公司名称的字母顺序排列，然而用于归档的公司名称究竟取哪一部分，往往不一致。在后一套系统中，每个按字母排序的项目都分配一个代码：第一部分来自个人姓氏的首字母，或公司名称主要词的首字母；第二部分来自个人名字的首字母，或公司名称次要词的首字母。1930年，归档系统再次改为Amberg数字系统，形成了一种更复杂、更细致的办公室文件组织方式。Amberg系统比Library Bureau系统更深入。例如，在Library Bureau系统中，字母A有5个细分，而Amberg系统有43个。Amberg系统依据首字母，把通信者、公司或主题名称按字母排序，分配代码编号，并存入相同编号的文件夹。因此，技能相对有限的办事员也能识别正确文件并迅速工作。为提高效率，Amberg公司甚至出售预先标记的文件夹，或文件夹用的粘贴标签。然而，尽管Amberg系统如此细致，它仍于1950年被放弃，改用另一套内部系统，主要依据通信者和企业名称组织，仅提供有限的主题检索。[25]

原书第 154 页 · 对照段落 023

In studies of creators of records (historians and office workers respectively), Barbara Kwansik and Tom Mal-one have examined the representations and categorizations of these individuals.[26] The articles by Kwansik and Malone demonstrate that functionality as well as contextuality (such as an approaching deadline) and spatial orientation (the function of reminding) are key factors in personal representational models of records management. Translating these into archives, where functionality may not be readily apparent and the context is long alienated from records, can pose an impossible obstacle to both identifying and maintaining provenance and representing an original order.

在分别研究历史学家与办公室工作人员这些文件形成者时，芭芭拉·夸恩西克和汤姆·马隆考察了这些个人的表征与分类。[26]二人的文章表明，功能性、背景性——例如迫近的截止日期——以及空间取向——例如提醒的功能——是个人文件管理表征模型中的关键因素。把这些模型转移到档案中，功能可能不再明显，背景也已与文件长期分离，因此对于识别并维持来源，以及表征原有顺序，都可能构成无法克服的障碍。

原书第 154 页 · 对照段落 024

To a certain extent, original order assumes an underlying, coherent filing system. Translating the models of original order, identified by Malone and Kwansik, into the archives where temporality does not lend itself to organizations is difficult. Any transfer into boxes automatically includes a loss of context and provides a substantial obstacle to maintaining provenance and re(presenting) an original order.

在某种程度上，原有顺序假定存在一个潜在、连贯的归档系统。把马隆与夸恩西克识别的原有顺序模型转移到档案中，是困难的，因为在档案中，时间性并不容易成为组织的依据。任何装盒移交都自动伴随背景流失，并对维持来源和重新呈现原有顺序构成重大障碍。

原书第 154 页 · 对照段落 025

As Brothman has noted, when records cross the boundary from office to archives, complexities are muted and an idealized version of original order is often adopted. At times, archivists impose socially constructed schemas on records to provide intellectual coherence.[27] Whether these schemas are the record groups cited by Brothman, subject based, functional, or temporal approaches, they often reflect an imposed information organization that would be alien to the creators and is in no way organic to the originator. With that, let us change our perspective and examine some of these representations by archivists.

正如布罗思曼指出的，当文件跨越从办公室到档案馆的边界时，复杂性被淡化，档案员往往采用原有顺序的理想化版本。有时，档案员给文件施加由社会建构的方案，以提供知识上的连贯性。[27]无论这些方案是布罗思曼所说的全宗，还是基于主题、职能或时间的方法，它们往往反映一种被施加的信息组织方式，对形成者而言陌生，绝非从形成者那里有机产生。接下来，让我们转换视角，考察其中一些由档案员作出的表征。

## Representations of Archivists
## 档案员的表征

原书第 154–155 页 · 对照段落 026

Within the broad dictum of archival principles and practices, there appears to be substantial variation in the organizational and classification schemes. Furthermore, the social, cultural, political, and economic factors influencing the development of these schemes are very diverse. Recent efforts to define and design more collective representational schemes, such as MARC and EAD in the United States, have tried to both establish minimal standards and accommodate some differences. Geoffrey Bowker and Susan Leigh Star refer to this process as convergence. Convergence is the double process by which information artifacts and social worlds are fitted to each other and come together.[28] Understanding this convergence, both in terms of overall archival organizational schemes and in terms of the information artifacts (e.g., MARC records and EAD finding aids) represented within these schemata, is essential for the creation of surrogates that have meaning in other social systems and transcend time and space.[29] Mediating between original artifacts and archival representations can be difficult, particularly over time.

在档案原则与实践的宽泛准则之内，组织与分类方案似乎有相当大的差异。此外，影响这些方案发展的社会、文化、政治与经济因素，也极为多样。近年来，界定和设计更具共同性的表征方案，例如美国的MARC与EAD，既试图建立最低标准，也试图容纳某些差异。杰弗里·鲍克与苏珊·利·斯塔尔把这一过程称为趋同。趋同是信息产物与社会世界相互适应并结合的双向过程。[28]无论从整体档案组织方案，还是从这些方案中呈现的信息产物，例如MARC记录与EAD检索工具，来理解这种趋同，对于创造在其他社会系统中有意义、并能跨越时间与空间的替代性描述，都至关重要。[29]在原始物品与档案表征之间进行中介，可能很困难，尤其经过时间推移之后。

原书第 155 页 · 对照段落 027

In the United States, the theory and practice of representation focused initially on what were considered historical manuscripts. Historical manuscripts covered both personal papers and organizational records since the organizational records under consideration had been alienated from their originating body. One early attempt to standardize the representation was by J. C. Fitzpatrick at the Library of Congress. His *Notes on the Care, Cataloging, Calendaring and Arranging of Manuscripts* was first published in 1913. By the third edition in 1928, he had developed representational guidelines and assumptions. One implicit assumption is that rearrangement is usually necessary to counter not only the “derangement” of documents but also the repurposing (or changing functionality) of records as they move from administrative to historical use.

在美国，表征理论与实践最初关注被视为历史手稿的材料。历史手稿既包括个人文件，也包括组织文件，因为所考察的组织文件已经脱离形成机构。美国国会图书馆的J.C.菲茨帕特里克，曾早期尝试使表征标准化。他的《手稿保管、编目、编制提要目录与整理札记》，于1913年首次出版。到1928年的第三版，他已经发展出表征的指导原则与假设。其中一个隐含假设是，通常有必要重新整理，不仅是为纠正文献的“失序”，也为适应文件从行政用途转向历史用途时的用途重置，或功能变化。

原书第 155 页 · 对照段落 028

Official papers under the control of the archivist come to him usually with an arrangement and indexing born of administrative necessity, and in no wise competent to answer the needs of the historical investigator. Useless and faulty as such an arrangement may be for students of history and economics, it is well to allow it to stand until such time as the rearrangement scheme has been thoroughly worked out.[30]

移交档案员管理的官方文件，通常带着出于行政需要形成的排列与索引，而它们完全无法满足历史研究者的需要。即使这种排列对于历史与经济研究者毫无用处且存在缺陷，也最好暂时保留，直到重新整理方案得到充分制定。[30]

原书第 155 页 · 对照段落 029

A tension in Fitzpatrick's treatise is the inability to reconcile the representation of the broader arrangement scheme with the very detailed description of items. Fitzpatrick argues for the use of an itemized listing (calendar) or card catalog to describe the contents, whereas the overall arrangement that is seen by the researcher as he or she peers into the box is meant to explicate context and establish the relationships among the materials. However, it appears that the necessities of arrangement and future location of the papers were paramount.

菲茨帕特里克论述中的一个张力，是无法协调更大尺度整理方案的表征与极为详细的单件描述。他主张使用逐件清单，即提要目录，或卡片目录描述内容；而研究者查看盒内材料时所见的整体排列，则应说明背景，并建立材料间的关系。然而，整理和日后定位文件的需要，似乎仍居于首要地位。

原书第 155 页 · 对照段落 030

The impetus for expediency in the creation of early representational systems can be illustrated through the manuscript collections in the Houghton Library at Harvard. Collections are categorized by “shelf marks” primarily according to language or country, but also by subject, collectors, or library department. This classification scheme is further elaborated for convenience:

哈佛大学霍顿图书馆的手稿馆藏，可以说明创建早期表征系统时追求便利的动力。馆藏通过“架位标记”分类，主要依据语言或国家，也依据主题、收藏者或图书馆部门。为方便使用，这一分类方案还进一步作了细化：

原书第 155 页 · 对照段落 031

Manuscripts are classed as *MS*, generally a manuscript that stands independently on the shelf as a codex; *fMS*, a MS taller than 12 inches; *pfMS*, an oversized MS; or *bMS*, boxed manuscripts generally loose papers in folders. For example, bMS AM 1704 (945) no. 6 is a letter from James Walker to John Gorham Palfrey, the sixth chronologically of twenty grouped as the 945$^{th}$ item or group in American boxed manuscripts 1704$^{th}$ American manuscript or collection of manuscripts to have been catalogued in this series [italics original].[31]

手稿分为MS，通常指可作为一册古抄本独立置于书架上的手稿；fMS，指高度超过12英寸的手稿；pfMS，指超大尺寸手稿；以及bMS，指装盒手稿，通常是文件夹中的散页。例如，bMS AM 1704 (945) no. 6，是詹姆斯·沃克写给约翰·戈勒姆·帕尔弗雷的一封信。它是按时间排列的一组20封信中的第6封；这一组信是美国装盒手稿中的第945个单件或组，而1704表示在该系列中编目的第1704份美国手稿或手稿集合 [ 斜体见原文 ] 。[31]

原书第 155 页 · 对照段落 032

Also of note here is the construction of the shelf marks. While these serve the researcher by creating unique, identifiable call numbers to use when requesting a collection, they also contain essential information for the archivist to use in managing and locating the collection. In one case the categorization has persisted long after the original reason for the designation has ended:

这里同样值得注意的是架位标记的构造。这些标记为研究者提供申请馆藏时使用的独特、可识别索取号，同时也包含档案员管理和定位馆藏所需的重要信息。有一个例子表明，某种分类在最初设立理由早已消失后，仍持续存在：

原书第 155 页 · 对照段落 033

Earlier in this century it was the practice of Harvard's manuscript cataloguers to reserve the shelf numbers MS 800.1 etc., for small collections kept in manuscript boxes of a certain size. Many of these “800” numbers still survive, although the reason for them disappeared when the collection was rehoused in boxes of uniform size.[32]

本世纪较早时期，哈佛手稿编目员惯常把MS 800.1等架号，保留给装在特定尺寸手稿盒中的小型馆藏。许多这样的“800”编号至今仍存在，尽管馆藏重新装入统一尺寸的盒子后，设立这些编号的理由已不复存在。[32]

原书第 155 页 · 对照段落 034

Archival codes are ubiquitous. In addition to the manuscript numbers at Harvard, there are several other designations that serve as location devices as well as provide collection management information. Accession numbers record the yearly growth of an entire archives or manuscript collection. Storage numbers connote incompletely processed collections. Call numbers reflect an attempt to incorporate the materials in a larger library classification scheme. And finally, some collections are simply called by their names.[33]

档案代码无处不在。除了哈佛的手稿编号，还有数种标识，既用于定位，也提供馆藏管理信息。接收号记录整个档案或手稿馆藏每年的增长；存储号标示尚未完成整理的馆藏；索取号反映把材料纳入更大图书馆分类方案的尝试。最后，有些馆藏则直接以名称称呼。[33]

原书第 155–156 页 · 对照段落 035

As demonstrated in the preceding, archival representational systems do evolve. When, if, and how that evolution is presented has always created a problem for archivists. The maintenance of older inventories can also be seen as a form of archival pentimento, the (rediscovery of a representation underlying a newer one. Archival accountability and the ability to reverse the archivist's judgment and arrangement are perhaps behind Fitz-patrick's directive to maintain older representational tools.

如前文所示，档案表征系统确实会演变。但是否呈现、何时呈现、如何呈现这种演变，始终给档案员带来问题。保存旧目录，也可以看作一种档案的“底层旧痕”（pentimento），即重新发现隐藏在较新表征之下的旧表征。菲茨帕特里克要求保留旧表征工具，背后的原因或许是档案问责，以及使档案员的判断与整理可以被撤回的能力。

原书第 156 页 · 对照段落 036

The official indexes and finding-list catalogues of such collections should always be preserved no matter how useless they may seem after the rearrangement of the papers. If these indexes are bulky and space consuming, they may be condensed by a group classification or outline record, for archival consultation, before being sent to the storage basement. It is the part of wisdom to leave their destruction to the next generation.[34]

这类馆藏的官方索引和检索目录，应始终保存，无论文件重新整理后，它们看起来多么无用。如果这些索引体积庞大、占用空间，可以在送入地下储藏室之前，以分类提纲或概要记录加以浓缩，供档案员查阅。把销毁的决定留给下一代，是明智的做法。[34]

原书第 156 页 · 对照段落 037

While Fitzpatrick urges the archivist to keep copies of older representational tools for his or her own consultation, some archives openly provide these to researchers. The finding aid to the Roy Dikeman Chapin Papers at the Bentley Historical Library on the University of Michigan campus is a typical example of an evolutionary finding aid. There is no pentimento here. Multiple narratives are allowed to coexist, although their order gives some preference over others. Roy Dikeman Chapin was president of the Hudson Motor Car Company and briefly served as U.S. secretary of commerce, 1932-33. His papers arrived at the Bentley in several accessions. The earliest and largest acquisition occurred in 1940. Throughout the past sixty years, the Chapin papers have been represented by a variety of representational tools: two version of cards in the card catalog, two versions of the finding aid, and three versions of MARC records.

菲茨帕特里克敦促档案员保留旧表征工具的副本，供自身参考，而有些档案馆则公开向研究者提供这些工具。密歇根大学本特利历史图书馆的罗伊·戴克曼·查平文件检索工具，是演变式检索工具的典型例子。这里没有被遮盖的底层旧痕，多重叙事获准并存，虽然其排列顺序给予某些叙事更高优先地位。查平曾任哈德逊汽车公司总裁，并于1932—1933年短暂担任美国商务部长。他的文件分数次进入本特利馆；最早、规模最大的一次征集发生于1940年。在过去60年间，查平文件通过多种工具呈现：卡片目录中的两个版本、检索工具的两个版本，以及MARC记录的三个版本。

原书第 156 页 · 对照段落 038

The earliest finding aid for the Roy Dikeman Chapin Papers is a twenty-seven-page document that begins with a half-page narrative description of the contents. The remainder of the finding aid is an inventory/calendar of selected letters, reports, and so forth. The selection criteria used to select these items is not stated. The selections are eclectic, and not all of the documents from any subject are fully identified. The descriptions of items are fairly terse, although the archivist did tarry long enough to judge a few as “interesting.” The narrative itself also suggests the most fruitful research topics in the collection.[35]

最早的查平文件检索工具，是一份27页的文献，开头用半页叙述性文字描述内容，其余是精选信件、报告等的目录或提要目录。选择这些项目所用的标准未作说明。选择内容杂多，任何主题下的文献也都未被全部完整识别。单件描述相当简短，不过档案员仍停留得足够久，将其中几件评为“有趣”。叙述本身也推荐了馆藏中最有成果潜力的研究主题。[35]

原书第 156 页 · 对照段落 039

This initial finding aid appears to be the source of the first set of catalog cards. On these catalog cards, the selection of materials on the finding; aid was further pared down, and individual cards were typed with summary information for each item, organized by correspondent. These cards, though, also contain other information, largely coded. The catalog cards contain the location information and the donor number(s). I say *coded* because although the call numbers are placed in the location on the card associated with call numbers, their format is unique. The other codes refer to donor numbers, which were not indicated on the first finding aid.

这份最初检索工具，似乎是第一套目录卡片的来源。卡片把检索工具中的材料选择进一步删减，按通信者组织，为每件材料打出概要信息。不过，卡片还包含其他信息，大多以代码形式出现，包括位置和捐赠者编号。我说是代码，因为虽然索取号放在卡片通常放索取号的位置，但其格式却很独特。其他代码指捐赠者编号，而第一份检索工具并未注明这些编号。

原书第 156 页 · 对照段落 040

The current finding aid follows a modern form with which most archivists will be familiar. It is six pages, half of which contain contextual, authority, and descriptive data. The finding aid provides more detailed acquisitions information. Also, it provides a higher-order contextualization or summary of the materials, identifying and describing the overarching series schema. The remaining three pages provide brief descriptions on the box level noting the series and then the chronological period contained in each box. Neither finding aid has a specific authorial attribution, although the later finding aid notes that the collection was processed by the “Michigan Historical Collections staff.” Other changes in the finding aid demonstrate dynamism in the collection: the inclusive dates have been changed and, accordingly, the physical extent or amount has increased.[36]

现行检索工具采用大多数档案员熟悉的现代形式，共6页，其中一半包含背景、规范与描述数据。它提供更详尽的征集信息，也在更高层面交代材料背景或进行概括，识别并描述总体系列方案。其余3页提供盒级简要描述，指出系列，以及每盒包含的时间范围。两份检索工具都没有明确署名，尽管后一份注明馆藏由“密歇根历史馆藏工作人员”整理。检索工具的其他变化也显示馆藏的动态性：起止年代改变了，实体规模或数量也相应增加。[36]

原书第 156 页 · 对照段落 041

This modern finding aid is also the basis for other current representations of the collection: an EAD finding aid and MARC records in two separate bibliographic networks—the Online Computer Library Center (OCLC) and the Research Libraries Information Network (RLIN). The MARC records are similar, containing identical content, but the order of information elements varies. Ironically, one of the salient features of the scope note, the higher- level summarization of the papers into series, is missing from the networked bibliographic descriptions. The collection summary focuses on genre terms and the identities of correspondents. Contextual information is also absent: the detailed biography in the finding aid is replaced by a two-line synopsis of Chapin's crowning achievements. This creation of MARC records has also led to the re-creation of the new catalog cards. The original catalog cards were photocopied and inserted in the back of the finding aid. The new cards, though, lack the distinctiveness of the old cards. While correspondents are listed individually, each card is the same, with only the subject or correspondent's name changed at the top of the card.

这份现代检索工具，也是馆藏其他现代表征的基础：一份EAD检索工具，以及两个不同书目网络——联机计算机图书馆中心（OCLC）与研究图书馆信息网（RLIN）——中的MARC记录。MARC记录相似，内容相同，但信息要素的顺序不同。讽刺的是，范围说明的一个显著特点，即将文件在更高层面概括为系列，在网络书目描述中缺失了。馆藏概要集中于文献体裁术语与通信者身份。背景信息同样缺失：检索工具中的详尽传记，被两行概括查平最大成就的文字取代。MARC记录的创建，也促成了新目录卡片的重新制作。原来的卡片被复印，插在检索工具后面。然而，新卡片缺少旧卡片的独特性。虽然通信者分别列出，每张卡片却都一样，只改变顶端的主题或通信者姓名。

原书第 156–157 页 · 对照段落 042

The EAD finding aid also mirrors the paper or analog one but makes some small, but significant, modifications.[37] The series identification is partially separated from the scope and contents note, and this note begins with a global summary for the first time followed by the series descriptions. The series descriptions are repeated within the actual contents list. Copyright information is also included in this representation.

EAD检索工具也对应纸质或非数字版本，但作出了一些细小而重要的修改。[37]系列标识部分地从范围与内容说明中分离出来，该说明首次以整体概要开头，随后是系列描述。系列描述在实际内容清单中又重复出现。这种表征还包含版权信息。

原书第 157 页 · 对照段落 043

The guides to the Chapin collection do form a coherent whole. Each contributes some piece toward a better understanding of the Chapin papers. But, the representations also present different perspectives. Taken together one has the feeling of viewing something through different lenses: some providing broad aerial views, others small slices of information. What do researchers make of all this information about the Roy Dikeman Chapin collection? Do researchers appreciate the technologies and processes that resulted in those new cards in the catalog, the finding aid at the front of the binder, or the online EAD finding aid? Do they know they are looking at over half a century of archival technology, waiting there for them to discover/recover? Are all the representations valuable? Do they realize the representations refer to the same, albeit evolving, artifact?

查平馆藏的各项指南确实构成一个连贯整体，每一种都提供某些信息，帮助更好地理解查平文件。但各项表征也呈现不同视角。合起来看，人会有一种通过不同镜头观察事物的感觉：有些提供广阔的俯瞰，有些只提供小片信息。研究者如何理解关于查平馆藏的全部信息？他们是否理解那些产生目录中新卡片、活页夹最前面的检索工具，或网络EAD检索工具的技术与过程？他们是否知道，自己正在面对超过半个世纪的档案技术，等待他们去发现或重新发现？所有表征都有价值吗？他们是否意识到，这些表征指向同一个不断演变的对象？

原书第 157 页 · 对照段落 044

Another form of archival pentimento asserts itself when collections are rearranged in an attempt to re-present the creator's original order. One example of this is the Alexander Winchell Papers at the Bentley Historical Library. Winchell, a professor of geology and paleontology at the University of Michigan and later chancellor of Syracuse University, meticulously arranged his records into 284 volumes that were numbered. The meticulousness with which he arranged and categorized things is apparent today in a volume documenting his library.[38] Winchell's order of his records, though, has long since vanished. An archivist originally reorganized the Winchell papers in the 1930s using size more than content or original order as a guide.[39] In 1940, abstracts of selected letters were completed.[40] In 1992, the collection was reorganized, and most of the original order was restored. Still, the collection is organized as much by form or material or genre as it is by Winchell's order. Ironically, or perhaps in a continued attempt to assert itself, many volumes continue to bear Winchell's numerical identification. Additionally, the 1992 finding aid features a concordance between the current box numbers and the 1930s imposed volume and folder numbers. As a result, the collection is encoded in both by the creator and then recoded or decoded by successive archivists.[41]

当馆藏为重新呈现形成者的原有顺序而重新整理时，另一种档案底层旧痕便显现出来。本特利历史图书馆的亚历山大·温切尔文件就是一例。温切尔曾任密歇根大学地质学与古生物学教授，后来担任雪城大学校长；他把自己的文件精细整理为284个有编号的册卷。他整理和分类事物的细致程度，今天仍可从记录其私人图书馆的一卷材料中看出。[38]但他对文件的排列顺序，早已消失。1930年代，一位档案员最初重新组织温切尔文件，主要以尺寸，而不是内容或原有顺序为依据。[39]1940年，精选信件的摘要编写完成。[40]1992年，馆藏再次重新组织，大部分原有顺序得到恢复。然而，馆藏的组织既遵循温切尔的顺序，也同样依据形式、材料或体裁。讽刺的是，或者说作为持续坚持自身存在的一种方式，许多册卷仍保留温切尔的编号。此外，1992年检索工具收有现行盒号与1930年代施加的卷号、文件夹号之间的对应表。因此，馆藏既由形成者编码，随后又被历任档案员重新编码或解码。[41]

Rearrangement and representation by the archivist may also be a technological imperative. Archbishop of Cincinnati John B. Purcell's letters were apparently stored in an antique pigeon-holed case and arranged alphabetically. The name of the correspondent and the date were clearly marked on the back of each letter.[42] In the process of archivalization this original order was represented to fit into the standard, sterile, technology of the archives—the document box. While representing the records in archival boxes is of course an administrative necessity and archivists eschew becoming curators of technology museums (either of past or future digital technological systems), this is a reminder of how archivists can alter representational systems and at the same time maintain the original order (in this case alphabetical). Representational and record-keeping systems are fragile and extend beyond order and organization and into the context of the creator, the creator's culture, and the technologies that bind them together.

档案员的重新整理与表征，也可能是技术所迫。辛辛那提总主教约翰·B.珀塞尔的信件，显然原先存放在一个老式鸽笼格柜中，按字母顺序排列，每封信背面清楚标出通信者姓名与日期。[42]在档案化过程中，这种原有顺序被重新呈现，以适应档案馆标准化、毫无生气的技术——档案盒。当然，将文件置于档案盒中是一种管理需要，档案员也不愿成为技术博物馆的馆长，无论展示的是旧技术，还是未来数字技术系统；但这提醒我们，档案员能够在保持原有顺序的同时，改变表征系统，本例保留的就是字母顺序。表征与文件管理系统是脆弱的，它们不仅涉及排列与组织，还延伸到形成者的背景、文化，以及把这些因素结合起来的技术。

## Representational Systems
## 表征系统

原书第 157 页 · 对照段落 046

Representational artifacts (such as finding aids, inventories, and index cards) form larger representational schemata that are implemented in archives using a variety of technologies or tools. In the evolution of these technologies, archivists have moved through a number of different genres in attempting to discover (recover) the most appropriate representational systems for archival and manuscript collections. Archivists have employed card catalogs, calendars, shelf lists, finding aids, subgenres of finding aids encoded in Hypertext Markup Language (HTML) and Standardized General Markup Language (SGML)/extensible Markup Language (XML)/ EAD, and finally derivatives of finding aids: MARC records to manage and to provide access to collections. Each of these represents a different technology and a different philosophical approach to privileging information, emphasizing information, and the level of granularity of the information. Steven L. Hensen discusses these forms and their inherent differences.[43] In spite of all of these genres of access tools, over the past twenty years the finding aid has emerged as the “canonical form” of archival representation in the United States. I explore two genres that have become increasingly interrelated: card catalogs and finding aids (and briefly touch on their associated subgenres and manifestations). These two genres of archival representational tools are both discussed because of their interconnections and, in some historical cases, dependency upon one another.[44]

检索工具、目录和索引卡片等表征产物，构成更大的表征方案，档案馆通过各种技术或工具实施这些方案。在技术演变中，档案员尝试寻找或重新发现最适合档案与手稿馆藏的表征系统，经历了数种不同体裁。他们采用过卡片目录、提要目录、架位目录、检索工具、以超文本标记语言（HTML）和标准通用标记语言（SGML）/ 可扩展标记语言（XML）/ EAD编码的检索工具子类型，以及最后由检索工具派生的MARC记录，以管理馆藏并提供利用。每一种都代表不同技术和不同哲学方法：哪些信息优先、强调什么信息，以及信息达到何种细致程度。史蒂文·L.亨森讨论了这些形式及其内在差异。[43]尽管存在这些不同体裁的检索工具，过去20年间，检索工具已在美国成为档案表征的“典范形式”。我将考察两种日益相互关联的体裁：卡片目录与检索工具，并简要涉及相关子类型与表现形式。讨论这两类档案表征工具，是因为它们相互关联，而且在某些历史情境中彼此依赖。[44]

### *Card Catalogs*
### 卡片目录

原书第 157–158 页 · 对照段落 047

Nicholson Baker laments the demise of card catalogs in libraries.[45] The aura of and intense feelings about these card catalogs appear to have permeated the culture. In 1990, artist David Bunn took possession of the two million cards in the Los Angeles Central Library's catalog. Last year, Bunn used the catalog cards to create installations of poems formed by juxtaposing the cards in different ways. In the words of one reviewer:

尼科尔森·贝克哀叹图书馆卡片目录的消亡。[45]围绕这些卡片目录的光环与强烈情感，似乎已经渗透到文化之中。1990年，艺术家大卫·邦恩接收了洛杉矶中央图书馆目录中的200万张卡片。去年，他用不同方式并置目录卡片，创作由诗歌构成的装置艺术。一位评论者这样写道：

原书第 158 页 · 对照段落 048

He has paid loving attention to them ever since, embracing their physicality, age, and obsolescence. He spins poems from the titles running across the tops of the cards, honors the catalog's systemic order and succinct formality, and credits the catalog with personality, history, ideology, and even an unconscious.[46]

此后，他一直满怀爱意地关注它们，欣然接受它们的物质性、年代与过时状态。他从卡片顶端的一行行标题中编织诗歌，尊重目录的系统性秩序和简洁的形式规范，并赋予目录人格、历史、意识形态，甚至无意识。[46]

原书第 158 页 · 对照段落 049

Richard J. Cox, Jane Greenberg, and Cynthia Porter, however, provide a broader perspective and examine card catalogs as an essential part of library history, particularly the history of the applications of technology in libraries.[47] Unlike libraries, many card catalogs in archival and manuscript repositories are still in use, although some have been totally replaced by and subsumed by cards generated through new technologies, as in the case of the Chapin papers. Studies are needed to examine the nature of card catalogs for manuscript repositories and archives and the social systems in which they were created.

不过，理查德·J.考克斯、简·格林伯格和辛西娅·波特提供了更广阔的视角，将卡片目录视为图书馆史，尤其图书馆技术应用史的重要组成部分。[47]与图书馆不同，许多档案与手稿保存机构中的卡片目录仍在使用，尽管其中一些已像查平文件的情况那样，被新技术生成的卡片完全替代并吸收。需要研究手稿保存机构及档案馆卡片目录的性质，以及它们形成于其中的社会系统。

原书第 158 页 · 对照段落 050

The continuing relevance of using card catalogs in archives is apparent throughout the Houghton Library's handlist. Researchers are constantly directed to various card catalogs as a first step in gaining access to collections. For example, a note concerning the James Family Papers indicates that “all available aids must be used: catalogue cards, pink slips, and both new and old indexes.”[48] Yet even this card catalog has changed over the years. As with most manuscript catalogs, cards originally represented individual items. Beginning in 1984, collection-level descriptions began to be prepared for large collections. At the same time, the practice of not assigning subject headings persisted. Cards were made for all correspondents and addressees as well as for selected genres of records (e.g., diaries). Interestingly these practices appear to have continued into the online public access catalog (OPAC) and its successor the integrated library system (ILS).

霍顿图书馆的简明目录处处显示，在档案中使用卡片目录仍然有意义。研究者不断被引导到不同卡片目录，以此作为获取馆藏的第一步。例如，关于詹姆斯家族文件的一则说明指出：“必须使用所有可用工具：目录卡片、粉红纸条，以及新旧两套索引。”[48]但即使这套卡片目录，多年来也发生了变化。如多数手稿目录一样，卡片最初对应单件材料。从1984年开始，大型馆藏开始编制馆藏级描述。同时，不赋予主题词的做法仍然持续。档案员为所有通信者和收信人，以及某些选定文件体裁，例如日记，制作卡片。有趣的是，这些做法似乎一直延续到联机公共检索目录（OPAC），及其后继的集成图书馆系统（ILS）。

原书第 158 页 · 对照段落 051

Richard C. Berner examined the relationship between card catalogs and finding aids in an attempt to identify archives with integrated descriptive systems. In a 1971 survey, he found little integration, only four out of forty- four respondents consciously used the card catalogs as an entry point (index) into the finding aids—although an additional sixteen respondents noted that the card catalog could be used that way. In conclusion, Berner notes “that function [an integrated index to the finding aids] of the catalog, however, seemed to have been discovered rather than preconceived.” Apparently archivists' lack interest in reflecting on their representational artifacts and systems is not new.[49]

理查德·C.伯纳考察卡片目录与检索工具的关系，试图识别采用整合描述系统的档案馆。在1971年的调查中，他发现整合很少：44名受访者中，只有4人有意识地将卡片目录作为进入检索工具的入口，即索引；另有16人表示，卡片目录可以这样使用。伯纳最后指出：“然而，目录的这种功能 [ 作为检索工具的整合索引 ] ，似乎是后来发现的，而非预先构想的。”显然，档案员缺乏反思自身表征产物与系统的兴趣，并非新现象。[49]

### *Finding Aids*
检索工具

原书第 158 页 · 对照段落 052

Finding aids are the canonical form for current archival access for researchers. At the same time, they act as collection management tools for archivists.[50] They have achieved the status of a canonical form because they are the basis for other representations, such as MARC records and other various forms of networked information exchange (online finding aids).[51] In other words, finding aids are representations of archival records and papers that are in turn used as a basis for the creation of other, second-order representations. It is significant to note that even in the digital environment (such as in EAD), archivists treat the finding aid as a document genre rather than as a set of discrete data elements. One consequence of this focus on the finding aid as document genre has been the slow development of uniquely digital representations for archival representations. The concentration on finding aid as document rather than as one of many potential representations of discrete data elements has also led to problems of reusing archival data across the archival continuum and problems in the development of true collection management systems for archives.[52]

检索工具是当前研究者获取档案的典范形式。同时，它们也是档案员的馆藏管理工具。[50]它们之所以获得典范地位，是因为构成其他表征的基础，例如MARC记录，以及其他不同形式的网络化信息交换，即在线检索工具。[51]换句话说，检索工具是档案文件与个人文件的表征，而它们又被用作创建其他第二层次表征的基础。值得注意的是，即使在EAD等数字环境中，档案员仍把检索工具视为一种文献体裁，而不是一组离散数据要素。把检索工具视为文献体裁的后果之一，是专属于数字环境的档案表征发展缓慢。将其集中理解为文献，而不是离散数据要素众多潜在表征中的一种，也导致沿档案连续体复用档案数据时出现问题，并妨碍真正档案馆藏管理系统的发展。[52]

原书第 158 页 · 对照段落 053

In the United States, finding aids have evolved throughout the twentieth century. In the past twenty years, the pace of this evolution has quickened. In this evolution, the information elements within finding aids that facilitate access (historical or biographical information, scope and contents notes, series descriptions, subject analysis) as well as those that support collection management (accession information, processing attribution, call numbers) have emerged and are now somewhat standardized. Still, the creation of finding aids, and with it the promise or potential of access, is inherently a political act. In order to better understand the underlying social systems behind finding aids, four aspects are explored: creation, construction, components, and consequences.

在美国，检索工具在整个二十世纪持续演变，过去20年间，演变速度加快。其间，促进利用的信息要素——历史或传记信息、范围与内容说明、系列描述、主题分析——以及支持馆藏管理的信息要素——接收信息、整理者署名、索取号——逐渐出现，如今已在某种程度上标准化。然而，检索工具的创建，以及随之而来的开放承诺或可能性，本质上仍是一种政治行为。为更好地理解其背后的社会系统，下面考察四个方面：创建、构造、组成部分及后果。

### *Creation of Finding Aids*
### 检索工具的创建

原书第 158–159 页 · 对照段落 054

There are several aspects of creation that appear to be most salient. The first is authorship and with it authority. The second is that just as the finding aid as a genre is evolving, individual finding aids themselves evolve, and this can be traced through their fluid authorship. Finding aids are dynamic documents. A third point is the relationship between creation and access.

创建中的几个方面似乎最为突出。首先是作者身份及其伴随的权威。其次，正如检索工具作为一种体裁在演变，个别检索工具自身也会演变，而这种变化可以通过其流动的作者身份追踪。检索工具是动态文献。第三点是创建与利用之间的关系。

原书第 159 页 · 对照段落 055

The relationship between authorship and authority of finding aids is critical for both archivists and researchers. Many finding aids lack overt attribution. However, this cannot be taken to be an indication that they lack authority. Since they act as both collection management and access tools, finding aids embody several different types of authority. For archivists, the finding aid contains authority control data. For example, the biographical or organizational history note is the authoritative source for quick summary information on institutional entities and individuals. For researchers, the presence and placement of the finding aid in the archives is an implicit sign of authority. Additionally, for researchers, the finding aid is the most (although not necessarily a good) authoritative source of knowledge about a collection. Are finding aids worthy of this vesting of authority? Exactly what is the nature of this authority?

检索工具作者身份与权威之间的关系，对于档案员和研究者都极为重要。许多检索工具没有明确署名，但不能据此认为它们没有权威。由于兼具馆藏管理与检索工具的功能，它们体现数种不同权威。对于档案员，检索工具包含规范控制数据，例如传记或机构历史说明，是迅速获得机构与个人概要信息的权威来源。对于研究者，检索工具在档案馆中的存在及位置，是权威的隐含标志。此外，检索工具还是了解馆藏最具权威性的来源，尽管未必是良好的来源。检索工具是否值得被赋予这种权威？这种权威究竟是什么性质？

原书第 159 页 · 对照段落 056

The most immediate source of this authority is the author. Authorial influence and attribution of finding aids deserve greater attention. Richard J. Cox, among others, has argued that appraisal decisions should be attributed.[53] His arguments also apply to finding aids. Attribution and perhaps even the addition of the authors' biographies is essential contextual information for researchers in evaluating the authority and perspective of the finding aid. The dynamism of finding aids (and the underlying collections that they represent) can also be traced through the authors. For example, the Rensis Likert finding aid at the Bentley Historical Library indicates its authors over time: “Thomas Powers, 1975; Avra Michelson, 1982; Brian Williams, 1990; and Mike Brostoff, May 1995.”[54] In this case, the authors should not be viewed as a group of disparate individuals simply adding descriptions of materials to an existing finding aid but as an intellectual tradition.

这种权威最直接的来源，是作者。检索工具中作者的影响与署名，值得更多关注。理查德·J.考克斯等人主张，鉴定决定应注明责任者。[53]这一论点也适用于检索工具。对于研究者评估检索工具的权威与视角，署名，甚至附加作者传记，都是必要的背景信息。检索工具及其所表征馆藏的动态性，也可以通过作者来追踪。例如，本特利历史图书馆的伦西斯·利克特检索工具，列出了历时作者：“Thomas Powers，1975；Avra Michelson，1982；Brian Williams，1990；Mike Brostoff，1995年5月。”[54]在此，作者不应被看作一群彼此无关、仅仅给现有检索工具添加材料描述的人，而应被视为一种知识传统。

原书第 159 页 · 对照段落 057

The distributed networked environment has resulted in distributed authorship. Now two separate archivists can claim authorship: one for the original analog representation of the finding aid and another for the second-order representation, the EAD finding aid. Interestingly, the second-order author may be more visible. In the case of the Trotsky Collection at the Hoover Institution on War, Revolution and Peace at Stanford University, the finding aid notes that the collection was generically “Processed by: Hoover Institution Staff” but “Encoded by: Hernán Cortés.”[55] Encoding finding aids is not always a routine matter. Information is moved around, assumptions are made about administrative as well as descriptive information, and other liberties are taken with the original text and structure of the finding aid.[56]

分布式网络环境产生了分布式作者身份。如今，两位不同档案员都可以主张作者身份：一位负责检索工具最初的非数字表征，另一位负责其第二层次表征，即EAD检索工具。有趣的是，第二层次作者可能更加显眼。在斯坦福大学胡佛战争、革命与和平研究所的托洛茨基馆藏中，检索工具笼统注明“整理者：胡佛研究所工作人员”，却明确注明“编码者：Hernán Cortés”。[55]检索工具编码并不总是例行工作：信息会被移动，行政与描述信息会被赋予某些假设，原文与结构也会受到其他自由处理。[56]

原书第 159 页 · 对照段落 058

Another confounding element concerning the creation of finding aids is that although archivists like to think that they are the sole creators of finding aids, they are not. For example, the Trotsky Collection, compiled by the Socialist Workers Party and now housed at the Hoover Institution, contains a guide to the letters by Leon Trotsky in the Exile Papers section of the Leon Trotsky papers at Harvard University.[57] Interestingly, there is more information concerning this correspondence available through the Hoover Institution than through Harvard University. A number of alternative indexes to records in the Vatican Archives have also been published. Some of these have met with the blessing of the archives staff, while others have not.[58] What drives the creation of these competing metanarratives or finding aids? Is it a desire for more detailed information? Is it the desire to liberate information?

有关检索工具创建的另一个复杂因素，是虽然档案员喜欢认为自己是唯一的创建者，实际上并非如此。例如，由社会主义工人党汇编、现藏胡佛研究所的托洛茨基馆藏，包含一份指南，指向哈佛大学列昂·托洛茨基文件中“流亡文件”部分的托洛茨基信件。[57]有趣的是，通过胡佛研究所可获得的这些信件信息，比通过哈佛大学获得的更多。梵蒂冈档案的若干替代性索引也已出版，其中一些获得档案工作人员认可，另一些没有。[58]什么驱动这些相互竞争的元叙事或检索工具的创建？是需要更详细的信息，还是希望解放信息？

### *Construction of Finding Aids*
### 检索工具的构造

原书第 159 页 · 对照段落 059

Finding aids did not always look the way they do today. Thirty years ago, now familiar information, such as scope and contents notes and biographical and historical data, was absent. Finding aids were extended inventory lists that detailed folders, and often items. The representational goal was the explication of the arrangement. Currently, entirely different information elements are emphasized. Proportionally, biographical and historical sketches and contents notes can take up more space than the folder listing. This addition of the historical and biographical notes signals the emerging emphasis on representing context. Both the access and the collection management data now represented in finding aids support this change. Likewise, the inclusion of scope and contents notes and series descriptions demonstrates two trends. One trend is the rise of more global or collection-level synthesis of collection contents. The second trend is characterized by the decreasing granularity of the contents descriptions. Instead of item-by-item lists, the contents are represented by an inventory of boxes or folders, with a genre designation and broad dates of materials in the folder. One could argue that the granularity and specificity have moved from the contents list to the front matter (e.g., biography, donor information, and restrictions), where one may find details of the provenance of the records.

检索工具并非一直是今天的样子。30年前，如今熟悉的范围与内容说明、传记与历史数据等信息，还不存在。检索工具是详细列出文件夹、往往也列出单件材料的长目录清单，表征目标是说明排列。如今，所强调的信息要素完全不同。从比例看，传记、历史概要与内容说明，可能比文件夹清单占据更多篇幅。历史与传记说明的加入，标志着对背景表征日益重视。检索工具如今同时呈现的利用与馆藏管理数据，都支持这一变化。同样，范围与内容说明及系列描述的加入，显示两种趋势：一是更整体、或更偏馆藏级的内容综合日益兴起；二是内容描述的细致程度下降。内容不再通过逐件清单呈现，而是通过盒或文件夹目录，注明体裁及文件夹内材料的大致年代。可以说，细致程度与具体性已从内容清单移向前部说明，例如传记、捐赠者信息和限制，在那里可以找到文件来源的细节。

原书第 159–160 页 · 对照段落 060

The origins of the trend toward more front matter and less granularity are unknown. I posit several interconnected hypothesis. First, the trend reflects a closer adherence to provenance and with this the requirement of understanding that the evidential context of the records is essential for establishing authority of the source. This may be the result of the increased professionalization of the archival community in terms of identifying a theoretical base and more organized educational opportunities. Second, archivists have had the realization that to manage a greater volume of records, item-level description was no longer feasible. Finally, the historical trend of examining the "underclass," or those not often individually documented in records, may have also played a role in more collection-level rather than individual descriptions and more functional and provenancial representations of records.

增加前部说明、降低细致程度这一趋势的起源尚不清楚。我提出几个相互关联的假设。首先，这反映更严格地遵循来源原则，以及相应地认识到：理解文件的证据背景，对于确立来源的权威不可或缺。这或许源于档案共同体专业化程度提高，包括确立理论基础，以及更有组织的教育机会。其次，档案员已认识到，为管理数量更多的文件，单件级描述不再可行。最后，史学关注"下层阶级"，或那些不常在文件中被逐一记录的人，也可能促成更多馆藏级而非个体级描述，以及更重职能与来源的文件表征。

### *Components of Finding Aids*
### 检索工具的组成部分

原书第 160 页 · 对照段落 061

The dynamism of finding aids is also visible in their components. Users can see changes in understanding of the collections, new interpretations of the records, and new information on papers emerging out of the finding aids. A few examples from the Bentley Historical Library include everything from a reevaluation of provenance to the addition of both physical details and information about the records to an existing finding aid. For instance, the Udvandrerarkivet, Aalborg, Denmark, became the Aalborg universitetscenter, Danske Udvandrerarkiv. In the Russell Barnes finding aid, a death date was added, the volume increased, and a second accession required the addition of a "+ Mrs." to the donors' area. These later accessions are literally penned or written in within the existing contents listing of the finding aid and appear to be "interleaved" with the earlier like materials. The William Lawrence Clements Papers contains penciled-in notes that there are "Photographs in Box 3," and at the end of the collection an additional pointer leads to further papers of Clements in the Clements Library. The Paul Lincoln Adams Collection originally noted that the collection was restricted. This has been crossed out, and a note "Restrictions lifted on 11-26-90" is penned below. In one case, a space for the final date of the papers to be donated has purposefully been left blank for the John D. Stevens Papers. Thus, the archivist anticipated changes and almost expected to amend the finding aid. While these examples may seem inelegant in our age of word processing and obsessive formatting, enabling the researcher to view these changes is important. Having version control of finding aids helps archivists to visualize the growing understanding of their collections and to see the convergences among and within collections. As we move more aggressively into the digital domain, examining means of making this evolution trans-parent is important. Otherwise, these notes will be simply overwritten when changes are made and the evolution of the records and their surrogates will be obliterated.

检索工具的动态性，也体现在组成部分中。使用者能看到对馆藏认识的变化、对文件的新解释，以及从检索工具中出现的个人文件新信息。本特利历史图书馆的几个例子，涵盖了从重新评估来源，到向现有检索工具添加实体细节和文件信息的种种情况。例如，丹麦奥尔堡的Udvandrerarkivet，改为Aalborg universitetscenter, Danske Udvandrerarkiv。在罗素·巴恩斯检索工具中，增加了逝世日期，材料数量增多，第二次接收还要求在捐赠者栏加上"+ 夫人"。这些后来接收的材料，确实是用笔写进现有内容清单的，似乎与此前同类材料"穿插"在一起。威廉·劳伦斯·克莱门茨文件有铅笔备注，注明"照片在第3盒"；馆藏末尾还有额外提示，引导使用者查找克莱门茨图书馆中的其他克莱门茨文件。保罗·林肯·亚当斯馆藏原注明有利用限制，这句话被划去，下方用笔写上"限制于1990年11月26日解除"。另一个例子中，约翰·D.史蒂文斯文件特意空出捐赠文件的最终年代。因此，档案员预见到变化，几乎期待日后修改检索工具。在文字处理与过度追求格式的时代，这些例子看似不够优雅，但让研究者看到变化十分重要。对检索工具实行版本控制，有助于档案员直观认识自己对馆藏理解的增长，以及馆藏内部与馆藏之间的趋同。随着我们更积极进入数字领域，考察如何使这种演变透明，十分重要。否则，修改时这些备注会被直接覆盖，文件及其替代性描述的演变也会被抹去。

### *Consequences of Finding Aids*
### 检索工具的后果

原书第 160 页 · 对照段落 062

As noted in this essay, finding aids are the basis for second-order representations of archival collections: MARC records and HTML- and SGML/EAD-encoded finding aids. The development of EAD and its relationship to finding aids is the most critical event in the evolution of finding aids to date. There are two related aspects of this convergence between the technology of the finding aid and the technologies of networked information exchange that I find disturbing. First, I fear that the evolution of finding aids will slow as the costs are weighed of changing the networked archival information. Second, finding aids have now become technologically bound (or perhaps technologically unleashed?), but their form relies on an older, and some would argue obsolete, analog document genre. This inhibits creative use of networked information and the emergence of new digital representational forms for the representation of primary sources. In the second case it is not only evolution that is impeded but innovations in access and in the structuring of archival work. If the encoding process is seen as an add-on at the end of the descriptive process it will not lead to reenvisioning archival representation in light of new technologies. Third, the implementation of initiatives such as EAD and MARC entails the adoption of standards and best practices. While standards can promote increased consistency and create platforms for increased information exchange and easier retrieval, there are downsides to these initiatives. Formalized standards are very difficult to change, and as these standards become ingrained in the education of new generations of archivists, it will become increasingly difficult for archivists to envision new ways of practice.

如本文所述，检索工具是馆藏第二层次表征的基础，包括MARC记录，以及HTML和SGML / EAD编码的检索工具。迄今，EAD的发展及其与检索工具的关系，是检索工具演变中最关键的事件。检索工具技术与网络信息交换技术趋同，有两个相互关联的方面令我担忧。首先，我担心，在权衡修改网络档案信息的成本时，检索工具的演变会减慢。其次，检索工具如今受到技术约束，或也许被技术释放了，但其形式依赖一种较旧的、有人认为已经过时的非数字文献体裁。这限制了网络信息的创造性利用，也限制了用于呈现一手资料的新数字表征形式的出现。在第二种情况下，受到阻碍的不只是演变，还有利用与档案工作结构方面的创新。如果编码被看作描述过程末尾附加的一项工作，就不会促使人们依据新技术重新构想档案表征。第三，实施EAD和MARC等项目，需要采用标准与最佳实践。虽然标准可以提高一致性，为增加信息交换和便利检索建立平台，但也有不利方面。正式标准很难改变；而当它们深入新一代档案员的教育时，档案员将越来越难以设想新的实践方式。

原书第 160 页 · 对照段落 063

The information that gets stored is at best what can be stored using the currently available technology: the encyclopedia came to mirror the affordances of its technological base. In this process, people naturalize the historically contingent structuring of information; they often begin to see it as inevitable.[59]

被存储的信息，至多是现有技术所能存储的信息：百科全书逐渐反映其技术基础提供的可能性。在这一过程中，人们把具有历史偶然性的信息结构安排视为自然，并往往开始把它看成不可避免。[59]

原书第 160–161 页 · 对照段落 064

Finding aids also represent the convergence of collections management and access systems. The increasing number of components that support managerial functions in the finding aid over time indicates that, on some level, archivists are thinking about collections management when creating finding aids. The breaking out of an “administrative information” section in EAD finding aids supports this claim. Archival access tools have always won out over collections management tools, and as a result, archivists have tried to recover managerial functions within these access tools. The fit has not been good, and the structures created for access are not always hospitable to administrative functions. But until a technology that represents collections management information is created, descriptive representational systems will serve these two (sometimes contradictory) purposes.

检索工具还体现了馆藏管理与利用系统的趋同。随着时间推移，检索工具中支持管理职能的组成部分越来越多，说明档案员在某种程度上，创建检索工具时已在考虑馆藏管理。EAD检索工具单列“行政信息”部分，也支持这一说法。档案检索工具一直优先于馆藏管理工具，因此档案员试图在检索工具内部找回管理职能。这种结合并不理想，为利用设计的结构，并不总适合行政职能。但在一种能够呈现馆藏管理信息的技术出现之前，描述性表征系统将继续服务于这两个有时相互矛盾的目的。

## Conclusions
## 结论

原书第 161 页 · 对照段落 065

The structuring of representation practices by creators, archivists, and systems enables or inhibits the meanings of representations as they cross boundaries of space (creator to archives), time, and use. In terms of creators, representational artifacts contain a substantial amount of information concerning the institutional, professional, and cultural structures in which they were created. When they are taken out of their original milieu, however, context is lost. Transferring or translating context into the archival realm is also problematic because archivists embed records into additional macrostructures (perhaps more precisely identified as the information architectures) of overarching classification schemes as well as into the microstructures of card catalogs and finding aids. In turn, the maintenance and creation of these structures form the basis of ongoing routines, interactions, behaviors, and knowledge that comprise archival organizational memory and practice. The archival representations, then, demonstrate not only the evolving physical collections and intellectual understandings of collections but also changing perspectives on collection arrangement, description, and management. Each successive representation and representational system builds on its predecessors, recovering what was judged valuable in a given temporal and cultural context, incorporating or discarding what was deemed essential or not, respectively. More recent representational systems have been built around digital technologies, such as MARC and EAD. These have hastened the process of stabilizing the forms and standardizing the data elements in archival access tools. The great benefit of these technologies has been the exchange of archival information among other archives as well as researchers. Yet, the full costs and benefits of the structural effects of these evolutionary developments are not yet known.

形成者、档案员与系统对表征实践的结构化，会在表征跨越空间——从形成者到档案馆——时间与用途边界时，促成或抑制其意义。就形成者而言，表征产物包含大量关于其形成时的机构、专业与文化结构的信息。但脱离原初环境后，背景便流失了。将背景转移或翻译到档案领域，也存在问题，因为档案员将文件嵌入总体分类方案的额外宏观结构，也许更准确地说是信息架构，同时嵌入卡片目录与检索工具的微观结构。反过来，这些结构的维持与创建，成为持续惯例、互动、行为与知识的基础，共同构成档案组织记忆与实践。因此，档案表征不仅显示实体馆藏与对馆藏知识理解的演变，也显示对馆藏整理、描述与管理视角的改变。每一项后续表征与表征系统，都以先前系统为基础，重新找回在特定时间和文化背景下被判断为有价值的内容，并纳入被认为必要的内容、舍弃被认为不必要的内容。较近的表征系统围绕MARC与EAD等数字技术建立，加快了档案检索工具形式的稳定和数据要素的标准化。这些技术的巨大益处，在于档案馆与其他档案馆及研究者之间交换档案信息。然而，这些演变所造成结构影响的全部成本与收益，尚不清楚。

原书第 161 页 · 对照段落 066

Archival representation processes are neither objective nor transparent. As such, archivists need to be more conscious of the activities that structure the creation of representations, their social construction, as well as their appropriate uses. Archival representations speak not only about the collections for which they act as surrogates but also about archival practice and archivists. The Egyptian invocation at the beginning of this essay, which one archivist deemed appropriate to include in a finding aid, may have been as much a reflection on the archival content being described as on a particular representation being constructed. Because of their ubiquity, it is these representations that may be the most enduring evidence of the archivist and by these "writings cause him to be remembered in the mouth of the reciter."

档案表征过程既不客观，也不透明。因此，档案员需要更自觉地认识那些塑造表征创建的活动、其社会建构性质，以及适当用途。档案表征不仅说明其所替代的馆藏，也说明档案实践与档案员自身。本文开头的埃及祈语，被一位档案员认为适合收入检索工具；它既可能是对所描述档案内容的反思，也同样可能是对正在构造的某种表征的反思。由于这些表征无处不在，它们或许是关于档案员最持久的证据；正是通过这些表征，"文字使他在诵读者口中被铭记"。

29. The difficulty of transcending time and space in reference mediations is also treated in Elizabeth Yakel, “Thinking inside and outside the Boxes: Archival Reference Services at the Millennium,” *Archivaria* 49 (2000). Brothman, “Memory, History, and the Preservation of Records,” 79, also makes this point when he discusses the difference between simple access and access over time and the need for archivists to transcend both physical and intellectual barriers to accomplish this.

29. 参考咨询中介跨越时间与空间的困难，也见于Elizabeth Yakel：《在盒子内外思考：千禧年之际的档案参考咨询服务》，《Archivaria》49（2000）。Brothman在《记忆、历史与文件保存》第79页，也提出这一点：他讨论简单获取与跨时间获取的差别，以及档案员为实现后者，必须跨越实体与知识障碍。

原书第 163 页 · 对照段落 124

56. Meissner, “First Things First.” Meissner discusses the need to reengineer finding aids because encoders were spending time synthesizing and looking for information. Encoders for the Historic Pittsburgh Project at the University of Pittsburgh also did a substantial amount of data manipulation and in some cases made very far-reaching assumptions about the intent of the author of the finding aid.

56. Meissner：《要事优先》。梅斯纳讨论了重新设计检索工具的必要性，因为编码者正在花时间综合和查找信息。匹兹堡大学“历史匹兹堡项目”的编码者，也进行了大量数据处理，并在某些情况下，对检索工具作者的意图作出影响深远的假设。
